Syllabus English NET JRF UNIVERSITY GRANTS COMMISSION NET BUREAU NET SYLLABUS Subject: English Code No. : 30 Unit –I : Drama Unit –II : Poetry Unit –III : Fiction, short story Unit –IV : Non-Fictional Prose NOTE: The first four units must also be tested through comprehension passages to assess critical reading, critical thinking and writing skills. These four units will cover all literatures in English. Unit –V : Language: Basic concepts, theories and pedagogy. English in Use. Unit –VI : English in India: history, evolution and futures Unit –VII : Cultural Studies Unit –VIII : Literary Criticism Unit –IX : Literary Theory post World War II Unit –X : Research Methods and Materials in English

This book showcases a compilation of case studies presented by scientists, teachers and academics and covers contemporary technologies for combating climate change, including sustainable agricultural management practices and conservation agriculture. It highlights the situations that future generations in the Indian Himalayas will face, and addresses the major challenges for tomorrow's generations in their efforts to ensure sufficient food production for the global population. It also sheds light on the factors that are routinely ignored in connection with agricultural management practices for sustainable food production and risk assessment. Lastly, it illustrates the need to develop a comprehensive master plan for strategic planning, including conservation agriculture practices that address poverty and food security in the wake of climate change impacts.

The European experience suggests that the efforts made to achieve an efficient trade-off between monetary policy and prudential supervision ultimately failed. The severity of the global crisis have pushed central banks to explore innovative tools—within or beyond their statutory constraints—capable of restoring the smooth functioning of the financial cycle, including setting macroprudential policy instruments in the regulatory toolkit. But macroprudential and monetary policies, by sharing multiple transmission channels, may interact—and conflict—with each other. Such conflicts may represent not only an economic challenge in the pursuit of price and financial stability, but also a legal uncertainty characterizing the regulatory developments of the EU macroprudential and monetary frameworks. In analyzing the “legal interaction” between the two frameworks in the EU, this book seeks to provide evidence of the inconsistencies associated with the structural separation of macroprudential and monetary frameworks, shedding light upon the legal instruments that could reconcile any potential policy inconsistency.

Developing novel and more effective treatments that improve quality of life for individuals with autism spectrum disorders is urgently needed. To date a wide range of behavioral interventions have been shown to be safe and effective for improving language and cognition and adaptive behavior in children and adolescents with ASD. However many people with ASD can receive additional benefit from targeted pharmacological interventions. One of the major drawback in setting up therapeutics intervention is the remarkable individual differences found across individuals with ASD. As a matter of fact the medications that are currently available address only symptoms associated with ASD and not the core domains of social and communication dysfunction. The pathogenesis paradigm shift of ASD towards synaptic abnormalities moved the research to pathway to disease that involve multiple systems and that are becoming the forefront of ASD treatment and are pointing toward the development of new targeted treatments. Some new therapeutics have been tested and others are being studied. In this context single gene disorders frequently associated with ASD such as Rett Syndrome, Fragile X and Tuberous Sclerosis have been of significant aid as neurobiology of these disorders is more clear and has a potential to shed light on the altered signaling in ASD. However much research is needed to further understand the basic mechanisms of disease and the relationship to idiopathic ASD. Clinical trials in children are underway with agents directed to core symptoms and to the associated disorders in the search of new therapeutics and progress are expected with possible new option for therapeutics in ASD in the upcoming future. Children and Adolescents with ASD and their families can provide important information about their experience with new treatments and this should be a priority for future research. In addition, research performed on genetic mouse models of ASD will keep on providing useful information on the molecular pathways disrupted in the disease, thus contributing to identify novel drug targets.

Addresses recent advances from both the clinical and technological perspectives to provide a comprehensive presentation of m-Health This book introduces the concept of m-Health, first coined by Robert S. H. Istepanian in 2003. The evolution of m-Health since then—how it was transformed from an academic concept to a global healthcare technology phenomenon—is discussed. Afterwards the authors describe in detail the basics of the three enabling scientific technological elements of m-Health (sensors, computing, and communications), and how each of these key ingredients has evolved and matured over the last decade. The book concludes with detailed discussion of the future of m-Health and presents future directions to potentially shape and transform healthcare services in the coming decades. In addition, this book: Discusses the rapid evolution of m-Health in parallel with the maturing process of its enabling technologies, from bio-wearable sensors to the wireless and mobile communication technologies from IOT to 5G systems and beyond Includes clinical examples and current studies, particularly in acute and chronic disease management, to illustrate some of the relevant medical aspects and clinical applications of m-Health Describes current m-Health ecosystems and business models Covers successful applications and deployment examples of m-Health in various global health settings, particularly in developing countries

