The COWFISH model, developed and applied in selected Montana streams, was tested on 14 streams in Idaho, Nevada, and Utah, where it proved to have little value for predicting numbers of trout in watersheds grazed by livestock. The model holds promise for estimating the health of stream channels and riparian complexes.

Historians of rhetoric have long worked to recover women's education in reading and writing, but have only recently begun to explore women's speaking practices, from the parlor to the platform to the varied types of institutions where women learned elocutionary and oratorical skills in preparation for professional and public life. This book fills an important gap in the history of rhetoric and suggests new paths for the way histories may be told in the future, tracing the shifting arc of women's oratorical training as it develops from forms of eighteenth-century rhetoric into institutional and extrainstitutional settings at the end of the nineteenth century and diverges into several distinct streams of community-embodied theory and practice in the twentieth. Treating key rhetors, genres, settings, and movements from the early republic to the present, these essays collectively challenge and complicate many previous claims made about the stability and development of gendered public and private spheres, the decline of oratorical culture and the limits of women's oratorical forms such as elocution and parlor rhetorics, and women's responses to rhetorical constraints on their public speaking. Enriching our understanding of women's oratorical education and practice, this cutting-edge work makes an important contribution to scholarship in rhetoric and communication.

This Proceedings Book collects the conference articles and abstracts presented at RICTA 2014, the 2nd Iberian Meeting on Aerosol Science and Technology (also named Reunión Ibérica de Ciencia y Tecnología de los Aerosoles), held during July 7-9, 2014, in Tarragona, Spain. RICTA 2014 is the second Portuguese-Spanish meeting on Aerosol Science and Technology. Like the previous RICTA congress held in 2013 in Évora, Portugal, RICTA 2014 is the continuation of the successful RECTA, Reunión Española de Ciencia y Tecnología de Aerosoles, conferences, which have been held in Spain since 2007. RICTA 2014 has been organized by the Droplets, interfaces, and flows (DEW) Research Laboratory of the Universitat Rovira i Virgili, with the collaboration of the Asociación Española de Ciencia y Tecnología de los Aerosoles (AECyTA). The congress was held at the Campus Catalunya of the Universitat Rovira i Virgili. As in previous editions of RICTA and RECTA, the participation of young researchers has been encouraged, with the organization of the 5th Summer School on Aerosol Science and Technology, as well as awards for the best poster and PhD thesis. This book comprises three parts: the Conference Program, the Conference Articles, and the Conference Abstracts.

Terra Incognita is the most comprehensive bibliography of sources related to the Great Smoky Mountains ever created. Compiled and edited by three librarians, this authoritative and meticulously researched work is an indispensable reference for scholars and students studying any aspect of the region's past. Starting with the de Soto map of 1544, the earliest document that purports to describe anything about the Great Smoky Mountains, and continuing through 1934 with the establishment of the Great Smoky Mountains National Park—today the most visited national park in the United States—this volume catalogs books, periodical and journal articles, selected newspaper reports, government publications, dissertations, and theses published during that period. This bibliography treats the Great Smoky Mountain Region in western North Carolina and east Tennessee systematically and extensively in its full historic and social context. Prefatory material includes a timeline of the Great Smoky Mountains and a list of suggested readings on the era covered. The book is divided into thirteen thematic chapters, each featuring an introductory essay that discusses the nature and value of the materials in that section. Following each overview is an annotated bibliography that includes full citation information and a bibliographic description of each entry. Chapters cover the history of the area; the Cherokee in the Great Smoky Mountains; the national forest movement and the formation of the national park; life in the locality; Horace Kephart, perhaps the most important chronicler to document the mountains and their inhabitants; natural resources; early travel; music; literature; early exploration and science; maps; and recreation and tourism. Sure to become a standard resource on this rich and vital region, Terra Incognita is an essential acquisition for all academic and public libraries and a boundless resource for researchers and students of the region.
