This book elaborates on how China's previous leaders established, consolidated, developed and improved China's basic modern governance system. It also explores and discusses how to correctly, objectively and scientifically perceive, evaluate and promote the modernization of China's state governance and its capacity. Using detailed and accurate data and extensive background information, this book analyzes the changing history and future perspectives of the relationship between China's government and the market, state-owned economy and private economy. Covering an extensive timespan, this comprehensive book includes contributions from Chinese scholars specialized in contemporary China studies discussing the major breakthroughs and decision-making consultations in Chinese development strategies. It also offers insights into the research mechanism and development levels of Chinese think tanks based at research institutes. Last but not least, it sheds light on the democratic advances in the Chinese decision-making process.

Explains the importance of market research, describes basic analysis strategies, and offers tips on finding data, preparing a successful questionnaire, and creating a mission statement

Did earlier speakers of English use the same speech acts that we use today? Did they use them in the same way? How did they signal speech act values and how did they negotiate them in case of uncertainty? These are some of the questions that are addressed in this volume in innovative case studies that cover a wide range of speech acts from Old English to Present-day English. All the studies offer careful discussions of methodological and theoretical issues as well as detailed descriptions of specific speech acts. The first part of the volume is devoted to directives and commissives, i.e. speech acts such as requests, commands and promises. The second part is devoted to expressives and assertives and deals with speech acts such as greetings, compliments and apologies. The third part, finally, contains technical reports that deal primarily with the problem of extracting speech acts from historical corpora.

The paper in this volume are organized in three parts: scriptural, contextual and theological. The central question being addressed is: how do Christians living in contexts, where Islam is a majority or minority religion, experience, express or think of the Cross? This is, therefore, an exercise in listening. As the contexts from where these engagements arise are varied, the papers in drawing scriptural, contextual and theological reflections offer a cross-section of Christian thinking about Jesus and the Cross.

The publication of the first English translation of Martin Heidegger's Beiträge zur Philosophie (Vom Ereignis) marked a significant event for Heidegger studies. Considered by scholars to be Heidegger's most important work after Being and Time, Contributions to Philosophy (From Enowning) elaborates what he calls "being-historical-thinking," a project in which he undertakes to reshape what it means both to think and to be. Contributions is an indispensable book for scholars and students of Heidegger, but it is also one of the most difficult because of its aphoristic style and new and strange words. In the Companion to Heidegger's Contributions to Philosophy an international group of fourteen Heidegger scholars shares strategies for reading and understanding this challenging work. Overall approaches for becoming familiar with Heidegger's unique language and thinking are included along with detailed readings of key sections of the work. Experienced readers and those coming to the text for the first time will find the Companion an invaluable guide to this pivotal text in Heidegger's philosophical corpus.