Makes literature of Niagara Falls available to readers with a variety of interests in literature, culture, and place. Niagara Falls is a place where lands are contested, industry debated, freedom harbored, the spirit uplifted, and fame won. It overflows with stories. Since before digital technologies made visual reproduction easier and more abundant than ever, writers composed Niagara Falls as symbolically meaningful. But in the face of four centuries of writing on this natural wonder, how does one make these stories new? Niagaras of Ink collects anecdotes of famous writers' experiences—previously untold tales, unique takes on well-known visits, and materials just too good to exclude—with an anthology of some of the most engaging Anglo-American writing on the Falls from the nineteenth to early twentieth

centuries. This collection invites readers to re-see Niagara through these lenses. Jamie M. Carr is Associate Professor of English at Niagara University and the author of *Queer Times: Christopher Isherwood's Modernity*.

The development of sustainable agricultural systems is an imperative aspect of any country, but particularly in the context of developing countries. Lack of progress in these initiatives can have negative effects on the nation as a whole. *Agricultural Development and Food Security in Developing Nations* is a pivotal reference source for the latest scholarly material on promoting advancements in agricultural systems and food security in developing economies. Highlighting impacts on citizens, as well as on political and social environments of a country, this book is ideally designed for students, professionals, policy makers, researchers, and practitioners interested in recent developments in the areas of agriculture.

This book argues that contemporary European politics creates new forms of transnational power that challenge the traditional parameters of the nation-state. Kauppi identifies and critically explores the evolving dynamics between national and transnational spaces, groups and knowledge, and suggests that European public policies and transnational institutions like the European Parliament create new spaces, types of knowledge and novel political practices. *Toward a Reflexive Political Sociology of the European Union* is structured around three parts. The first focuses on evolving transnational fields. The second explores the changing role of academics and universities. The third section engages with the works of Pierre Bourdieu on politics and the media. The issues discussed throughout the book revolve around the challenges to the nation-state and of knowledge production that is tied to it. This book will be an invaluable resource to academics and researchers interested in European politics, European Union studies and political sociology.

We are delighted to introduce the proceedings of the 3rd English Language & Literature International Conference (ELLiC 3). This conference has brought researchers, developers and practitioners around the world who are leveraging and developing the English language education, literature, linguistics, and translation. We strongly believe that this conference provides a good forum for all researchers, developers and practitioners to discuss all scientific aspects that are relevant to Digital Society especially in the above fields. We also expect that the future conference will be as successful and stimulating, as indicated by the contributions presented in this volume

Open government initiatives have become a defining goal for public administrators around the world. As technology and social media tools become more integrated into society, they provide important frameworks for online government and community collaboration. However, progress is still necessary to create a method of evaluation for online governing systems for effective political management worldwide. *Open Government: Concepts, Methodologies, Tools, and Applications* is a vital reference source that explores the use of open government initiatives and systems in the executive, legislative, and judiciary sectors. It also examines the use of technology in creating a more affordable, participatory, and transparent public-sector management models for greater citizen and community involvement in public affairs. Highlighting a range of topics such as data transparency, collaborative governance, and bureaucratic secrecy, this multi-volume book is ideally designed for government officials, leaders, practitioners, policymakers, researchers, and academicians seeking current research on open government initiatives.

Booker Prize winner and Living National Treasure, Thomas Keneally still divides critical opinion: he is both a morally challenging stylist and a commercial hack, a wise commentator on society and a garrulous leprechaun. Such judgements are located in the cultural politics of Australia but also linked to ideas about what a literary career should look like. 'Thomas Keneally's Career and the Literary Machine' charts Keneally's production and reception across his three major markets, noting clashes between national interests and international reach, continuity of themes and variety of topics, settings and genres, the writer's interests and the publishers' push to create a brand, celebrity fame and literary reputation, and the tussle around fiction, history, allegory and the middlebrow. Keneally is seen as playing a long game across several events rather than honing one specialist skill, a strategy that has sustained for more than 50 years his ambition to earn a living from writing.

What is our definition of "modernism" if we imagine it stretching from 1865 to 1965 instead of 1890 to 1945? How does the captivity narrative change when we consider it as a contemporary, not just a "colonial, genre? What does the course of American literature look like set against the backdrop of federal denials of Native sovereignty or housing policies that exacerbated segregation? Filled with challenges to scholars, inspirations for teachers (anchored by an appendix of syllabi), and entry points for students, *Timelines of American Literature* gathers some of the most exciting new work in the field to showcase the revelatory potential of fresh thinking about how we organize the literary past.

