The role humans play in the field of information technology continues to hold relevance even with the industry's rapid growth. People contribute heavily to the physical, cognitive, and organizational domain of computing, yet there is a lack of exploration into this phenomenon. Humanoid aspects of technology require extensive research in order to avoid marginalization and insufficient data. The Handbook of Research on the Role of Human Factors in IT Project Management is a collection of innovative research on the methods and applications of the task of human characteristics in the design and development of new technology.

While highlighting topics including digitalization, risk management, and task analysis, this book is ideally designed for IT professionals, managers, support executives, project managers, managing directors, academicians, researchers, and students seeking current research on the dynamics of human influence in technological projects.

Are you responsible for starting new teams, providing direction, allocating resources, removing roadblocks, and serving as an all-around champion for high-performance work teams? This practical, step-by-step guide is for you! Not only does this pocket reference emphasize the importance of turning slogans and talk into action, it tells how to do it. You'll get helpful guidelines for turning the principles of team management into day-to-day actions. Each chapter begins with a set of questions that the sponsor must ask before starting any team. The answers to these questions provide the keys to whether the project or activity actually warrants the effort that goes into a successful team. Once the need for

the team has been clearly established, a checklist outlines the necessary actions the sponsor must take to successfully start and maintain the team. The remainder of each chapter provides the details and specific instructions for carrying out the activities on the checklist. Many of the steps include exercises, activities, or assignments to enhance the learning points. Covers the most common types of teams and team support elements.
