Reflective practice enables nursing students to make sense of, and learn from, the experiences they have each day and if nurtured properly can provide skills that they will come to rely on throughout their nursing careers. Using clear language and insightful examples, scenarios and case studies, the new fourth edition of this bestselling book shows readers what reflection is, why it is so important and how they can use it to improve their nursing practice. Key features include: All chapters linked to the new 2018 NMC standards of proficiency for registered nurses Updated learning features such as activities and case studies to help students apply the theory to practice.

‘A remarkable reframing of action research that engages the spirit as well as the mind, in inquiry that matters, shared among inquirers who matter. "Validity" as we once knew it will never be the same after these improvements. Wonderfully provocative!’ - Karl Weick, University of Michigan ‘This is truly a significant work. Not only has action research reached maturity, but in the context of the postmodern constructionist debates its scope has been dramatically expanded, its conceptual underpinnings deepened, and its forms of practice enormously enriched. The present confluence of humanism and pragmatism has inspired lively conversations between us; the work has the potential to transform the very idea of social

"This is an excellent resource, highly recommended for new and seasoned educators at every level." --Nursing Education Perspectives Health information technology is now the top priority for improving nursing and health care by informing clinical care, interconnecting clinicians, personalizing care, and improving population health at large. This book presents a broad range of cutting-edge teaching technologies and a detailed overview of teaching and learning pedagogical concepts that are relevant across a variety of teaching environments. Helpful to both new and seasoned educators, these "must-know" strategies allow faculty to keep pace with the rapidly changing digital world. The book helps to guide faculty in making thoughtful, informed decisions on how and where to integrate technology into learning environments. A major feature of this book is the Integrated Learning Triangle for Teaching with Technologies, a faculty tool to help determine if and how specific technologies can promote student learning. Other important chapter pedagogy includes best teaching practices, teaching and learning self-assessment tools, useful tips for faculty such as "making teaching easier," and reflective questions and activities for the reader. Key Topics: Using cutting-edge technologies as tools for "active learning," such as automated response systems, clickers, podcasts, blogs, wikis, web-based modules, and more Expanding faculty and student technology skills and information literacy-a critical competency in all nursing programs Using the Internet and digital videos to help bridge the classroom with the clinical setting Reflecting on how technology impacts current communication systems Incorporating simulation into students' clinical learning experiences Promoting self-directed, lifelong learning through health information technology

This book is a clear and practical guide to help students develop critical thinking, writing and reflection skills. It explains what critical thinking is and how students should use it throughout their nursing programme. This new edition also provides an innovative new

framework that helps students appreciate different levels of critical thinking and reflection to help nursing students appreciate the requirements of degree level study. The book demonstrates the transferable nature of critical thinking and reflection from academic contexts to the real practice of nursing. Key features Clear and straightforward introduction to critical thinking directly written for nursing students, with chapters relating the subject to specific study and practice contexts Student examples and scenarios throughout, including running case studies from four nursing students and further annotated examples of student's work on the website Each chapter is linked to the new NMC Standards and Essential Skills Clusters

Fully updated with important new theory and practical material, this second edition of Learning Journals offers guidance on keeping and using journals and gives step-by-step advice on integrating journal writing on taught courses, in training and professional development and in supporting personal development planning (PDP) activities. Key topics covered include: the nature of learning journals and how we learn from them the broad range of uses of learning journals, including portfolios and personal and professional development the depth and quality of reflection in learning journals the assessment of learning journals and reflective writing the use of narrative and story-telling techniques in journals. With useful exercises and activities that enhance learning journal work in a structured manner, Learning Journals is invaluable reading for teachers and students in higher education, for all professionals, particularly those working in the health services and business and training and for all those who want to learn more about keeping a fulfilling personal journal.

Critical reflection helps professionals to learn directly from their practice experience, so that they can improve their own work in an ongoing and flexible way – something essential in today's complex and changing organisations. It allows change to be managed in a way which enables individuals to preserve a sense of what is fundamentally important to them as professionals. It is particularly important as it can also help make sense of some fundamental issues, and so also has implications for how we live our lives. However, more systematic research on critical reflection is needed to help us understand what works best for professionals in different settings. This timely work explores how critical reflection is researched, evaluated and used as a research method itself, with the aim of improving how it is taught and practised in a rigorous and transferable way. Developing a more comprehensive and multi-disciplinary view of the current state of critical reflection and the research directions which need to be taken, the book is divided into four parts. It: - Provides an overview of different perspectives on critical reflection and stimulates dialogue between them - Establishes some common platforms from which to develop further research directions - Identifies the major issues in evaluating critical reflection teaching, and main methods for doing so - Contributes to social science methodological innovations by exploring how methods based on critical reflection can be used for researching professional practice - Contains contributions from academics who are internationally known and highly experienced in different aspects of critical reflection. Researching Critical Reflection is an important reference for all students, practitioners, and researchers – including in the areas of education, management, health and social work – who engage with critical reflection to develop their practice.