This dissertation approaches the question of sustainability and its influence on company performance, with special focus on the manufacturing industry. In the contemporary production environment, manufacturing operations must take into account not only profit, but also environmental and social performance, in order to ensure the long-term development of the company. Companies have to decide whether they should allocate resources to environmental and social practices in order to improve their competitive advantage. Consequently, in decision-making processes concerning operations, it is important for companies to understand how to coordinate profit, people, and planet. The objective of this dissertation was to investigate the current situation regarding manufacturers' sustainable initiatives, and to explore the relationship between these sustainable practices and companies' performance, including financial performance, operational performance, innovation performance, environmental performance, and social performance. First of all, a structured literature review was conducted to identify sustainable factors considered to be important in the decision making of manufacturing operations. The findings were synthesized into a conceptual model, which was then adopted as the basis for designing the survey instrument used in this dissertation. Drawing on Global Reporting Initiative (GRI) reports, empirical research was performed to explore the relationship between environmental management practices and company performance. Interestingly, the findings showed that many environmental management practices had a strong positive impact on innovation performance. Sustainability disclosures and financial performance were further analyzed using extended data from the GRI reports. The results also showed that several sustainability performance indicators, such as product responsibility, human rights, and society, displayed a significant and positive correlation with return on equity in the sample companies. In order to further explore the research area and to verify these findings, a triangulation approach was adopted and new data were collected via a survey conducted among middle and large sample companies in the Swedish manufacturing industry. The results indicated that the sustainable improvement practices had a positive impact on company performance. Some environmental and social improvement practices had a direct and positive correlation with product and process innovation. Furthermore, findings suggested that better cooperation with suppliers on environmental work could help to strengthen the organizational green capabilities of the focal companies. When considering the company's general approach to implementing sustainable practices, some interesting findings emerged. There were limited significant differences in sustainable practices when comparing different manufacturing sectors, and different countries and regions. However, the results showed that Swedish manufacturing companies often place higher priority on implementing economic and environmental sustainability practices than on social ones. This dissertation contributes to the literature on manufacturing sustainability. The study expands the understanding of how environmental, social, or economic perspectives as a triple bottom line can influence company performance and to a certain extent the supply chain. Identifying and understanding such relationships gives companies the opportunity to integrate sustainability into their manufacturing operations strategy in order to sustain their manufacturing operations over the long term.

The Oxford Handbook of Canadian Literature provides a broad-ranging introduction to some of the key critical fields, genres, and periods in Canadian literary studies. The essays in this volume, written by prominent theorists in the field, reflect the plurality of critical perspectives, regional and historical specializations, and theoretical positions that constitute the field of Canadian literary criticism across a range of genres and historical periods. The volume provides a dynamic introduction to current areas of critical interest, including (1) attention to the links between the literary and the public sphere, encompassing such topics as neoliberalism, trauma and memory, citizenship, material culture, literary prizes, disability studies, literature and history, digital cultures, globalization studies, and environmentalism or ecocriticism; (2) interest in Indigenous literatures and settler-Indigenous relations; (3) attention to multiple diasporic and postcolonial contexts within Canada; (4) interest in the institutionalization of Canadian literature as a discipline; (5) a turn towards book history and literary history, with a renewed interest in early Canadian literature; (6) a growing interest in articulating the affective character of the "literary" - including an interest in affect theory, mourning, melancholy, haunting, memory, and autobiography. The book represents a diverse array of interests -- from the revival of early Canadian writing, to the continued interest in Indigenous, regional, and diasporic traditions, to more recent discussions of globalization, market forces, and neoliberalism. It includes a distinct section dedicated to Indigenous literatures and traditions, as well as a section that reflects on the discipline of Canadian literature as a whole.

Explores the different military responses to popular uprisings during the 2011 Arab Spring in Egypt, Syria, Tunisia, and Libya.

This pioneering textbook takes a thematic approach to the subject, resulting in a comprehensive understanding of historic economic issues in the United States. Siegler takes a thematic approach, and provides both the theoretical foundations and historical background needed to gain an in-depth understanding of the subject. Every chapter examines a specific topic, and the chapters are linked to each other to provide an overall view. The chronological approach is represented with a useful timeline as an appendix to show where the specific topics fit in the chronology. Chapter topics include: long-run causes of economic growth; economic history of income and wealth inequality; slavery, segregation, and discrimination; immigration and immigration policies; and an economic history of recessions and depressions. This book is ideally suited as a primary text for undergraduate courses in US economic history, as well as suitable courses on history degree programmes.

Industrial energy efficiency has been recognized as a major contributor, in the broader set of industrial resources, to improved sustainability and circular economy. Nevertheless, the uptake of energy efficiency measures and practices is still quite low, due to the existence of several barriers. Research has broadly discussed them, together with their drivers. More recently, many researchers have highlighted the existence of several benefits, beyond mere energy savings, stemming from the adoption of such measures, for several stakeholders involved in the value chain of energy efficiency solutions. Nevertheless, a deep understanding of the relationships between the use of the energy resource and other resources in industry, together with the most important factors for the uptake of such measures—also in light of the implications on the industrial operations—is still lacking. However, such understanding could further stimulate the adoption of solutions for improved industrial energy efficiency and sustainability.

