Features investment and financial planning advice for adults in their twenties and thirties, discussing such topics as budgeting, taxes, stocks and bonds,

mortgages, and credit

2010 through 2017 Passenger cars, light-duty trucks. American business has recently been under fire, charged with inflated pricing and an inability to compete in the international marketplace. However, the evidence presented in this volume shows that the business community has been unfairly maligned—official measures of inflation and the standard of living have failed to account for progress in the quality of business equipment and consumer goods. Businesses have actually achieved higher productivity at lower prices, and new goods are lighter, faster, more energy efficient, and more reliable than their predecessors. Robert J. Gordon has written the first full-scale work to treat the extent of quality changes over the entire range of durable goods, from autos to aircraft, computers to compressors, from televisions to tractors. He combines and extends existing methods of measurement, drawing data from industry sources, Consumer Reports, and the venerable Sears catalog. Beyond his important finding that the American economy is more sound than officially recognized, Gordon provides a wealth of anecdotes tracing the postwar history of technological progress. Bolstering his argument that improved quality must be accurately measured, Gordon notes, for example, that today's mid-range personal computers outperform the multimillion-dollar mainframes of the

1970s. This remarkable book will be essential reading for economists and those in the business community.

The result of Thomas Cook's lifelong love of boats and his desire to help each one find the perfect home, this invaluable book guides readers through the selling process. An ideal choice for anyone who wants to sell his boat quickly, painlessly, and at a premium price.