This book is an easy to read, practical guide that will show you what reflection is and

how you can do it successfully. Assuming no prior knowledge, it introduces you to ten essential ingredients to becoming an effective reflective practitioner. Chapters will equip you with evidence-based understanding and ideas for application to your own situation, and support you to become an emotionally resilient, self-aware individual who can reflect and improve on your practice. In clear and supportive language, Nicola Clarke will guide you on your journey to developing the crucial reflection skills you need for your career as a nurse. The book includes:

- A step by step exploration of what reflection involves
- Ways to develop the skills you will need to do your own reflection
- A 'how-to' approach to using reflective models
- Practical and jargon-free guidance on how to reflect
- A chapter on reflective writing
- Chapters about qualities you will need in your reflection, such as being person-centred and empathetic

The Student Nurse's Guide to Successful Reflection is a must-have text for all nursing students as well as useful reading for those involved in supporting them. With a Foreword by Theo Stickley, Associate Professor, University of Nottingham, UK. "Reflection is a 'way of being' encompassing many ingredients. Clarke, with great thoroughness and care, introduces these, constructively supporting students towards developing self-insight and understanding of others. Her advice, explanations, illustrations and exercises are lucid and paced, helping nurses towards sufficient strength to undertake the developmental change which effective reflective practice brings. And to become practitioners who are far more than competent: nurses who are calmly self-aware, receptive and perceptive." Gillie Bolton, PhD, former Senior Research Fellow, Medicine and the Arts, King's College London, UK "Reflection is a much discussed topic in nursing, but some students find it difficult to reflect on their own practice. Nicola Clarke's ten essential ingredients provide a clear and explicit guide to effective reflective practice and as such this should be a key text for all student nurses. The chapters of this new text offer clear learning outcomes, practical advice and models to follow in order to develop a genuine, honest and balanced reflective writing style. It is an engaging and informative read which promotes understanding of this important process." Anita Savage Grainge, RMN, RGN, RNT, Senior Lecturer, University of York, UK "An engaging book, which deals with the complexity of reflection in a clear, logical and in-depth manner. Developed around her extended definition of reflective practice, Clarke clearly and logically enables the reader to build their understanding of reflective practice by focusing on her ten ingredients. The structure of the book, focusing on two ingredients in each chapter, allows Clarke to provide clarity whilst at the same time showing the reader how the ingredients fit together to build a whole that is greater than the sum of its parts. The focus on critical and analytic skills as well as person-centredness based on Rogers' core conditions provides a strong theoretical basis for students to understand reflective practice. The use of questions and examples throughout are engaging and will be useful for students and tutors alike. I think this book will be excellent for all healthcare workers – students and qualified alike. Whilst it is aimed at nurses, the principles apply across healthcare. I think it is a real gem and certainly the best book I have read about reflective practice." Dr Rosie Stenhouse, Nursing Studies, University of Edinburgh, UK "Readers, I anticipate, will find this book informative, challenging and rewarding. It will, however, require focus and concentration to absorb and digest the considerable information the author has gleaned over many years. The book draws on extensive reading, research, teaching and observation of how individuals grow and develop as a