This invaluable Guide surveys the key critical works and debates in the vibrant field of children's literature since its inception. Leading expert Pat Pinsent combines a chronological overview of developments in the genre with analysis of key theorists and theories, and subject-specific methodologies.

In this much-needed book, Graham Dunkley challenges the oft-repeated notion that free trade and global integration are the best means of development for all nations at all times – an idea that has proved even more misguided in the wake of the global financial crisis. By contrast, Dunkley reveals – through a wide range of statistical analysis and case studies – that at best the evidence is mixed. Looking systematically at issues such as trade-led growth, supply chains and financialization, *One World Mania* reveals the many problems that over-globalization has caused, often at great human cost. An indispensable guide for anyone wishing to understand the shortcomings of current global economic policies.

Chapter wise and Topic wise introduction to enable quick revision. Coverage of latest typologies of questions as per the Board latest Specimen papers Mind Maps to unlock the imagination and come up with new ideas. Concept videos to make learning simple. Latest Solved Paper with Topper's Answers Previous Years' Board Examination Questions and Marking scheme Answers with detailed explanation to facilitate exam-oriented preparation. Examiners comments & Answering Tips to aid in exam preparation. Includes Topics found Difficult & Suggestions for students. Dynamic QR code to keep the students updated for 2021 Exam paper or any further CISCE notifications/circulars Providing a timely contribution to the ongoing questions surrounding topics which are by definition subject to varying stakeholder interpretations, this book addresses "the missing link" between theoretical CSR concepts and everyday management practice. It acts as a guide to awaken managers to the advantages of adopting a CSR "mindset" when developing sustainable business strategies. The book consists of three parts: 1) A theoretical realm which establishes the key concepts and rationale for the adoption of a sustainable CSR approach, 2) A practical realm which addresses putting CSR and sustainability into business practice, 3) An educational realm which proposes how to incorporate the concepts into teaching and training.

Cape Town, South Africa, 7 Sept. 2016 – 8 Sept. 2016. Theme: Sustainable economies in the information economy. Purpose: To share the quality academic papers presented at the International Conference on Business and Management Dynamics (ICBMD) held from 7 to 8 September 2016 at African Pride Crystal Hotel and Spa in Cape Town. As grey literature, the proceedings are the contributions made by researchers at the conference and are considered the written record of the work that was presented to fellow conference delegates. Methodology: The methodology used varies from researcher to researcher but are suitable for the studies conducted. Thus, on the one hand, studies that were subjective in nature used the interpretive paradigm, where the qualitative approach adopted made use of the interview method to collect data. On the other hand, studies that were objectively inclined adopted the positivist philosophy and used survey questionnaires to collect data. However, there were some academic papers which used mixed methodology because of the nature of the study. Whatever methodology used adhered to the ethos of the philosophies underpinning the methodology. Contribution made to scholarship: The articles come from individual researchers and each article in the proceedings is unique. Mostly, there is no general argument leading from one contribution to

the next. However, it is interesting to note that in the area of economic performance it was evident that real exchange rate and net foreign direct investment contribute more towards innovations in economic growth. With regard to human capital development, papers presented evidence that there exists a definite need to explore the phenomenon of personal branding as limited scientific academic research has been done within the field of personal branding or on elements of the topic. Thus, the outcome argues that personal branding has an influence on leadership style which in turn impacts on organisational performance and related hygiene factors. Furthermore, it was demonstrated that current methods or strategies for enforcing institutionalisation of knowledge sharing within an organisation have not been successful, and, as such, new strategies are needed to reinforce efforts to nurture and invigorate the institutionalisation of knowledge sharing within an organisation. With regard to technology and big data impact on organisational performance, it was evident that system performance, memory consumption and CPU utilisation can be used as criteria to compare and evaluate big data technologies to improve organisational performance. Most of the articles' contribution reemphasised technology education and training as a means of digitising business and improving effectiveness. Target audience: The target readership is academic researchers and business leaders who require access to the latest developments in the fields of economics, information management, business, education, development studies, social sciences and technology. It is also for policymakers and other stakeholders who need a better understanding of the impact of new developments on existing policies and regulations for their review or amendment.

Einer der inhaltlichen Schwerpunkte des Tagungsbands zur ATZlive-Veranstaltung "Der Antrieb von morgen 2019" wird die Information zum aktuellen Stand der Antriebsentwicklungen sein. Die Tagung ist eine unverzichtbare Plattform für den Wissens- und Gedankenaustausch von Motoren- und Fahrzeugh Herstellern, deren Zulieferer und Entwicklungspartner, Lehrende und Ingenieure von Universitäten und Hochschulen, Vertreter von Behörden und Verbänden sowie für Techniker, die in diesem Themengebiet aktiv sind.

