In Europe, love has been given a prominent place in European self-representations from the Enlightenment onwards. The category of love, stemming from private and personal spheres, was given a public function and used to distinguish European civilisation from others. Contributors to this volume trace historical links and analyse specific connections between the two discourses on love and Europe over the course of the twentieth century, exploring the distinctions made between the public and private, the political and personal. In doing so, this volume develops an innovative historiography that includes such resources as autobiographies, love letters, and cinematic representations, and takes issue with the exclusivity of Eurocentrism. Its contributors put forth hypotheses about the historical pre-eminence of emotions and consider this history as a basis for a non-Eurocentric understanding of new possible European identities.

When chaos erupts in the small coastal town of Hawthorne, Massachusetts, former vampire-turned-mage Peter Octavian and earthwitch Keomany Shaw arrive to investigate. But without the Vatican sorcerers, the magical barriers they spent centuries constructing to keep the forces of darkness out of our world are beginning to fail, and things are slipping through. Now an ancient god of chaos is awakening in Hawthorne, its influence spreading...and it's Octavian's fault. If he can't stop it, the blood of all human kind will be on his hands.

Author Richard A. Schaefer is a lifelong communicator, fascinated by stories and, like any good journalist, digs for the facts and verifies sources, exploring nagging questions such as "Is creation or evolution more credible, based on science and expert opinions?" This book truly represents a personal passion of looking at all sides of the CREATION vs. EVOLUTION issue. He has called on many experts and theorists—including Charles Darwin himself. Surprisingly, Darwin was far more skeptical of his own theories than are many PhDs today, and admitted to significant holes in his logic. Read for yourself, as great thinkers explore the pros and cons of both theories and their variants.