result of adopting reflection into their daily lives. Warming to the style and content of the book, I was relieved to find that, unlike some others that approach the same topic, it does not purport to convey the essence and benefits of reflection by utilising inaccessible language, relying on unintelligible descriptions and conflating disparate models to a point where students are left bewildered and at a loss to know how to start their reflective practice. Much of the appeal of this book is that it is clearly written, logically presented and readily accessible, avoiding the jargon that sometimes characterises narratives about reflection. The reader will be impressed by the thoughtful layout which is designed to show that the acquisition of knowledge is not reducible to a set of simple tasks. It is the result of being able to manage the process of deepening one's understanding of reflection, internalising its values and cognitive practices and applying its behavioural components to the various forms of engagement that nurses enter into in the course of their work. Acquiring self-knowledge is not a one-off activity, but a life-long incremental process. Three voices permeate the text – that of students, theorists and the author - each providing different perspectives which are skilfully integrated. The text could be used by students working alone or in groups, or it could provide thematic material running across several modules. While informative, it is not prescriptive. Students are encouraged to undertake exercises which are designed to deepen their understanding of and internalise what they have learned whilst constantly analysing what reflection means to them and how they elect to put it into practice. I was especially pleased to see the importance of emotions in the learning process recognised and how Socratic learning methods can become part of the behavioural repertoire of the student. A subtext in the book relates to inclining students to assume responsibility for their own learning which requires them to realise what it is that has to be achieved and recognise when it has been attained. I was impressed by this book and the conversational tone of the narrative. It recognises that the learning mind is vulnerable and that inducting students into exploring what it is to be human is one of the highest forms of care. I imagine that important reasons for writing this book at this time are the ever-expanding content of curricula, the excessive demands on lecturing staff, and the relentless pressure in clinical settings which mean that many staff do not have the time to stand back, take stock and review where they have got to. I believe Nicola Clarke has made a significant contribution to nursing literature in highlighting an aspect of learning that can only become more important as further changes take place in health care provision. This text would be high on my reading list were I to start my nurse training over again.” Peter Nolan, Professor of Mental Health Nursing (Emeritus) “Reflection is often a misunderstood concept for nursing staff. This book demystifies what is essentially a complex subject and makes it accessible in an easy to read format. Nicola Clarke's passion for reflection shines throughout this book. As you progress there are a number of exercises and action points which allow you to experience the reflection process in your own learning. This is supplemented with case studies which bring the learning to life. Each chapter also benefits from a succinct end of chapter summary to reinforce your understanding. I would like to commend the author as this is a well-timed addition to the body of knowledge for mental health nursing students and is relevant now as it will be in the future. I would recommend this book to all nurses and I will be referring my students to this book as an essential text on their journey to discover their reflective voice.” Manyara N Mushore, Course Director,

Educational developers play a central role in supporting faculty members and informing their ongoing professional development programming through the scholarship of teaching and learning (SoTL). SoTL presents an opportunity for faculty professional development that is action-oriented, evidence-based, and engaging for faculty members at any stage in their academic career. Evidence-Based Faculty Development Through the Scholarship of Teaching and Learning (SoTL) is a critical scholarly publication that examines SoTL research as a method of professional development for educational developers and higher education faculty members. Highlighting topics such as professional development, research ethics, and faculty engagement, this book is ideal for deans, professors, department chairs, academicians, administrators, educational developers, curriculum designers, researchers, and students.

A beginner's guide to reflective practice that guides the reader through how to write reflectively throughout their career in nursing, from the first reflective exercise at university to carrying out reflective practice on placement or as a professional nurse.

"Each chapter's activities are hands-on and should make the book a useful and enjoyable experience. It will appeal to students and teachers as a one-stop shop for portfolio advice and support." Nursing Standard "This text is much needed. Clearly written and engaging, this has the potential to become a gold standard portfolio text." Roger Watson, Editor of Journal of Clinical Nursing and Professor of Nursing, School of Nursing and Midwifery, The University of Sheffield "Having read this book, I feel that it is not only useful for nursing students, but could be useful for qualified nurses who are working on their continuing professional development folder... As students progress through their course, how they manage their time, their attitude to learning and the goals they set for themselves may change. It is fitting therefore that the first chapter looks at learning in the context of portfolios and includes a time management, desire for learning and self control questionnaire - which although gives no definition to how the student manages their time, could prove to be an interesting activity particularly if completed at the start of a year and then at the completion of the year." Joanne Starkes, Nursing Student "Fiona Timmins has made the topic of nursing portfolios easy to understand with simple terms and many helpful activities throughout while still being easy to read. While covering everything from the purpose of portfolios, content and structure to portfolios in operation this is a book that will greatly help anyone trying to produce a portfolio whether just starting or nearing the end of one...I will definitely be