The purpose of this volume is to describe the impact of the increased demand for flexibility on employees and its impact on their individual work life trajectories and health. The volume offers concrete examples of interventions aimed to find innovative ways of sustainable work careers for today's workers. We focus on the school to work transition, job insecurity, job loss and re-employment and retirement. The interventions described offer strategies for implementing support in employment contracts, increasing preparedness of individual employees with public education programs or developing work arrangements and support systems in work organizations.

Young People and the Politics of Outrage and Hope explores how young people can make a life and a future in challenging neoliberal social conditions.

Tax simplification - An African Perspective Edited by Chris Evans, Riël Franzsen, Elizabeth (Lilla) Stack 2019 ISBN: 978-1-920538-96-5 Pages: 347 Print version: Available Electronic version: Free PDF available About the publication Why are tax systems so complex and what are the causes and consequences of such complexity? The simplification of tax systems is one of the most important issues faced today in worldwide efforts to modernise and strengthen government finance and revenue raising capacities. Nowhere is it more important than throughout the rapidly emerging economies of the dynamic African region. This volume brings together contributions in this field from a conference held in South Africa in October 2018 and provides a unique synthesis of knowledge and understanding gained from the specialist expertise and diverse backgrounds brought to the tax simplification debate by those authors. Featured topics include: Taxpayers' rights to simplicity The African experience of tax simplification Simplification trends among small and medium sized entities Pension tax simplification Sources of complexity in value added taxation Simplification of recurrent property taxes Complexity and approaches to international taxation Complexity and taxation of multinational enterprises Lessons from overseas. The analysis of these topics includes timely and relevant perspectives from the experience in other jurisdictions including Australia, Canada, New Zealand, the United Kingdom and the United States. The volume will be an essential reference for researchers and others interested in the field from academia, government, legal and accounting practice and public policy organisations in African and other countries worldwide. Table of Contents Preface Foreword – Tax Simplification in the United Kingdom: Some Personal Reflections John Whiting Contributors Introduction Elizabeth (Lilla) Stack, Chris Evans and Riël Franzsen Tax Complexity and Tax Simplification: A Critical Review of Concepts and Issues Binh Tran-Nam, Annet Wanyana Oguttu and Kyle Mandy The Taxpayers' Right to Tax Simplicity in South Africa and the United States Carika Fritz and Nina E Olson The Role of the Office of Tax Simplification in the United Kingdom and Lessons for Other Countries Yige Zu and Lynne Oats An Analysis of the Tax Simplification Initiatives for Pension Provision in the United Kingdom and South Africa Bernadene de Clercq, Andy Lymer and Chris Axelson Simplification Lessons from New Zealand Adrian Sawyer, Marina Bornman and Greg Smith Legal Uncertainty in the South African VAT Marius van Oordt and Richard Krever Simplifying Recurrent Property Taxes in Africa Riël Franzsen, Abdallah Ali-Nakyea and Adams Tommy Statutory and Effective Complexity for Individual Taxpayers in South Africa Sharon Smulders, Karen Stark and Deborah Tickle Small and Micro Businesses: Case Studies on the Complexity of 'Simplified' Schemes Heinrich Dixon, Judith Freedman and Wollela Abehodie Yesegat Tax Complexity for Multinational Corporations in South Africa – Evidence from a Global Survey Thomas Hoppe, Reyhaneh Safaei, Amanda Singleton and Caren Sureth-Sloane International Tax Simplification in South Africa through Managing Substantive Complexity and Improving Drafting Efficiency Jinyan Li and Teresa Pidduck Bibliography Index

NTA UGC-NET/JRF CHAPTER-WISE SOLVED PAPERS WITH NOTES

The papers in this volume focus on fiction and theatre in their traditional forms as well as in their encounters with novel and innovative forms and avenues of dissemination. As a cultural practice that emerged from a process of protest and contestation of hegemony, it is understandable that one main concern in African literature and literary criticism is the resistance against the emergence of marginalizing centers in formerly or currently marginalized societies with regard to discourses, aesthetics and media of creation. These new centers that sometimes undermine the strategic/tactical exploitation of the relative advantage procured by each medium run the risk of leading to new forms of stratification that mitigate the import of African and African diasporic literatures. The collection of essays therefore seeks to analyze the representation of pertinent socio-political and historical questions in a variety of postcolonial texts from Africa and the African diasporas, notably the Caribbean islands and the United States of America. However, far from re-writing of history in a way that cedes to conservative worldviews, creative writers and critics simultaneously attempt to chart ways forward for socially all-inclusive futures. In the context of colonial and neo-colonial legacies that seem to forestall any sense of individual and collective self-fulfillment, contributors to this volume examine the pertinence of African fiction and theatre in imagining new vistas of re-conceptualizing the postcolonial condition in ways that re-galvanize the belief in an enabling future.

