Minority rights is an important issue in all modern states, but for those countries hoping to join the European Union the protection of minorities is a key condition for success in the accession process. This book provides a comprehensive assessment of minority rights in Central and Eastern Europe, covering all the countries of the region that have joined the EU since 2004, including Poland, Czech Republic, Hungary, Slovenia, Estonia, Lithuania, Latvia, Slovakia, Romania and Bulgaria. For each country it outlines the major developments since 1989, highlights the salient issues in minority rights politics, assesses the actual implementation of policies and legislation, explores the roles that domestic and international factors have played - including the impact of the EU succession process - and discusses whether there have been any major changes once EU accession was secured. Overall, this book is important for all those interested in European integration and minority rights politics, as well as for specialists on Central and Eastern Europe.

In hard times, you can either panic, decline, or grow. Which do you choose to do? This is not a time to tweak your church budget. It is not a time to slash and burn it indiscriminately across the board. Nor is it the time to hunker down in the bunker and wait things out. Now is the time to exercise wisdom and to act strategically. In fact, it's a great time to be the church. People need us to live out our mission as radically as we can possibly imagine. This book will help you make wise decisions about how to weather the economic storm and emerge on the other side of it a much stronger congregation. It's a simple book with a simple message: you don't get to choose when you go through hard times, only how you respond to them.

Tells the true story of the author's severe trauma and abuse suffered at the hands of her husband.

Nick Ridgely prided himself on his control...but nothing prepared him for that phone call. When Nick discovered his twin boys had been kidnapped, he vowed to do whatever it took to get them back...even if that meant facing his ex-wife and the attraction he thought he buried months ago. Having her ex-husband back in her life was not what Becky Collingsworth asked Santa for this year. Determined to remain guarded, Becky worked with Nick to find their sons. But what would she do about the onslaught of emotions she still felt for her irresistible ex?

The main aim of this book is to offer an exposition of the principles and applications of an original method which was introduced by the authors, developed gradually in the course of time, and applied extensively in the most diverse fields of management in the mining industry and power engineering. It is a relatively universal method of mathematical model construction and application intended to aid managerial personnel at various management levels in decision-making situations, which are frequently characterized by complicated relations of a quantitative as well as logical character. The method, called by the authors simply the "method of mathematical-logical modelling" (MLM for short), is based upon an interesting and effective combination of tools from mathematical logic, Boolean algebra and computer programming. From the mathematical point of view it is based primarily on the construction and solution of

systems of pseudo-Boolean equations and inequalities with a generalized logical structure. The principal features of the method are its universality, iterativity, interactivity, and advanced and broadly applicable software, coded in FORTRAN 77. Due in particular to these properties, MLM is a powerful tool for modelling real-life situations in the mining industry (and, naturally, in other fields of human activity as well). The exposition is illustrated by a considerable number of examples. Some of these are rather simple and aimed at helping the reader verify his correct understanding of the text. Other examples, especially in the second part of the book (Chapters 6, 7 and 8), are more complicated and extensive. In some instances they have the character of case studies and demonstrate typical approaches applied when modelling mining situations. The book will be of interest to a broad range of specialists working in the mining industry - research workers, designers, computer personnel, system analysts, management personnel at all managerial levels, and also undergraduate as well as graduate students.

This book originally appeared in German in 1974, under the title "Bergschadenkunde" (mining subsidence engineering), and then in Russian in 1978, published by Nedra of Moscow. When the German edition was almost out of print, Springer-Verlag decided to bring out a new edition, this time in English. For this English version the text has been thoroughly revised, enlarged, and supplemented by over 100 new figures. The book deals with the current state of international knowledge on strata and ground movement over mine workings, with its damaging effects on mine shafts and the land surface, and with measures for regulating mining damage in law and reducing it in practice. Discussion begins with the mine excavation underground - the cause - and ends with the damage to surface structure- the effect. Methods of roof control, including the subject of rock bursts, are not discussed, since that is a field concerned more with the safety of underground workings than with minimizing damage at the surface. Of the 500 literature references in the German edition, only the more important for an international readership have been retained, but no value judgement on the many publications not mentioned should be read into this. The book is principally intended as a working aid for the mine surveyor, the mining engineer, the architect, and the civil engineer. For the student and the post-graduate researcher, it offers a summary and guide to this whole field of knowledge.

A powerful collection of poems by the fifteenth-century female mystic traces the poetess's journey from her royal trappings to the countryside, where she became a saint and a martyr.

In the last decades coal production capacity has increased rapidly and its quality, power and the reliability of equipment has steadily improved. Moreover, stability of production processes can be controlled better. In connection with that, unification of scientific schools focusing on "Mining of deposits" is an integral trend from the viewpoint of technical and technological policy. This collection of papers represents the scientific and technical achievements with regard to mineral deposits mining intensification based on effective use of modern techniques and technologies. Also, specific attention is paid to progressive and innovational technologies in the coal industry of leading countries. Widening the range of mining-geological conditions under which drivage and maintenance of mining activities are carried out, requires application of new constructive decisions. Hence, this collection of papers is focusing on the following topics: results of new equipment introduction; experiments on mutual interaction of roof support elements, protective construction and near-the-contour rock massif; analytical and calculation methods of geomechanical tasks solution; development of gas hydrates and technologies of underground coal gasification; studies on environment protection; economic aspects; management and marketing in mining production, and other important aspects of mineral deposits exploitation.

