'I'd always known that I was Brown. Black was different though; it came announced. Black came with expectations, of rhythm and other things that might trip me up.' Imani is a foundling. Rescued as a baby and raised by nuns on a remote Northumbrian island, she grows up with an ever-increasing feeling of displacement. Full of questions, Imani turns to her shadow, Amarie, and her friend, Harold. When Harold can't find the answers, she puts it down to what the nuns call her 'greater purpose'. At nineteen, Imani answers a phone call that will change her life: she is being called to Accra after the sudden death of her biological mother. Past, present, faith and reality are spun together in this enthralling debut.

Following her transition from innocence to understanding, Imani's experience illuminates the stories we all tell to make ourselves whole.

A hilarious and hopeful primer to prevent, combat, and eliminate the suckage in modern marriage by doing it right in the early years, from one of the minds behind the series *Sex and the City* and the *New York Times* bestselling authors of *He's Just Not That Into You*, *It's Called a Breakup Because It's Broken*, and *It's Just a F***ing Date* Some marriages start out storybook. Perfect proposal, perfect engagement, perfect wedding, perfect honeymoon, and perfect newlywed years. Greg Behrendt and Amiira Ruotola stumbled right out of the wedding gate. Their choices in the early years, they'll tell you, nearly bought their marriage a one-way ticket to Suckville. The *New York Times* bestselling authors explore all the adventures of early wedlock, from the moment one of you gets on one knee to the day when sex starts to feel like work instead of play. In this guidebook, Behrendt and Ruotola explore their own marriage and, with gleeful candor, tremendous warmth, sharp humor, and piercing insight, look at what we who have decided to "settle down" hope to get out of our most lasting relationship. We venture through volumes on the engagement, wedding planning, the Big Day, the wedding hangover, the (blissful?) first year, the hard work of marrying two lives, fights, and sex-pectations versus sex-pectreality. The perfect book for those who have just put a ring on it or are thinking of putting a ring on it, Behrendt and Ruotola's work is a brilliant guide for the first stretch of that wild ride we call marriage.

Megan Mazeros and Lauren Mabrey are complete opposites on paper. Megan is a girl from a modest Midwest background, and Lauren is the daughter of a senator from an esteemed New England family. When they become roommates at a private women's college, they forge a strong, albeit unlikely, friendship, sharing clothes, advice and their most intimate secrets. The summer before senior year, Megan joins Lauren and her family on their private island off the coast of Maine. It should be a summer of relaxation, a last hurrah before graduation and the pressures of postcollege life. Then late one night, something unspeakable happens, searing through the framework of their friendship and tearing them apart. Many years later, Megan publicly comes forward about what happened that fateful night, revealing a horrible truth and threatening to expose long-buried secrets. In this captivating and timely novel, Paula Treick DeBoard explores the blurred lines of consent and misconduct, showing how the abuse of power can lead to devastating consequences.

NO SALES RIGHTS IN SWITZERLAND This second edition of the first comprehensive commentary on the Swiss Rules of International Arbitration covers the new version of these rules which entered into force on 1 June 2012. It is a practical guide for arbitrators, counsel, state courts and persons involved in the conduct and administration of arbitral proceedings under the Swiss Rules. This commentary presents the new version of the Swiss Rules from a double perspective. On the one hand, it emphasizes the relationship between these Rules and the Swiss legal regime governing international arbitration, namely the provisions of chapter 12 of the Swiss Private International Law Statute. On the other hand, it puts these Rules in an international perspective by comparing them with the corresponding provisions of the other major

institutional rules (ICC, LCIA, SCC, DIS, VIAC, SIAC, HKIAC, CIETAC, AAA/ICDR, WIPO and ICSID) and with the provisions of the former edition of the rules. Finally, it highlights the main differences between the Swiss Rules and the UNCITRAL Arbitration Rules which were revised in 2010. This book is written by arbitration practitioners based in Switzerland who work with established law firms, widely experienced in international commercial arbitration. It is the work of a refreshing new generation of Swiss arbitration specialists. Two of the editors were members of the working group for the revision of the Swiss Rules and thus bring special insight into the book about the revision process. This atlas presents technical information for professionals who process and use temperate or tropical timber. The industrial application of robots is growing steadily. This is reflected in the number of manufacturers now involved in the field of robotics. Thanks to pioneers such as Joseph Engelberger of Unimation Inc, industry has seen their rapid deployment in all areas of manufacturing. Manufacturers of robots and robotic equipment have increased their production levels and at the same time have made great efforts to improve and adapt their products to allow them to be used for a wider range of applications. The demand for ever more sophisticated robotic devices has made the choice of robot for a particular application an extremely hard one. Industrial Robot Specifications has been compiled to enable users to assess robotics in the context of their own needs. The book contains detailed information on over 300 robots manufactured and distributed under licence throughout Europe. More than 90 companies are covered, and details are given of their distributors and agents, regional addresses and names of key contacts. Information is provided on robots as diverse as simple teaching machines, costing perhaps £1500, to those highly sophisticated computer-controlled robot devices commonly found in flexible manufacturing systems, costing tens of thousands of pounds each. Introduction Industrial Robot Specifications is divided into three sections: adjustable mechanisms that command manipulation.