The contents of the March 2015 issue (Volume 124, Number 5) are: Articles: • "Article III Judicial Power, the Adverse-Party Requirement, and Non-Contentious Jurisdiction" by James E. Pfander & Daniel D.

Birk • “Beyond Diversification: The Pervasive Problem of Excessive Fees and 'Dominated Funds' in 401(k) Plans” by Ian Ayres & Quinn Curtis • “The Uneasy Case for Favoring Long-Term Shareholders” by Jesse M. Fried • “Deviance, Aspiration, and the Stories We Tell: Reconciling Mass Atrocity and the Criminal Law” by Saira Mohamed Notes: • “Mitigating Jurors’ Racial Biases: The Effects of Content and Timing of Jury Instructions” by Elizabeth Ingriselli • “How To Eat an Elephant: Corporate Group Structure of Systemically Important Financial Institutions, Orderly Liquidation Authority, and Single Point of Entry Resolution” by Kwon-Yong Jin • “Public Actors, Private Law: Local Governments’ Use of Covenants To Regulate Land Use” by Noah M. Kazis Comment: • “Methodological Stare Decisis and Intersystemic Statutory Interpretation in the Choice-of-Law Context” by Grace E. Hart Quality ebook formatting includes fully linked footnotes and an active Table of Contents (including linked Contents for all individual Articles, Notes, and Essays), proper Bluebook formatting, and active URLs in footnotes.

This book provides a comprehensive overview of damage control resuscitation (DCR), an evidence-based approach to the resuscitation of patients with severe life-threatening hemorrhage (LTH). It focuses on both civilian and military applications as DCR is utilized in civilian trauma situations as well as combat casualty care settings. The book covers the history of fluid resuscitation for bleeding, epidemiology of severe traumatic injuries, prediction of life-threatening hemorrhage, pathophysiology and diagnosis of blood failure, and permissive hypotension. Chapters provide in-depth detail on hemostatic resuscitation principles, dried plasma, dried platelet surrogates, and recent developments in frozen red blood cells and oxygen carriers. The book also discusses how DCR principles can be used in a variety of situations such as when there are large numbers of patients with hemorrhagic lesions, non-trauma scenarios, and on distinct populations such as children. Finally, it concludes with a discussion of training and education methods for the implementation of DCR and remote DCR principles as well as learning healthcare system principles to facilitate the implementation of DCR and ultimately improve outcomes for patients with life-threatening hemorrhage. *Damage Control Resuscitation: Identification and Treatment of Life-Threatening Hemorrhage* is an essential resource for physicians and related professionals, residents, nurses and medical students in emergency medicine, anesthesia, surgery, and critical care, as well as civilian and military EMS providers.

This private NON-PROFIT professional publication and associated web-based, information archive service is dedicated to the enhancement of practice, program development, program evaluation and innovations in mental health and substance abuse treatment programs worldwide. Its goal is to provide a public forum for practitioners, consumers and researchers to address the multiple service needs of patients and families and help determine what works, for whom under a variety of circumstances.

This book examines the current legal status of the international genetic information commons and proposes alternative management strategies.

