In our high technology society, there is a growing demand for a better understanding of decision making in high risk situations in order to improve selection, training and operational performance. Decision Making Under Stress presents a state-of-the-art review of psychological theory, in research and practice, on decision making in high pressure and emergency situations. It focuses on the experienced decision makers who deal with such risks, principally on flight decks, at civil emergencies, in industrial settings and military environments. The 29 chapters cover a wide range of perspectives and applications from aviation, military, industry and the emergency services. The authors, all international invited experts in their field, are based in research centers and universities from Europe, North America and Australia. Their common interest is in the theories and methods of a new research domain called NDM (naturalistic decision making). This volume comprises the edited contributions to the Third International NDM conference, sponsored by the US Army Research Institute and the US Naval Air Warfare Center, which was held in Aberdeen, Scotland in September 1996. The NDM researchers are interested in decision making in situations characterised by high risk, time pressure, uncertain goals, ambiguous information and teamwork. The extent to which the NDM approach can explain and predict human performance in such settings is a central theme, discussed with many practical examples and applications. This book is essential reading for applied psychologists, pilots, emergency commanders, military officers, high hazard managers, safety and emergency response professionals.

Why did his new neighbour make him want to change and leave his protective shell? A man not frightened to show the world who he was. Would Martin stay or run when faced with Brad's past and his scars? Brad Cummings lived a quiet controlled life: the world he created was not through choice but from necessity. A traumatic past left him unable to see past his scars. Until fate steps in with Martin. Martin's need to show him how beautiful he is both inside and out leads Brad to finally understand the true meaning of love. Martin's ability to have fun allows Brad to stop existing and start to live for the first time in his life. Martin shows him that not all families are the same: a family can be more than a blood connection. But Brad has learnt the hard way, being himself is not always a good thing. A mischievous cat, a prying neighbour, a sexual awakening, and a father intent on harm, turn Brad's ordered life upside down. Can he trust an instant connection and believe in soulmates? Seeing Beyond the Scars is the second book in the Manx Cat Guardian Series, this book is not stand alone. These books need to be read in order to gain the background. It is an MM romance, with hurt comfort, steamy instant connection, light aspects of BDSM play, and an ancient paranormal cat that like to interfere. This book has a HEA. Trigger Warning: There are aspects of child abuse and some scenes of violence.

Amateur archaeologist Detective Sergeant Wesley Peterson and his boss Gerry Heffernan investigate the appearance of a skeleton that may be more than one thousand years old and the disappearance of an attractive Danish tourist.

Offering an overview, this guide details how 3GIO allows designers to overcome the practical performance limits of existing multidrop, parallel bus technology and explains how to increase performance and new capabilities for a broad range of computing and communications platforms.

This is the life story of Jim Zumbo, Outdoor Life magazine editor for 30 years and the blog heard around the world. On the top of the world one day, ridiculed and death threats followed. This less than 250-word blog torched his career. They called him Elmer Fudd for his lack of understanding of today's modern sporting rifle--the AR-15.

At the beginning of the 1990s, a massive speculative asset bubble burst in Japan, leaving the nation's banks with an enormous burden of nonperforming loans. Banking crises have become increasingly common across the globe, but what was distinctive about the Japanese case was the unusually long delay before the government intervened to aggressively address the bad debt problem. The postponed response by Japanese authorities to the nation's banking crisis has had enormous political and economic consequences for Japan as well as for the rest of the world. This book helps us understand the nature of the Japanese government's response while also providing important insights into why Japan seems unable to get its financial system back on track 13 years later. The book focuses on the role of policy networks in Japanese finance, showing with nuance and detail how Japan's Finance Ministry was embedded within the political and financial worlds, how that structure was similar to and different from that of its counterparts in other countries, and how the distinctive nature of Japan's institutional arrangements affected the capacity of the government to manage change. The book focuses in particular on two intervening variables that bring about a functional shift in the Finance Ministry's policy networks: domestic political change under coalition government and a dramatic rise in information requirements for effective regulation. As a result of change in these variables, networks that once enhanced policymaking capacity in Japanese finance became "paralyzing networks"--with disastrous results.