referring to this book throughout my 3 years as a student nurse making my portfolio and would recommend others to do so as well." Laura Franklin, Nursing Student "Fiona Timmins has written a book which is not just useful for student nurses but it also makes the topic easier to understand. Throughout the text there are many activities for the reader to partake in. It covers key topics such as "portfolio content" and "portfolio structure". As a 2nd year nursing student I believe that this text is a valuable asset to any nursing student's bookshelf as it is clear, concise and makes what can be a very confusing subject appear much easier." Vicky Bain, Nursing Student "Fiona Timmins has produced a book that is not only simple and easy to read but provides activities that enable the reader to think deeper about the information they include within their portfolio. Remember points dotted through each chapter provide quick and easy hints and tips to look back on while completing a portfolio ... This is one book, which I wish I had the chance to read in my first year, but it will be a handy companion while I complete my portfolio. I will recommend this book to my fellow classmates and also students in the years below, as they will defiantly benefit from this book." Leanne Haigh, Nursing Student This accessible book provides a guide to the context of portfolio development and its importance not just to assessment but to the patient experience. All students undertaking pre-registration nursing qualifications are required to complete a portfolio as part of their formal assessment, in order to bridge the gap between theory and practice and to provide evidence of achievements in practice. Fiona Timmins offers a handy guide to approaching, putting together and developing an effective portfolio, helping you answer questions like: What should be in my portfolio? How should I present it? How will my portfolio be assessed? Reflection points and portfolio examples make the book easy to use. Key topics covered include: Learning in the context of the portfolio The purpose of portfolios Reflection and reflective practice Competence in nursing Portfolio content Portfolio structure The portfolio in operation Making Sense of Portfolios is essential reading for all pre- and post-registration nursing students looking for a clear and accessible guide to creating and developing a portfolio.

Clear and straightforward introduction to critical thinking written specifically for nursing students, with chapters relating the subject to specific study and practice contexts. Includes student examples and scenarios throughout, including running case studies from nursing students.

Reflection enables us to make sense of, and learn from, experiences that can seem uncertain, chaotic or even mundane. It is a core skill that student nurses must grasp to develop professionally, and is a requirement of the professional standards. This book introduces student nurses to reflection in a clear and practical manner. It shows different ways of using reflection to learn and develop as a practitioner, including exploring personal experiences. It gives practical tips on using reflection throughout the pre-registration programme and empowers the student nurse to take ownership of their own learning by developing this important skill.

Combining a theoretical approach with practical activities, this book is invaluable for nursing and midwifery students and will help them to master the basics of writing at university. It equips students with the skills needed to examine cognitive processes such as reflection and critical thinking and includes essential information on referencing correctly and avoiding plagiarism. Going beyond the traditional essay, it provides support and guidance on producing care critiques, action plans, portfolios and journal

Accident and Emergency Nursing Gaining self-awareness is a vital aspect of professional development for all who work in the caring professions. In nursing especially, the ability to evaluate oneself affects all areas of practice, including direct patient care, working relationships with colleagues and maintaining one's own well-being in the often pressured environment of health care. This is an innovative text which explores the ways in which self-awareness can be used as a practical tool for continuing professional development and practice improvement. Divided into three parts, the book examines the role of the nurse as therapeutic practitioner, reflective learner and reflexive researcher. For all those wishing to develop their skills as autonomous, reflective, accountable practitioners, this book will be an inspiring read. It will be of immense use to those who teach and supervise nurses at all levels.

This book is written by the authors of the acclaimed "Introduction to Rubrics". It has sold over 3,000 in 12 months. There is a major growth of interest in keeping journals or diaries for personal reflection and growth; and as a teaching tool. It will appeal to college faculty, administrators and teachers. One of the most powerful ways to learn, reflect and make sense of our lives is through journal keeping. This book presents the potential uses and benefits of journals for personal and professional development - particularly for those in academic life; and demonstrates journals' potential to foster college students' learning, fluency and voice, and creative thinking. In professional life, a journal helps to organize, prioritize and address the many expectations of a faculty member's or administrator's roles. Journals are effective for developing time management skills, building problem-solving skills, fostering insight, and decreasing stress. Both writing and rereading journal entries allow the journal keeper to document thinking; to track changes and review observations; and to examine assumptions and so gain fresh perspectives and insights over past events. The authors present the background to help readers make an informed decision about the value of journals and to determine whether journals will fit appropriately with their teaching objectives or help manage their personal and professional lives. They offer insights and advice on selecting the format or formats and techniques most appropriate for the reader's purposes.