Can a clever young inventor uncover a ruthless pirate's heart of gold? Thrilling sea adventure takes on a hint of steampunk in the second book by the author of the acclaimed *Hour of the Bees*. When her parents, the great marine scientists Dr. and Dr. Quail, are killed in a tragic accident, eleven-year-old Fidelia Quail is racked by grief -- and guilt. It was a submarine of Fidelia's invention that her parents were in when they died, and it was she who pressed them to stay out longer when the raging Undertow was looming. But Fidelia is forced out of her mourning when she's kidnapped by Merrick the Monstrous, a pirate whose list of treasons stretches longer than a ribbon eel. Her task? Use her marine know-how to retrieve his treasure, lost on the ocean floor. But as Fidelia and the pirates close in on the prize, with the navy hot on their heels, she realizes that Merrick doesn't expect to live long enough to enjoy his loot. Could something other than black-hearted greed be driving him? Will Fidelia be able to master the perils of the ocean without her parents -- and piece together the mystery of Merrick the Monstrous before it's too late?

Master's Thesis from the year 2018 in the subject Business economics - Law, grade: First Class, University of Portsmouth, language: English, abstract: This dissertation aims to analyze demographic characteristics of the homogeneous group of white-collar crime offenders, who are qualified accountants and members of the UK chartered professional bodies ACCA, CAI, CIMA, CIPFA, CIOT, ICAEW and ICAS. Beyond demographics, the crimes and infringements committed, the victims, the methods of detection, the duration of offense and the damages caused are elaborated, scrutinized and commented. The disciplinary, public administrative and criminal penalty regimes applied to offender-accountants are also subject of analysis. The study examines 2,596 disciplinary documents by content analysis, that are published online by the UK chartered accountancy bodies, FRC, FCA/FSA and IS between January 2012 and June 2017. The total sample observed encompasses 1,390 chartered accountants. The findings say that the typical culprit is male, around 45, practicing in a small firm and mainly guilty of disciplinary infringements. In case of financial and tax delinquency, ca. five offenses are committed over four years, causing average damages of £5,000,000-£6,200,000. The study reveals that female delinquency is significantly below the results of prior research. Moreover, a growing population of elderly offenders and enhanced recidivism among accountants are observed that are above official crime statistics. The author is not aware of any study covering accountants from all UK chartered accountancy bodies. The results provide for opportunities of future research of offender-accountants, elderly criminality, recidivism among professionals and disciplinary policing regimes.

Aircraft System Safety: Assessments for Initial Airworthiness Certification presents a practical guide for the novice safety practitioner in the more specific area of assessing aircraft system failures to show compliance to regulations such as FAR25.1302 and 1309. A case study and safety strategy beginning in chapter two shows the reader how to bring safety assessment together in a logical and efficient manner. Written to supplement (not replace) the content of the advisory material to these regulations (e.g. AMC25.1309) as well as the main supporting reference standards (e.g. SAE ARP 4761, RTCA/DO-178, RTCA/DO-154), this book strives to amalgamate all these different documents into a consolidated strategy with simple process maps to aid in their understanding and optimise their efficient use. Covers the effect of design, manufacturing, and maintenance errors and the effects of common component errors Evaluates the malfunctioning of multiple aircraft components and the interaction which various aircraft systems have on the ability of the aircraft to continue safe flight and landing Presents and defines a case study (an aircraft modification program) and a safety strategy in the second chapter, after which each of the following chapters will explore the theory of the technique required and then apply the theory to the case study

(Reference). While Gibson produced literally thousands of banjos prior to WWII, only a handful were made in the now most desirable configuration: the Original Flathead Five-String Mastertone. Since Earl Scruggs helped to make them the most sought-after banjos in the world over 60 years ago, these instruments have amassed a cult-like following. These particular banjos featured a completely innovative design when the Gibson Company introduced them around 1930. They have since become the benchmark in design, sound quality, and just sheer power among banjo players. They have therefore also become the inspiration for nearly every successful 5-string banjo that has been manufactured for the past five decades. Like Martin Dreadnaught and Fender Stratocaster guitars, the Gibson Mastertone Banjo has achieved an exalted status: It is appreciated far beyond its utilitarian purpose as a musical instrument, and considered a truly original American art form. The Mastertone design and style are instantly recognizable by musicians and music lovers around the world, even if imitated by other manufacturers. Of the 130 or so Original Flathead Five-String Mastertones known to exist, 19 of the absolute best are featured here. The Scruggs, Reno, Jenkins, Crowe, Osborne, Huber and Mills banjos are shown in all of their glory, with details of their known histories and provenances, as well as never-before-seen photos, bills of sale, factory shipping ledgers, and other ephemera relating to these rare and highly desirable instruments.
