

Mksap 16

Bates' Guide to Physical Examination and History Taking is designed for undergraduate and postgraduate students in medicine and allied specialties

"In the preface to this impressive and well-produced book, the editors state that their aim is not to describe a new surgical specialty, since most surgeons will soon need to be "geriatric surgeons," but to assemble a comprehensive account that will allow "all providers of healthcare to the elderly to understand the issues involved in choosing surgery as a treatment option for their patients." This is a useful book that deserves to do well. I hope that the editors and their publisher will have the stamina to make this the first of several editions, as it is clear that updated information about surgery in the elderly will be required to keep pace with this important field." MKSAP for Students 3 includes over 400 patient-centered self-assessment questions and their answers in print and on CD-ROM. Designed for medical students participating in their clerkship rotation, the questions help define and assess mastery of the core knowledge base requisite to internal medicine education in medical school. The questions reflect the many management dilemmas faced daily by internal medicine physicians and when coupled with the answer critiques, provide a focused, concise review of important content.

First multi-year cumulation covers six years: 1965-70.

This enhancement to MKSAP 16 is to prepare for the Boards after completing a systematic review of MKSAP 16.

Designed for medical students on their clerkship rotation, this new edition of MKSAP for Students 4 includes more than 400 new, patient-centered self-assessment questions and answers, focused on important internal medicine information from the Core Medicine Clerkship Curriculum Guides Training Problems. The accompanying CD-ROM automatically tracks progress, assesses areas for further focus, enables category-based and random question ordering, and links directly to PubMed.

This book provides an update on recent clinical practice and an in-depth view of selected topics relevant to hospital medicine. It is divided into four sections that explore clinical, administrative, systems and ethical issues. Each section places an emphasis on the opportunities, challenges and potential directions of this burgeoning subspecialty. An important topic covered extensively is how hospitalists are being called to lead on the current opioid epidemic, given that they are well-suited in responding to complicated challenges crossing all specialties. Other chapters explore worldwide practice patterns and practical application of philosophical

tools in daily practice. This up-to-date resource provides hospitalists, advanced nurse practitioners, medical students and administrators with the latest research, trends and issues in hospital medicine.

The 80-page study presents the results of a survey of 42 libraries with tablet lending programs or those just about to implement one. The report gives detailed data and commentary on how the programs were organized, financed and implemented and their impact on patrons and libraries. The report helps its readers to answer questions such as: how many tablets do libraries maintain for loan? Which brands do they prefer and which are they planning to purchase in the future? How much have they spent on their tablet lending programs and plan to spend? Do they load their tablets with apps? If so how do they choose them? How many tablets are lost to theft? Or to negligence or accidents? What is the fine for overdue tablets? What is the length of the lending period? What are the circulation figures for tablets? What has been the impact on other library resources, such as a pre-existing laptop lending program? Or on use of the library's eBook collection? Which libraries do they view as models and what advice can they offer to peers? What services or training are offered to library patrons about how to use the tablets? Data in the report is broken out by library type (public library/public college/private college/special library), by size of library staff, and size of stock of tablet loaned and other variables.
