Negotiations toward a North American Free Trade Area (NAFTA) began in June 1991. This book assesses both the substances and the form of a prospective NAFTA. Part One examines the objectives of the United States, Mexico, and Canada in the NAFTA negotiations; the potential shape and contents of the agreement (including dispute-settlement and institutional issues); its possible extension to third countries; and its implications for multilateral trade negotiations and the GATT. Part Two examines the broad economic implications of a NAFTA for trade, investment, and employment; labor and environmental concerns that arise because of Mexico's lower level of economic development; and the cross-sectional issues of rules of origin and intellectual property. Part Three analyzes how the energy, auto, steel, textile, agricultural, and financial services sectors of the Mexican economy could be affected by a NAFTA, and the implications for U.S. and Canadian industries. Part Four summarizes the major conclusions and policy recommendations.

SIGNIFICANT CHANGES TO THE INTERNATIONAL RESIDENTIAL CODE, 2018 Edition, provides a comprehensive analysis of notable changes since the 2015 IRC--including the origins, implications, and real-world applications of those changes--within a single, easy-to-use resource. The text covers changes made to building, energy, mechanical, fuel gas, plumbing, and electrical provisions of the IRC. Each analysis presents the affected code sections and identifies changes with strikethroughs and underlines to highlight modifications to the existing language. In addition, a brief summary, detailed illustrations, and thoughtful discussion of the changes' significance help readers interpret the code's technical jargon and understand its practical applications to real-world scenarios. Close attention to detail, logical organization, and thorough, yet concise coverage makes this text an ideal resource for students and professionals transitioning from the 2015 IRC. Designed for technicians new to the field of preventive maintenance for trucks and trailers, this valuable resource offers readers a clear, solid understanding of the otherwise complex equipment involved in truck servicing. MDT: Preventive Maintenance and Inspection provides the knowledge needed to identify potential problems during regular service, before they turn into major repair issues or a roadside breakdown. The book breaks down need-to-know content areas into chapters that make sense: from general shop safety and hand tools to truck/trailer reefer service and coupling systems and everything in between. Each chapter includes procedures for inspecting and maintaining that specific area. Using a generic preventive maintenance checklist as a guideline throughout, this go-to guide has everything the beginning technician needs to perform effective servicing. In the wake of the North American Free Trade Agreement and the terrorist attacks of September 11, 2001, renowned public intellectual and scholar Stephen Clarkson asks whether North America "exists" in the sense that the European Union has made Europe exist. Clarkson's rigorous study of the many political and economic relationships that link Canada, the United States, and Mexico answers this unusual question by looking at the institutions created by NAFTA, a broad selection of economic sectors, and the security policies put in place by the three neighbouring countries following 9/11. This detailed, meticulously researched, and up-to-date treatment of North America's transborder governance allows the reader to see to what extent the United States' dominance in the continent has been enhanced or mitigated by trilateral connections with its two continental partners. An illuminating product of seven years' political-economy, international-relations, and policy research, Does North America Exist? is an ambitious and path-breaking study that will be essential reading for those wanting to understand whether the continent containing the world's most powerful nation is holding its own as a global region.

Invaluable information on key issues for Canadians -- energy, water, security and surveillance, military integration, social services Living With Uncle examines the new realities of Canada's relations with the US in a world of a Conservative government in Ottawa, a trade agreement that often proves ineffective, and the post 9/11 American preoccupation with security and military dominance. In this book a new generation of analysts offers fresh insights into the challenges to Canada's independence, identity and democracy. Contributors include Diana Gibson and Dave Thompson, former BC Hydro Board member Marjorie Cohen, human rights analyst Maureen Webb, University of Toronto law professor Kent Roach, Michael Byers of the University of British Columbia, Lloyd Axworthy, Maude Barlow, Ed Broadbent, Mel Hurtig, and Avi Lewis. Canadians concerned about the future of their country will find Living With Uncle a source of understanding, analysis, hope and inspiration.