The ability to reflect on practice is a fundamental component of effective medical practice. In a sector increasingly focused on professionalism and patient-centred care, *Developing Reflective Practice* is a timely publication providing practical guidance on how to acquire the reflective skills necessary to become a successful clinician. This new title draws from a wide range of theoretical and practical multidisciplinary perspectives to assist students, practitioners and educators in embedding reflection in everyday activities. It also offers structures and ideas for more purposeful and meaningful formal reflections and professional development. *Developing Reflective Practice: Focuses on the developing practitioner and their lifelong learning and the development of professional identity through reflection Provides practical how-to information for students, practitioners and educators, including realistic case examples and practice-based hints and tips Examines and explains the theoretical and conceptual approaches to reflective practice, including its models and frameworks.* With the growing interest in problem-based learning among nurse educators worldwide comes the need for a book that will be a comprehensive guide and resource for anyone considering its implementation in nursing education. This book is that resource. Its strength is its integration of relevant theory, research, and practical information. It is an invaluable resource for nursing faculty contemplating the use of the problem-based learning model.

Nursing care professionals are an essential part of the medical profession, known for their care and the assistance that they offer to patients. However, nurses must also tackle the challenges of the modern workplace, including the utilization of new technologies, gender inequity, negative workplace environments including navigating exclusionary behaviors such as incivility and bullying and relieving stress and burnout. As such, it is crucial for nurses, nurse managers, and other medical professionals to remain up to date with the latest education and training techniques and discussions surrounding the significant challenges that nurses face. *The Research Anthology on Nursing Education and Overcoming Challenges in the Workplace* is a comprehensive reference book that compiles numerous chapters on the latest training and educational strategies for nurses and discusses challenges facing this branch of the medical field. The anthology presents challenges common within the medical field and techniques used to solve or prevent them as well as nurse perspectives on new medical technologies and their perceived use and performance. Covering topics such as e-training, ethics, patient safety, burnout, incivility, and more, this text provides essential information for nurses, teachers, care professionals, hospital staff, managers, practitioners, medical professionals, nursing home and care facilities, academicians, researchers, and students.

This textbook on assessment and outcome measurement is written for both occupational therapy and physiotherapy students and qualified therapists. It begins by defining what is meant by assessment, outcome, evaluation and measurement and discussing the complexity of therapy assessment and measurement, including the challenge of measuring human behaviour and the impact of factors such as task demand and context, including the environment. Methods of data collection (e.g. observation, interview, standardised testing) and sources (e.g. self-report, proxy) for collecting information about clients are then reviewed, and the main purposes of assessment (e.g. descriptive, evaluative, predictive, discriminative) presented. The

book then addresses the topics of standardisation, levels of measurement, reliability, validity and clinical utility. There is a chapter describing and applying models for categorizing levels of function to aid assessment and measurement. The concept of clinical reasoning and reflective practice is then explored. Application of principles is supported through detailed case studies and worksheets and the criteria for test critique and guidelines for choosing a particular assessment approach are discussed.

Would you like to develop some strategies to manage knowledge deficits, near misses and mistakes in practice? Are you looking to improve your reflective writing for your portfolio, essays or assignments? Reflective practice enables us to make sense of, and learn from, the experiences we have each day and if nurtured properly can provide skills that will you come to rely on throughout your nursing career. Using clear language and insightful examples, scenarios and case studies the third edition of this popular and bestselling book shows you what reflection is, why it is so important and how you can use it to improve your nursing practice. Key features:

- Clear and straightforward introduction to reflection directly written for nursing students and new nurses
- Full of activities designed to build confidence when using reflective practice
- Each chapter is linked to relevant NMC Standards and Essential Skills Clusters

The fourth edition of this highly acclaimed text continues to provide a comprehensive framework for planning, guiding, and evaluating learning activities for graduate and undergraduate nursing students in numerous clinical settings. A respected resource for clinical faculty, it addresses the distinct requirements of clinical learning as opposed to classroom learning and provides proven strategies to maximize clinical education. The revision features expanded content on teaching graduate students, regulatory issues affecting distance education, and the use of social media. It covers establishing and using dedicated education units (DEUs), the challenges of student access to electronic health records and documentation of care, and reducing the demands of clinical staff members when multiple students rotate through a particular setting.

