Venture into the unexplained phenomena of the Beaver State...if you dare. This collection of more than 40 chilling tales features eerie accounts of paranormal activity, bigfoot encounters, UFO sightings, including . . . • The ghost boat of the Willamette River • Mysterious activity at Yaquina Bay Lighthouse • Spanish pirates at Neahkahnie Mountain • The Chetco Indian Devil • Ghosts of the Crescent Mines

Vols. for 1837-52 include the Companion to the Almanac, or Year-book of general information.

Physics Teaching and Learning: Challenging the Paradigm, RISE Volume 8, focuses on research contributions challenging the basic assumptions, ways of thinking, and practices commonly accepted in physics education. Teaching physics involves multifaceted, research-based, value added strategies designed to improve academic engagement and depth of learning. In this volume, researchers, teaching and curriculum reformers, and reform implementers discuss a range of important issues. The volume should be considered as a first step in thinking through what physics teaching and physics learning might address in teacher preparation programs, in-service professional development

programs, and in classrooms. To facilitate thinking about research-based physics teaching and learning each chapter in the volume was organized around five common elements: 1. A significant review of research in the issue or problem area. 2. Themes addressed are relevant for the teaching and learning of K-16 science 3. Discussion of original research by the author(s) addressing the major theme of the chapter. 4. Bridge gaps between theory and practice and/or research and practice. 5. Concerns and needs are addressed of school/community context stakeholders including students, teachers, parents, administrators, and community members.

This collection of papers from educators around the world explores the state-of-the-art in teaching physics. Marking the retirement of Robert Resnick from RPI, a conference was held on teaching physics. This book contains the complete papers from a conference marking the retirement of Robert Resnick from RPI and offers a grand tour of the field.

What's the best equipment to teach about Newton's laws, electricity, or laser beams? And what do you do with the equipment once you have it? Find out from this compilation of more than 150 popular columns from The Physics Teacher magazine. Divided into five topics -- mechanics, waves and sound, thermal physics, electricity and magnetism, and light and color -- the columns tell how to enrich your introductory

physics class by using new apparatuses or by putting old equipment to new uses. From 1928 through 1982, when Columbia Pictures Corporation was a traded stock company, the studio released some of the most famous and popular films dealing with horror, science fiction and fantasy. This volume covers more than 200 Columbia feature films within these genres, among them Close Encounters of the Third Kind, The 7th Voyage of Sinbad, Earth vs. the Flying Saucers and The Revenge of Frankenstein. Also discussed in depth are the vehicles of such horror icons as Boris Karloff, Bela Lugosi, and John Carradine. Additionally highlighted are several of Columbia's lesser known genre efforts, including the Boston Blackie and Crime Doctor series, such individual features as By Whose Hand?, Cry of the Werewolf, Devil Goddess, Terror of the Tongs and The Creeping Flesh, and dozens of the studio's short subjects, serials and made-for-television movies.

This truly international volume includes a selection of contributions to the Second Conference of the European Science Education Research Association (Kiel, Sept. 1999). It provides a state-of-the-art examination of science education research in Europe, discusses views and visions of science education research, deals with research on scientific literacy, on students' and teachers' conceptions, on conceptual change, and on instructional media and lab work.

the annual print edition. We are a directory of resources (business and organizational) for LGBTQI USA, sold in gay-friendly bookstores since 1973 and available online (updated monthly) at no charge. Canada online only at present.

"The most reliable Gay print source in the Gay community. I've been using it since the 1970s." -- Dr Charles Silverstein, author of 'The Joy of Gay Sex'.

Anyone involved in science education will find that this text can enhance their pedagogical practice. It describes new, model-based teaching methods that integrate social and cognitive perspectives for science instruction. It presents research that describes how these new methods are applied in a diverse group of settings, including middle school biology, high school physics, and college chemistry classrooms. They offer practical tips for teaching the toughest of key concepts.

Learn about physics with fun projects and experiments Created in partnership with Thames & Kosmos, Fun Physics Projects for Tomorrow's Rocket Scientists introduces you to essential physics concepts through do-it-yourself projects that you can then use to perform experiments. Experience the thrill of scientific discovery when you observe the physics of motion, including constant speed, acceleration, and free fall, through your own experiments. All of the projects use inexpensive, readily available materials and software. No experience required! Chapters feature: Things You'll Need--lists of all the components and equipment required for each project Be Careful--important safety tips Famous Scientists--introductions to people who've
