While providing many accounts of near-death experiences (NDEs) from men, women, and children of all ages and backgrounds, Lessons from the Light is much more than just an inspiring collection of NDEs. In Lessons near-death expert Kenneth Ring extracts the pure gold of the NDE and with a beautiful balance of sound research and human insight reveals the practical wisdom held within these experiences. As Stanley Krippner states, "In this remarkable book, Ring presents evidence that merely learning about the near-death experience has similar positive effects to those reported by people who actually have had near-death experiences. Kenneth Ring is one of the few authors whose gifts include the capacity to transform their readers' lives."

Times change and so has the world of tiling since the original publication of the bestselling Working with Tile in 2005. Advances in technology and research have brought new installation products and tools to the market, including waterproofing membranes, backerboards, grouts, and cutting tools. Design elements have also seen a dramatic shift with the emergence of glass and stone launching a new era of creativity. DIYers will welcome this completely revised and updated edition, which combines easy-to-follow installation techniques and the latest design ideas. Two all-new sections focus on grouting (which can make or break any job) and working with porcelain and glass tile (a daily challenge to tile and shower door installers and plumbers). Remodelers looking to master small-scale tile projects such as adding a backsplash or retiling a powder-room floor will refer often to the expert advice

and over 370 updated photos.

An "engaging . . . entertaining journey," Landing explores the pleasures and sorrows of long-distance love in the digital age (The New York Times Book Review). Síle is a stylish citizen of the new Dublin, a veteran flight attendant who's traveled the world. Jude is a twenty-five-year-old archivist, stubbornly attached to Ireland, Ontario, the tiny town in which she was born and raised. When Jude meets Síle on her first transatlantic plane trip, the spark between them is instant. After a coffee shared at Heathrow Airport, both women return to their lives—but neither can forget their encounter. Over

the next year, Jude and Síle connect through emails, phone calls, letters, and the occasional visit. But no matter how passionate, every long-distance relationship comes to a crossroads, because you can't have a happily ever after when the one you love is a world apart . . . "[Donoghue] explores with a light, sure touch the subject of desire across distances of various kinds: generational, cultural, even spiritual." —The New York Times Book Review "[A] charming tale." —Kirkus Reviews

Philosophy for Children (P4C) has long been considered as crucial for children's ethical and moral education and a decisive contribution for education for the democratic life. The book gathers contributions from experts in the field who reflect on fundamental issues on how childhood and ethics are interrelated within the P4C movement. The main interest of this volume is to offer an understanding of how different philosophical conceptions of childhood can be coordinated with different ethical and meta-ethical philosophical considerations in P4C addressing topics such as P4C and relativism, P4C and Virtue ethics, ethics and emotions in P4C, philosophical commitments and P4C application, and Socratic practice within a pragmatist framework. A thought-provoking collection about how assumptions of particular philosophical conceptions of childhood modify moral and ethical education and a testimony of the undeniable contribution of P4C for moral education and econceptualization of childhood.

Mona Lisa, a Monere woman, is drawn to Dante, the warrior son of a healer, who had been cursed by a high priestess to endure a never-ending cycle of life and death and who wants nothing more than to die at Mona Lisa's hands.

This edited book deepens the engagement between 21st century philosophy of mind and the emerging technologies which are transforming our environment. Many new technologies appear to have important implications for the human mind, the nature of our cognition, our sense of identity and even perhaps what we think human beings are. They prompt questions such as: Would an uploaded mind be 'me'? Does our reliance on smart phones, or wearable gadgets enhance or diminish the human mind? and: How does our deep reliance upon ambient artificial intelligence change the shape of the human mind? Readers will discover the best philosophical analysis of what current and near future 21st technology means for the metaphysics of mind. Important questions are addressed on matters relating to the extended mind and the distributed self. Expert authors explore the role that the ubiquitous smart phone might have in creating new forms of self-knowledge. They consider machine consciousness, brain enhancement and smart ambient technology, and what they can tell us about phenomenal consciousness. While ideas of artificial general intelligence, cognitive enhancements and the smart environment are widely commented on, serious analysis of their philosophical implications is only getting started. These contributions from top scholars are therefore very timely, and are of particular relevance to students and scholars of the philosophy of mind, philosophy of technology, computer science and psychology.

Introduces the BASIC programming language, shows how to incorporate graphics and music in programs, and discusses the machine language used by the Commodore 64 computer

He's a down-on-his-luck janitor with aspirations of writing the great American trash novel. She's the spoiled, sharp-tongued boss's daughter, always looking for a creative way to spice up her boring life. The Giggly Guide to Grammar is the life's work of a dedicated language arts teacher with a life-sized sense of humor and the hand of an artist. Cathy Campbell has both illustrated and long tested the exercises in this guide with her 9th grade students in The Woodlands, Texas. It's a lighthearted and ludicrous guide to the essential elements of language and grammar (with a few writing tips tossed into the mix). It's Shel Silverstein meets Strunk and White and the results are both hilarious and instructive. Tried and true, and everyone a delight, there isn't a serious sentence in the group. But this is a dead-serious grammar book with the heart of a clown. Lessons include: parts of speech, subject-verb agreement, parts of the sentence, clauses of all kinds, quotation marks and italics and much more. The Deluxe Teacher's Guide has a CD-Rom that includes a full answer set, posters for the classroom and a set of transparency-ready exercises for each of the chapters.

From basic concepts to research grade material, Mobile Web 2.0: Developing and Delivering Services to Mobile Devices provides complete and up-to-date coverage of the range of technical topics related to Mobile Web 2.0. It brings together the work of 51 pioneering experts from around the world who identify the major challenges in Mobile Web 2.0 applications and provide authoritative insight into many of their own innovations and advances in the field. To help you address contemporary challenges,

the text details a conceptual framework that provides modeling facilities for context-aware, multi-channel Web applications. It compares various platforms for developing mobile services—from the developer and user perspectives—and explains how to use high-level modeling constructs to drive the application development process through automatic code generation. Proposes an expanded model of mobile application context Explores mobile social software as an Information and Communications Technology (ICT) Discusses the effect of context on mobile usability Through empirical study, the book tests a number of hypotheses on the use of software implementation technology and location context in mobile applications. It introduces Reusable End-User Customization (REUC)—a technique that allows users to adapt the layout of Web pages and automatically reapplies those preferences on subsequent visits. It also investigates the need for non-visual feedback with long system response times, particularly when downloading Web pages to mobile devices.
