This book includes Study Material & Previous Years Papers (Solved) for the purpose of practice of questions based on the latest pattern of the examination. Detailed Explanatory Answers have also been provided for the selected questions for Better Understanding of the Candidates.

Lon O. Nordeen has completely updated his 1985 chronicle of military aviation's evolving role in warfare, now covering the major conflicts of the past four decades. He presents the historical and political background of each conflict and includes in-depth discussions of the aircraft, weapons, tactics, training, new systems, and other factors that influenced the outcome of each war. New and existing chapters have been enhanced with information based on recently declassified material--especially regarding Vietnam--and new sources in Egypt, Israel, and the former Soviet Union. As "smart" bombs have become more successful in reducing the risks for pilots and frontline troops, air-missile warfare has become the central player in military conflicts. "Air Warfare in the Missile Age, Second Edition, " is a valuable resource for understanding the evolution of modern air warfare. "From the Trade Paperback edition."

The thoroughly updated 4th edition of the book IAS Prelims General Studies Paper 1 - 101 Speed Tests with 5 Practice Sets consists of latest questions in all the sections. India and Pakistan, nuclear neighbors and rivals, fought the last of three major wars in 1971. Far from peaceful, however, the period since then has been "one long crisis, punctuated by periods of peace." The long-disputed Kashmir issue continues to be both a cause and consequence of India-Pakistan hostility. *Four Crises and a Peace Process* focuses on four contained conflicts on the subcontinent: the Brasstacks Crisis of 1986–1987, the Compound Crisis of 1990, the Kargil Conflict of 1999, and the Border Confrontation of 2001–2002. Authors P.R. Chari, Pervaiz Iqbal Cheema, and Brookings senior fellow Stephen P. Cohen explain the underlying causes of these crises, their consequences, the lessons that can be learned, and the American role in each. The four crises are notable because any one of them could have escalated to a large-scale conflict, or even all-out war, and three took place after India and Pakistan had gone nuclear. Looking for larger trends of peace and conflict in the region, the authors consider these incidents as cases of attempted conflict resolution, as instances of limited war by nuclear-armed nations, and as examples of intervention and engagement by the United States and China. They analyze the reactions of Indian, Pakistani, and international media and assess the two countries' decision-making processes. *Four Crises and a Peace Process* explains how these crises have affected regional and international policy and evaluates the prospects for lasting peace in South Asia.

3. Latest CBSE Sample Paper along with detailed answers are provided for better understanding of subject.

TOC One Day Revision, The Qualifiers, Latest CBSE Sample Paper, Sample Paper (1- 10).

Musharraf Husain Khan, born in 1931 in what was then part of East Pakistan, embarked on a naval career which eventually led to his promotion to Admiral. He became a leading figure in the government of the new country of Bangladesh, and as Chief of the Naval Staff in the 1970s he even served briefly as Acting President. He lived through the upheavals of the Bangladesh Liberation War and was close to its premier, Sheikh Mujibur Rahman, who was murdered with his family in a bloody coup in 1975. In more peaceful times, M H Khan drove the creation and development of the Bangladesh Navy and led Bangladesh's campaign to persuade India to reduce abstraction from the Ganges, which was causing immense hardship to his country further downriver. In this autobiography he tells his story and reflects on issues vital to his country, from religion and education to shipping, fishing and international relations.

This book examines the Indian nuclear policy, doctrine, strategy and posture, clarifying the elastic concept of credible minimum

deterrence at the center of the country's approach to nuclear security. This concept, Karnad demonstrates, permits the Indian nuclear forces to be beefed up, size and quality-wise, and to acquire strategic reach and clout, even as the qualifier minimum suggests an overarching concern for moderation and economical use of resources, and strengthens India's claims to be a responsible nuclear weapon state. Based on interviews with Indian political leaders, nuclear scientists, and military and civilian nuclear policy planners, it provides unique insights into the workings of India's nuclear decision-making and deterrence system. Moreover, by juxtaposing the Indian nuclear policy and thinking against the theories of nuclear war and strategic deterrence, nuclear escalation, and nuclear coercion, offers a strong theoretical grounding for the Indian approach to nuclear war and peace, nuclear deterrence and escalation, nonproliferation and disarmament, and to limited war in a nuclearized environment. It refutes the alarmist notions about a nuclear flashpoint in South Asia, etc. which derive from stereotyped analysis of India-Pakistan wars, and examines India's likely conflict scenarios involving China and, minorly, Pakistan.

- Best Selling Book for Indian Air Force Group C Exam with objective-type questions as per the latest syllabus.

The PAF has a long history of professional excellence. During the past decade the PAF distinguished itself in the Afghan War but at the same time the force was severely hit by the Pressler restrictions. However, human ingenuity coupled with wise leadership contained the damage caused by these restrictions and ensured that the fighting force stayed at its optimum best. This is the first official history of the PAF and includes information on its organization, aircraft, bases, and squadrons, with full details of its battles during the Afghan War.

The Indian Air Force (IAF), from a humble beginning in 1932 with four Wapiti aircraft, six Indian officers and 22 hawai sepoys, has traversed a long journey and crossed noteworthy milestones to become the fourth largest air force in the world. In the past 81 years, while facing several limitations/challenges, the IAF has met all the national defence requirements, and made several strategic contributions. The 1948 Kashmir airlift, Tangail paradrop, heli-bridging in East Pakistan and many other achievements are historic examples of its sterling performance. The only war independent India has lost was the one in which the IAF was not employed in a combat role. With growing economic interests and national aspirations, expanding interests well beyond our

territorial boundaries and prevailing internal security challenges, India's national defence requirements are also increasing. Reliance of sovereign nation-states on aerospace power is essentially growing. The first Gulf War was a monumental turning point in the war-time employment of aerospace power. Ever since, the significance of aerospace power in war, crisis and peace-time has been gaining ascendancy. Kosovo and Libya are the two pertinent examples of the allies virtually relying on aerospace power, without committing any soldiers on the ground. Scrutiny of the emerging global and national trends suggests that employment of aerospace assets, as well as the nation's expectation from the IAF, will continue to rise. Alongside, there is an unplanned fall in flying platforms, weapon systems and pilot strength of the IAF. This study is an attempt to analyse the history of the IAF in war as well as 'other than war operations'; to appreciate the emerging trends in geopolitics, aerospace technology and doctrine; and to identify the likely challenges the IAF would be facing in the next two decades and beyond. A roadmap for transformation of the national security framework, the indigenous aerospace industry and the IAF has also been suggested.

This book is the first comprehensive study of Pakistan's Inter-Services Intelligence Directorate (ISI). The rise of Pakistan-backed religious extremist groups in Afghanistan, India, and Central Asia has focused international attention on Pakistan's premier intelligence organization and covert action advocate, the Inter-Services Intelligence Directorate or ISI. While ISI is regarded as one of the most powerful government agencies in Pakistan today, surprisingly little has been written about it from an academic perspective. This book addresses critical gaps in our understanding of this agency, including its domestic security mission, covert backing of the Afghan Taliban, and its links to al-Qa'ida. Using primary source materials, including declassified intelligence and diplomatic reporting, press reports and memoirs, this book explores how ISI was transformed from a small, negligible counter intelligence outfit of the late-1940s into the national security behemoth of today with extensive responsibilities in domestic security, political interference and covert action. This study concludes that reforming or even eliminating ISI will be fundamental if Pakistan is to successfully transition from an army-run, national security state to a stable, democratic society that enjoys peaceful relations with its neighbours. This book will be of interest to students of intelligence studies, South Asian politics, foreign policy and international security in general.