A vital member of the health care team, the contemporary enrolled nurse faces increasing challenges and an increasing level of responsibility. Written specifically for Australian and New Zealand enrolled nurse students, this long awaited new edition reflects the changes and challenges in contemporary enrolled nurse practice as well as the additions and modifications that are occurring in nursing curricula. Taberner's Nursing Care: Theory and Practice 5th edition has been written, reviewed and edited by the people who educate the enrolled nurse and continues to provide enrolled nurse students with the most comprehensive resource available. This book brings together a number of texts to illustrate, explore and challenge some of the ideas and assumptions which underpin notions of lifelong learning. It argues that the 'learning' aspect of lifelong learning has received surprisingly little attention in discussions of how to promote more effective and inclusive approaches. In examining this issue more closely it will appeal to those who are involved in supporting learners in the workplace, the classroom or community. It will also appeal to postgraduate and doctorate level students with an interest in post-school education and training.

The Student Nurse Guide believes in inspiring future nurses through a different approach in training. We believe doing a degree in nursing doesn't have to be unnecessarily hard/stressful/exhausting or financially ruin you! We believe anyone can be a nurse no matter what challenges you have to overcome. Reflective practice is one of the very first things you will learn about when you start uni & it is incredibly boring! At first it seems a very daunting & complex process with theories and models and something you have to get right if you want to qualify - no pressure! You also may have to write one of your first assignments about reflection and include something from practice to reflect on. Just deciding what to reflect on can seem to

take forever, let alone writing the actual reflective account. Why writing reflective accounts are important: *It helps you to remember key learning experiences. *You have recorded examples to draw on when writing assignments. *It helps develop your self-awareness. *Showcases your development journey & achievements. *Builds your critical analysis & problem solving skills. *Helps you to develop your reflection in action vs reflection on action. *It's part of the NMC code to be a reflective practitioner through continuous reflection. If you haven't already started keeping a reflective journal you will need to soon. Most universities recommend students start one at the beginning of their degree, to help them develop their reflection skills, and as a way of keeping all their reflective accounts in one place. The Student Nurse Guide Reflective Journal was designed specifically for nursing students. It includes an example of a student nurses reflective account to draw from if you get stuck. Each page includes space to record the date, location, key learning point to help you quickly recall & find the subject, & read around to help develop your knowledge of key nursing skills as a result of your reflection. A reflective writing outline is also included on every reflective account page to help guide your writing and keep you on track. Featuring a modern contemporary design in A5 size, it is easy to keep at hand ready to record any learning opportunity as it happens, with approx 180 lined pages. The one thing to remember when reflecting is there is no right or wrong way of doing it. The aim is not be perfect, but to just record an event or experience which you feel contributed to your learning in some way. Remember this can be both positive and negative; you don't have to be too critical of yourself. Once you have at least described what happened, you can always come back and reflect on it at a later time. Always be honest with yourself when reflecting even if it makes you feel uncomfortable at times. Writing reflective accounts is a skill you will develop the more you practice it. Once you have learnt about the different theories and modules on reflection, you will find a style you prefer and apply it to guide your own reflective account writing.

Reflective journals have been used by post-secondary educators in a wide variety of teacher-training courses to encourage students to better understand the topics that they are studying. Reflective journals are often used in courses in which pre-service and in-service teachers are studying both the theoretical and practical aspects of the subject matter such as secondary teaching methods, language and literacy, teacher education, and outdoor education. While there are books on the market that address some facets of reflective journaling, there are no integrative books such as *Reflective Journaling: Unlocking the Power and the Potential* that are targeted specifically to pre-service and in-service teachers. There are few resources currently available to teachers wishing to use reflective journals that include: the theoretical underpinnings of reflection, the integration and impacts of research on the praxis of journaling in each chapter, and practical strategies for successful, fun journal writing for students. This book addresses this need by providing "full coverage" of using reflective journals as a pedagogical tool. *Reflective Journaling: Unlocking the Power and the Potential* includes four figures, 15 tables, 25 works of art, four cartoons, and 10 photos that enhance each chapter. This Open University Reader examines the practices of learning and teaching which have been developed to support lifelong learning, and the understanding and assumptions which underpin them. The selection of texts trace the widening scope of academic understanding of learning and teaching, and considers the implications for those who develop programmes of learning. It examines in great depth those theories which have had the greatest impact in the field, theories of reflection and learning from experience and theories of situated learning. The implications of these theories are examined in relation to themes which run across the reader, namely, workplace learning, literacies, and the possibilities offered by information and communication technologies. The particular focus of this Reader is on the psychological or cognitive phenomena that happen in the minds of individual learners. The readings have been selected to represent a range of experience in different sectors of education from around the
