On 29th March 2019, CBSE released an updated curriculum for Academic Year 2018-2019 in which it has suggested changes which will directly affect the Final Examinations to be conducted in March. We at Oswaal Books are always proactive to follow the changes proposed by the Board and implement the same as soon as possible to put the students, parents and teachers at ease. The Oswaal Question Banks have been modified and rewritten as per the latest Board guidelines in order to supplement the need of the students during the entire academic year! As the CBSE remodelled assessment structure is divided in two major parts namely Internal Assessment and Final Examinations, Oswaal Question Banks have been designed to assist students to prepare for their periodic tests, internal assignments as well as the Final examinations with equal ease. Oswaal Question Banks will not only help students with regular studies but will also equip the teachers with the most updated study material for the class. The Question Banks have been designed with a lot of care and attention to details. All chapters are arranged 'TOPICWISE' where each topic is explained in detail and

ship design, construction, and operation in a forum that encouraged both formal and informal discussion of presented papers.

These proceedings document the various papers delivered and partially presented at the International Conference "From experimental evidence towards numerical modeling of unsaturated soils," which was held in Weimar (Germany) during 18-19 September 2003. The conference was organized under the auspices of the International Society of Soil Mechanics and Geotechnical Engineering (ISSMGE) and the National German Geotechnical Society (DGGT). The need to understand the behavior of unsaturated soils is becoming exclusively essential for the geotechnical engineers and designers. In the last three decades many researchers have made significant contribution to the understanding of the unsaturated soil mechanics. Nevertheless, application of the subject to variety of new problems still requires our attention. This International conference is a mere attempt to unite researchers and engineers in geotechnical engineering and to discuss about the problems associated with the unsaturated soils. Doing so the objectives of these lecture notes are as follows: - to promote unsaturated soil mechanics for practical application, - to exchange experiences in experimental unsaturated soil mechanics and numerical modeling, - to discuss application of unsaturated soil mechanics to variety of problems. In other words, we could also name these two volumes as "From theory to daily practice". I would like to extend my deep sense of appreciation as the editor and the Head of the organizing committee, to many persons who have contributed either directly or indirectly to organize the International conference and to finalize these proceedings.
