Information Technology skill standards provide a common language for industry and education. It provides increased portability depending on attitude and performance of the professionals. The industry recognizes IT education programs that build competency among the students to perform the best in the new emerging trends in Information Technology. like Human Computer Interactions, Biometrics, Bioinformatics, Signal Processing. So this conference is organized to bring together leading academicians, industry experts and researchers in the area of emerging trends in Information Technology and facilitate personal interaction and discussions on various aspects of Information Technology. It also aims to provide a platform for the post-graduate students and research students to express their views about the emerging trends in Information Technology with interaction and exchange of ideas among the researchers and students from all over India. With this focus Technical/research papers are invited from the students of MCA/ M.Sc (CS) / M.Sc.(IT)/ MCM and research students on the following topics. * Biometrics * Data Communication and Security * Digital Image and Image Processing * Human Computer Interaction * Internet Technologies and Service Oriented Architecture * Artificial Intelligence and Its Applications

Now in its 147th edition, The Statesman's Yearbook continues to be the reference work of choice for accurate and reliable information on every country in

in topical sections in the three volumes. Part I: computer vision and pattern recognition; machine learning and applications; and image processing. Part II: healthcare and medical imaging; biometrics and applications. Part III: document image analysis; image analysis in agriculture; and data mining, information retrieval and applications.

'the most convenient and reliable starting point for information on public affairs' -

George J. Mitchell, US Senator. Each copy comes with FREE online access to www.statesmansyearbook.com. Site license upgrades are also available for libraries who wish to network the data. New this year: a chronology of the 'credit crunch.'

Now in its 148th edition, The Statesman's Yearbook continues to be the reference work of choice for accurate and reliable information on every country in the world. Covering political, economic, social and cultural aspects, the Yearbook is also available online for subscribing institutions: www.statesmansyearbook.com.

The Statesman's Yearbook, now in a new, enlarged format, contains profiles of every country in the world and includes 20% new content. All print purchases now receive online access at no extra cost, with a single-user licence giving access to the full text online, updated regularly and fully searchable. For queries - sybinfo@palgrave.com

This edition is fully updated and contains more information and analysis than ever before. A foldout colour section provides a political world map and flags for all 193 countries. Each copy comes with online access to the full text at no extra cost. Unlimited-user upgrades are also available for libraries who wish to network

the data.

The recent technologies for sustainable development and maintaining ecological integrity in the field of agriculture, forestry and environmental management for the green future. Describes the recent technologies and issues to generate awareness among the global scientific community towards sustainable development. Covers various eco-friendly approaches for successful management of soil, water, forest, agriculture, and other natural resources. Addresses the policy issues promoting conservation, protection and management of various natural resources. Presents the issues of climate change and sustainable strategies to combat such a mega event. The existence of life on the earth primarily depends upon the agriculture, forest and environment. The changing climate is imposing the multifaceted challenges in front of human civilization. The agroecosystem management practices and technologies leads to higher productivity with destruction of agricultural, forest and environmental habitat leading to soil-water-air pollution. Food and Agriculture Organization (FAO) plays a key role in the promoting research and developmental activities in various sectors to achieve the sustainable development goals under 2030 agenda. Gradual growth of science and technology has imposed a significant pressure on the different ecosystem. In this context, approaches such as

sustainable agriculture, forestry and eco-friendly technologies need to be address across the world. Keeping view of these facts this book underlines scientific chapters dealing with the issues with proper explanation, and accompanied by illustrative diagrams, tables, database as required. The editors have tried to provide a brief scenario about the current issues related to the agriculture, forestry and environment. Therefore, the book would be a very useful resource for academicians, scientists, and policy makers of the related field.