The construction industry is associated with problems such as low productivity and high costs. This has been highlighted in several government-funded reports in both Sweden and in the UK during the course of over two decades. The construction industry is a large industry sector employing hundreds of thousands and a large contributor to a country’s GDP. The problems therefore have a large impact on society. Some of the problems are rooted in the organizational structure of the construction industry. Compared to other manufacturing industries, the construction industry is organized in temporary organizations. The temporary organizations cause temporary supply chains, fragmentation among construction industry actors and adversarial relationships between those actors. Partnering has been put forward as a solution to overcome the temporariness and the adversarial relationships in the construction. Another solution to mitigate the problems suggested in the reports is supply chain management (SCM). Both concepts have been taken from the manufacturing industries and partnering has been more successful compared to SCM in the construction industry. In the construction industry the progress towards SCM has focused on logistics. In recent years dedicated third-party logistics (TPL) solutions have emerged in the Swedish construction industry, where a company is hired to manage the logistics in a construction project. The purpose with the research presented in this licentiate thesis is to explore how client initiated TPL solutions and partnering can be facilitators for SCM in the construction industry. Being a new phenomenon in the construction industry TPL solutions provide a logistical competence not necessarily included in a traditional construction project. Therefore, TPL solutions are of particular interest when studying the realization of SCM in the construction industry. In the process of realizing SCM in the construction industry, the construction clients have been put forward as having a crucial and important role. The clients are the initiator and funder of construction projects and as such the client can influence the course of a construction project. Therefore, it is of interest to study how the client can take an active role in this process. Initiating a TPL solution in a construction project is one way for a client to take an active part in the realization of SCM in construction. However, in order to study how clients can take an active role towards the realization of SCM in the construction industry, there have to be an understanding of how SCM is to be adopted to the construction industry context. SCM that derives from the manufacturing industry is designed to be used in long-term relationships with permanent organizational structures. The construction industry on the other hand is associated with short-term relationships and a temporary organizational structure. Partnering that is designed to mitigate the temporariness and establish long-term relationships have been quite successful in the construction industry, and could therefore be used as a facilitator for SCM in construction. To study the use of client initiated TPL-solutions in construction and the realization of SCM in the construction industry the following research questions have been addressed: RQ1: To what extent can a third-party logistics solution be a facilitator for client driven SCM in the construction industry? RQ2: How will upstream and downstream tiers be affected when a thirdparty logistics provider is used in a construction project? RQ3: How can partnering be used a mean to facilitate the realization of SCM in the construction industry? To answer the research questions two main methodologies have been used; case study for the empirically grounded research and conceptual studies for the analysis of the case studies as well as for comparing the two concepts of partnering and SCM. All questions have been grounded in literature and previous research. The findings of this research is therefore grounded in both theory and in practice. The main findings of this research is that TPL solutions are not a quick fix for realizing SCM in the construction industry. However, if used right a TPL solution can be an effective tool to address logistical issues in a construction project and to establish an interface between the supply chain and the construction site. By initiating a TPL solution the client addresses the importance of logistical competence in a construction project. A TPL solution does not have a purpose of its own; a TPL solution is a service function to the construction project, providing expertise on logistics management. There are also a number of driving forces and concerns that have been identified, if they are addressed prior to a TPL solution is implemented, the likelihood of its success will increase. Furthermore, both partnering and SCM rely on high trust and share several key components and issues that have to be addressed. Partnering on strategic level with several suppliers included can even be hard to distinguish from SCM. Wherefore, partnering is considered a facilitator for the realization of SCM in construction. By addressing the necessary issues in both concepts a good foundation for SCM is established.

African Journal of Reproductive Health (AJRH) is a multidisciplinary and international Journal published quarterly (March, June, September, and December) by the Women's Health and Action Research Centre (a non-governmental organization with headquarters in Nigeria). The publication of the journal started in 1997. As of June 2014, 56 editions have been published. The journal focuses on publishing original research, comprehensive review articles, short reports and commentaries on reproductive health in Africa. It strives to provide a forum for both African and foreign authors working in Africa to share findings about all aspects of reproductive health and also to disseminate innovative, relevant, and useful information on reproductive health throughout the continent.

Adaptation to Climate Change: ASEAN and Comparative Experiences presents a dynamic and comprehensive collection of works from legal scholars around the world that delves into a relatively new frontier on legal aspects of climate change adaptation with focus on the ASEAN region, both at the regional level as well as at the national level in some ASEAN countries — such as Malaysia, Philippines, and

