In this book *The Key to a Successful Business*, the first thing you will learn is the corner stone of business, and that is having the right mindset, so in this book we start by fine tuning and improving that mindset, because that is the key to achieving positive outcomes in business, i.e. removing the fears that prevent us from taking the seemingly giant step of starting a business. This book helps you remove the inferiority complex that life around you has created and build on your confidence. The book helps you make adjustments in the way you think. The book shows you how being successful does not require a supernatural talent. Being successful in business is all about putting the right effort in the right place. It is all about living your life, and planning your strategies, in the right manner at the right time, it is all about finding the right idea/opportunity that suits you and harnessing that opportunity in the most effective way and that is the foundation of business, explained here in everyday, simple to understand English. Part I of this book takes you through that journey - a journey that tells you what you need to do in order to get there, but this book doesn't stop there. Part II of this book goes on to show you the secret strategies to use once you are there, in a list not less than 70 key strategies used in almost any situation you will encounter once you get the ball rolling with your business. The tactics and strategies listed in this part are known by the top entrepreneurs who prefer to keep them from the masses, that's what gives them their competitive edge. For the first time, these strategies are revealed to the masses. The book does not stray from the important points you need to know, it is not made to be a laborious read, hence why the book is deliberately kept to a minimum page length, so you can obtain the knowledge you require and get on with what you need to do in the least time consuming way.
