This book clarifies the direction of business innovation using new ICT such as the Internet of things (IoT), artificial intelligence (AI), smartphones, and cloud computing through a series of case studies on successful trials and advanced businesses in the Asia-Pacific where many industry sectors have been growing successfully in the 21st century. ICT has been playing an important role in value creation for customers and in profit generation for providers, contributing to various service innovation and business innovation. Now, digitalization using IoT and AI provides solutions to address various issues in the human society, which is transforming services and businesses in the 21st century. "What is the direction of the business innovation using new ICT?" is a highly concerned question for business researchers and practitioners. Aiming to answer the question, this book conducts a number of cases studies in the Asia-Pacific region, including the Mainland China, Taiwan, Japan, Malaysia, Vietnam, as well as Australia. Among the studies, there are 4 cases from ICT providers, 4 cases from traditional and services, and 6 cases from new ICT applications and businesses. Each case analyzes social needs and human desires, new value created, roles of new technologies, processes and difficulties in developing new businesses, the relationship among customers, providers, and stakeholders, value chain co-creation and optimization, factors of success, and business models. Finally, the direction of business innovation with new ICT in the Asia-Pacific is suggested by summarizing the findings from the case studies through the lens of the theoretical analysis in service science.

Recent developments in Information and Communication Technologies (ICT) have brought about changes that have revolutionalised traditional ways of conducting business. While these developments in cyberspace bear legal implications, legal regimes in some African countries such as Tanzania have not kept pace with the changes in order to properly regulate related activities happening under cyberspace. This volume attempts to bridge the gap between the Law and ICT developments in East Africa. It attempts to respond to questions such as: What is Cyber Law? How are Parties Identified under a Relationship in a Cyberspace Environment? How are Banking and other Cyber Payments Done? What about Combating Cyber Crime and Managing E-Commerce? What is the Impact of ICT on Intellectual Property Rights? And, how are Internet Domain Names Regulated? The volume is a useful handbook for those who want to understand the changing legal guidelines in relation to developments in ICT.