This book deals with the history of mining and smelting from the Renaissance to the present. Martin Lynch opens with the invention, sometime before 1453, of a revolutionary technique for separating silver from copper. It was this invention which brought back to life the rich copper-silver mines of central Europe, in the process making brass cannon and silver coin available to the ambitious

Habsburg emperors, thereby underpinning their quest for European domination. Lynch also discusses the Industrial Revolution and the far-reaching changes to mining and smelting brought about by the steam engine; the era of the gold rushes; the massive mineral developments and technological leaps forward which took place in the USA and South Africa at the end of the 19th century; and, finally, the spread of mass metal-production techniques amid the violent struggles of the 20th century. In an engaging, concise and fast-paced text, he presents the interplay of personalities, politics and technology that have shaped the metallurgical industries over the last 500 years.

The well-connected, northern-French monk and musician Gautier de Coinci (1177/8-1236) occupies an unassailable position as one of the most exceptional vernacular writers of the Middle Ages, concerning whom there is nevertheless no full length study in English. In a meticulously planned and supervised collection of miracles of Our Lady, which survive in a remarkable number of manuscripts, some beautifully illustrated, Gautier deploys his outstanding talents as a composer of songs, an acerbic satirist, an audacious inventor of rich and equivocal rhymes (of a virtuosity unparalleled before the "Grands Rhetoriqueurs" on the eve of the Renaissance), a confident lexical innovator, an exuberant exponent of rhetorical wordplay, an incisive observer of contemporary society, and a man of profound personal piety. This study of word-patterning in Gautier seeks to compensate for the dearth of stylistic studies of Old French and to examine in detail the relationship between rhetoric and religion, "courtoisie" and Mariolatry, aristocratic tastes and the way to spiritual renewal. Gautier's writing strategy is shown to be a means to rise beyond secular, aristocratic values by building on them and transcending them rather than opposing and rejecting them. In previous generations, ministers often enjoyed high job satisfaction. They could be clear about who they were and what they were for. Today, they are increasingly anxious about role confusion, overload and burnout. Drawing on his abundant experience in hands-on ministry and ministry education, Gordon Oliver speaks directly, with faith and with hopefulness to these realities. He explores the covenant that exists between ministers and their churches and provides a clear evaluation of the structures,

constraints and freedoms of ministry. With real-life stories and insightful questions for reflection, his thought-provoking guide helps ministers, and those who support them, work together to fulfil ministers' true calling.

Miracles of Book and Body is the first book to explore the intersection of two key genres of sacred literature in medieval Japan: sutras, or sacred Buddhist texts, and setsuwa, or "explanatory tales," used in sermons and collected in written compilations. For most of East Asia, Buddhist sutras were written in Classical Chinese and inaccessible to many devotees. How, then, did such devotees access these texts? Charlotte Eubanks argues that the medieval genre of "explanatory tales" illuminates the link between human body (devotee) and sacred text (sutra). She focuses on the sensual aspects of religious experience and on the act of reading, understood as the literal incorporation of sutra texts into the body and thus a bridge between text and flesh. Eubanks's highly original approach to understanding Buddhist textuality also looks beyond Japan to explore pre-modern book history, practices of preaching, miracles of reading, and the Mah y na Buddhist "cult of the book."

Before he had spinal-fusion surgery, he made a vow to his mother: "Mom, I'm not going out like this." Three months later, he walked out of a Philadelphia hospital on crutches, determined to complete his amazing recovery, making the name "Adam Taliaferro" synonymous with courage and perseverance.

The images on the Marseille Tarot cards started out as illustrations of Sumero-Babylonian myths, preserved through the centuries on cylinder seals. They were copied by people who didn't understand them but who also had access to some form, whether written or oral, of the wisdom encoded in those myths and in Bible stories. That wisdom is identical with Sufi teachings as espoused by teachers like Ibn al 'Arabi, Rumi, and others, including Gurdjieff and his teachings about the enneagram. The myths and stories are decoded in this book using the multiple meanings conveyed by Arabic consonantal word roots and by reference to those doctrines and to modern discoveries about conditioning and the hemispheric specialization of the brain. Arabic is the closest existing descendant of the

ancient Protosemitic language. The Kabbalah, long rumoured to be linked to the Tarot, is shown to come from the same sources, and originally had eight, not ten, sefiroth. The visual evidence alone is overwhelming: the mystery of where the Tarot comes from has been definitively solved.

Learn how to focus your ministry's programs and services on the elderly By 2030, 20% of the people living in the United States will be age 65 or older, with unique spiritual needs that can affect their physical and mental well-being. Ministering to Older Adults answers the critical need for a ministry that doesn't center primarily on youth and families in its outreach, instead presenting a step-by-step guide to developing a ministry for the aged that is focused on the needs and resources of each congregation. This program has been used effectively with nearly 50 congregations, both large and small, to create a focused older adult ministry. No two congregations are alike. The resources, perspectives, and skills of each congregation are different, as are the needs of its members. Ministering to Older Adults provides a framework for use by planning groups within communities of any religious tradition. The book presents a process that includes essential questions that allow planning groups to develop answers that fit the needs, cultural, history, and structure of their individual congregations. Ministering to Older Adults is divided into three sections: "The Fundamentals"—defining your audience, your mission, and the skills and existing programs that can be brought to the planning process "Programming Possibilities"—spiritual needs based on the aging process, continued learning for older adults, opportunities to serve and be served, providing quality pastoral care, and community building "Putting it All Together"—deciding on a direction, using desired outcomes for evaluation, establishing target dates, and ongoing evaluation Ministering to Older Adults also includes forms and charts to help in the planning process. The book is an invaluable resource for clergy, ministry committees and planning groups, and staff persons responsible for older adult ministries.