The book highlights recent prominent results in the domain of the synthesis of new polyoxometalates with a specific attention to polyoxothioanions, and provides some novelties and perspectives in selected domains such as magnetism, luminescence and nanochemistry, and macroions self-assembly in solutions. The case of OC one-pot OCO syntheses often used and reported in POMs synthesis is studied in terms of more complex solution speciation processes related to highly dynamical situation connected to factors such as pH, ionic strength, reaction time, temperature, counterion nature, concentration of starting materials, presence of electron donors and redox potentials. The behavior of macroions (2nm-6nm size range) in solution is shown to be quite different from the simple ionic solution or colloidal systems (Debye-Huckel model). Their self-assembling into a single-layered, spherical, hollow vesicle structure, namely the OC blackberry OCO structure, is clearly described. Examples of spin clusters with tunable interactions are given and single molecule magnets based on POMs are specifically tackled. Besides paramagnetic transition metal centres and lanthanoid ions encapsulated in archetypal

lacunary polyoxoanions, magnetically functionalized Kleperates are described, their discovery tracing back nearly 15 years.

One hundred years ago, a lord lived happily in his castle. Alcohol flowed freely and the festivities were endless. One day, while he was out hunting, he jostled a young goose herder who was saved in the nick of time by a bonnet maker. The lord always said "Everything in the right place!" and that is what happened, to the lord's great chagrin. Over the years, things would change a lot. Hans Christian Andersen (1805-1875) was a Danish author, poet and artist. Celebrated for children's literature, his most cherished fairy tales include "The Emperor's New Clothes", "The Little Mermaid", "The Nightingale", "The Steadfast Tin Soldier", "The Snow Queen", "The Ugly Duckling" and "The Little Match Girl". His books have been translated into every living language, and today there is no child or adult that has not met Andersen's whimsical characters. His fairy tales have been adapted to stage and screen countless times, most notably by Disney with the animated films "The Little Mermaid" in 1989 and "Frozen", which is loosely based on "The Snow Queen", in 2013. Thanks to Andersen's contribution to children's literature, his birth date, April 2, is celebrated as International Children's Book Day.

With a strong focus on problem solving and community-police partnerships, Miller, Hess, and Orthmann's comprehensive text provides a practical, up-to-date guide to effective community policing. After introducing the history and philosophy of the movement that has profoundly shaped modern police operations, the authors emphasize practical strategies and essential skills to help readers apply effective, real-world problem solving within their communities. In light of high-profile deadly force incidents that have strained the relationships between the community and the police, this edition taps into the recommendations in the Final Report of the President's Task Force on 21st Century Policing and its call for a renewed emphasis on community policing to strengthen public trust and build police legitimacy. And the MindTap that accompanies the text helps students master techniques and key concepts while engaging them with career-based decision-making scenarios, visual summaries, and more. The signature creation of cartoonist Roger Langridge, Fred the Clown is the thinking man's idiot. Fred has an eye for the ladies, as well as several other organs, but the only part of themselves they're willing to share with him is a carefully placed kneecap. Fred the Clown's misadventures are a curious balance of bleakness and joyful absurdism; the universe may dump on Fred from a great height, but he never gives up. More often than not, they involve the pursuit of a lady—any lady will do, it seems, but bearded ladies are at the top of the list. Disappointment seems inevitable, and it usually is; yet, almost despite himself, Langridge will occasionally give Fred a happy ending out of nowhere... p.p1 {margin: 0.0px 0.0px 0.0px 0.0px; font: 13.9px Arial; color: #424242}

Nationally bestselling author Liz Carlyle presents the second book in her scandalous romance series—a fiery duel of desire and deception with love as the ultimate prize... Once, he spurned the woman he loved. The Earl of Wynwood was far too reckless to handle a sophisticated woman like Viviana Alessandri. And the beautiful opera singer was too famous to make a suitable for Wynwood. Twice, she wagered with her heart. Crushed by Wynwood's refusal to marry, Viviana offered her hand to another, a wealthy count. But fate has a way of playing with lovers' hearts—and passion has a way of setting them on fire. Two little lies tore them apart. But now, at a gala affair celebrating Wynwood's recent betrothal, Viviana will get one last chance to win back his love...again...and again.

The state of the collection of Antarctic Meteorites is summarized. This guide is intended to assist investigators plan their meteorite research and select and request samples. Useful information is presented for all classified meteorites from 1976 to 1988 collections, as of Sept. 1989. The meteorite collection has grown over 13 years to include 4264 samples of which 2754 have been classified.
