Knee surgeons world wide have been aware that a beautifully illustrated book on diagnostic evaluation of the knee existed. What we in the English speaking world did not appreciate was the superb quality of the text that accompanied these splendid illustrations. Now, Dr. Michael Strobel and Dr. Hans-Werner Stedtfeld's work, *Diagnostic Evaluation of the Knee*, has been translated by Mr. Terry Telger into an English text that is clear and cogent. The authors' message is comprehensive and straight forward. They show how diagnosis of knee disorders lends itself to a disciplined, orderly thought process based on a substantial body of scientific knowledge. This book, through effective illustrations, clarity of text and thought, and subject organization, leads the reader through the diagnostic evaluation of the knee in an enjoyable and unforgettable way. Some may think the diagnostic process is dead with the advent of magnetic resonance imaging. They are wrong: the diagnostic process has never been more alive, and M. Strobel and H.-W. Stedtfeld capture the excitement of modern day diagnosis through the integration of many disciplines - anatomy, pathophysiology, general examination, special examinations, and special studies. This is the unique character of this book and why it will be a text appreciated by all who care for the knee-injured patient.

Small enough to toss into a camera bag, yet thorough in coverage, *Hove User's Guides* are the best all-around camera manuals available. More Than Words provides an introduction to both communication theory and practice. The authors cover the basics of communication, including communication between individuals, between groups, in organizations, and through the mass media and new technologies. The book provides a structured approach to the subject and a source of reference, with examples of the application of ideas, short practical activities, resource lists and a glossary of terms. The second edition has been fully revised and updated to take into account new developments in communication and media studies: it contains an expanded section on practical communication and media skills, writing skills, designing leaflets and producing audio and video material, including scripting and planning. It is illustrated with new models and photographs and has checklist summaries for easy revision purposes.