Thailand. Other countries not within ASEAN are also represented, such as Bangladesh, People's Republic of China, Sri Lanka, and the Republic of Taiwan. In doing so, it surveys one of the most important issues confronting developing countries today, and the challenges to building resilient societies. It is an essential source of reference for policy-makers, administrators, the private sector officials, scientists, academic scholars, climatologists, NGOs, and CSOs in ASEAN and the world. Contents:Foreword by Tommy Koh, Ambassado-at-LargePreface and AcknowledgmentsAbout the AuthorsKeynote Address by Raman Letchumanan, formerly Head of the Environment Division, ASEAN SecretariatTheme I: Coastal Warming and Sea Level Rise:Asia-Pacific Islander Responses to Climate Change (Ilan Kelman)Managing Southeast Asian Ecosystems to Reduce Coastal Population Vulnerability Under Sea Level Rise (Daniel A Friess)Theme II: Legal Frameworks/Policies/Governance for Climate Change:Adaptive Water Governance: Lessons Learned from Implementing an Ecosystem-Approach in Mesoamerica (Alejandro Iza, Alexandra Müller, and Valentina Nozza)Legal and Policy Framework for Ecosystem-Based Adaptation to Climate Change in Malaysia: A Reform Oriented Study (Abdul Haseeb Ansari)Policy and Legal Responses to Climate Change Adaptation in China: New Developments, New Challenges (Wang Xi and Gao Qi)Theme III: Key Future Impacts and Vulnerabilities:The Laws, Policies, and Institutions Relating to Climate Change in Thailand: Balancing between "Mitigation" and "Adaptation" (Kanongnij Sribuaiam)The Warsaw International Mechanism: Exploring the Structures and Functions to Address Loss and Damage Associated with Climate Change Impacts (M Hafijul Islam Khan) Geoengineering: An ASEAN Position (Jolene Lin)Theme IV: Economic Interconnections:Assessing Green Jobs in Taiwan: A Tri-Pillar Approach (Fan Chien-Te and Hsu Yun-Hsiang)Sustaining Growth, Climate Change, and Meeting Environmental Obligations: What can ASEAN Governments Do? (Euston Quah and Tan Tsiat Siong)Theme V: Some Case Studies:Options for Adaption to Climate Change (Richard L Ottinger, Wang Pianpian, and Kristen M Motel)Dealing with Climate Migrants: A New Challenge for Developing Nations (Asanga Gunawansa)Climate Change, Migration, and International Law in Southeast Asia (Benoît Mayer)Achieving Human Rights in an Era of Climate Disruption: The Philippines (Amado S Tolentino, Jr.)Theme VI: Adaptation — Disaster Management, Risk Reduction and Humanitarian Assistance:The Legal Regime of Climate Change Adaptation and Disaster Management in Taiwan: Focus on the Major Amendment Following the Devastating Typhoon Morakot of 2009 (Gao Ming-Zhi Anton)Legal Options for Mainstreaming Climate Change Disaster Risk Reduction in Governance for Kenya (Robert Kibugi)Land Tenure Systems as a Challenge for Disaster Recovery: Adapting to Extreme Weather Events after Typhoon Haiyan (Daniel Fitzpatrick and Caroline Compton)The Role of ASEAN in Disaster Management: Legal Frameworks and Case Study of Typhoon Haiyan/Yolanda (Koh Kheng-Lian and Rose-Liza Eisma-Osorio) Readership: Policy-makers, administrators, scientists, academic scholars, climatologists, NGOs and CSOs, and students in the fields of law and environmental science. Key Features:A dynamic collection of works from legal scholars around the world building knowledge in climate change adaptation, one of the important issues confronting people of todayPromotes a "whole of the world" approach to finding solutions to climate change and the challenges to building resilient societiesThis publication is focused on taking stock of legal and policy frameworks on climate change adaptation in ASEAN and other countriesKeywords:Climate Change Adaptation;Legal Frameworks;ASEAN;Nature-based Solutions;Warsaw International Loss and Damage;Mitigation This book presents an updated view of the Philippines, focusing on thematic issues rather than a description region by region. Topics include typhoons, population growth, economic difficulties, agrarian reform, migration as an economic strategy, the growth of Manila, the Muslim question in Mindanao, the South China Sea tensions with China and the challenges of risk, vulnerability and sustainable development.

Rick Rylance addresses the debate over the public value of literary studies, from antiquity to the present day. He offers an account of the foundational issue of 'the public good' and explores the disciplinary integrity of literary study.

Table of Contents: Minding Animals. Editorial, Rod Bennison, Alma Massaro, Jessica Ullrich - Animal Deaths on Screen: Film & Ethics, Barbara Creed - Learning about the emotional lives of kangaroos, cognitive justice and environmental sustainability, Steve Garlick, Rosemary Austen - Captivating Creatures: Zoos, Marketing, and the Commercial Success of Yann Martel's Life of Pi, Tanja Schwalm - The Multi-dimensional Donkey in Landscapes of Donkey-Human Interaction, Stephen Blakeway - Mind the gap! Musicians challenging limits of birdsong knowledge, Susanne Heiter - A clinical perspective on 'theory of mind', empathy and altruism: the hypothesis of somasia, Jean-Michel Le Bot - The spontaneous horse, Francesco De Giorgio, Jose School - Antispeciesisms, Alma Massaro - The Challenges of Technoscience for Critical animal studies, Marcel Sebastian - On dolphin personhood, Jessica Ullrich - Fifty Shades of Oppression: Unexamined Sexualized Violence against Women and Other Animals, Corey Lee Wrenn

Analyses Muslim-Muslim divisions within northern Nigeria, which are as important for understanding the violence in the region as those between Muslim and Christian (for which, see the companion volume, Creed and Grievance), with consequences for long-term peacemaking.

Bestsellers are the books that sell well, are read by large numbers of people, and are widely talked about in the media and among readers. Yet there has been little research on the creation, reception, and cultural and social significance of bestsellers. Recognizing that popular narratives play an important role in the lives of millions of readers, Hype – Bestsellers and Literary Culture looks closely at the literature so many people read. As global market phenomena, situated in between the power spheres of producers and consumers, bestsellers also highlight the interdependency of culture, market, and the individual. This volume addresses such diverse questions as the creation of hype, the role and the meaning of the author in the presentday media landscape, changes in the book trade, historical perspectives on bestselling literature, and the relationship between bestsellers and literary research.
