The chapter "Basic Electronics MCQs" covers topics of digital and analogue electronics, basic operations of logical gates, analogue and digital electronics, and gate operation, and operation, cathode ray oscilloscope, electrons properties, investigating properties of electrons, logic gates, NAND gate , NAND operation, NOR gate, NOR operation, NOT operation, OR operation, thermionic emission, and uses of logic gates. The chapter "Current and Electricity MCQs" covers topics of current and electricity, electric current, electric power, electric safety, electric shocks, electrical energy and Joule's law, combination of resistors, conductors, direct and alternating current, direct current and alternating current, electromotive force, factors affecting resistance, hazards of electricity, how does material effect resistance, insulators, kilowatt hour, ohm's law, Ohmic and non-Ohmic conductors, potential difference, resistivity and important factors, resistors, and resistance. The chapter "Electromagnetism MCQs" covers topics of electromagnetism, electromagnetic induction, AC generator, alternate current generator, dc motor, direct current motor, force on a current carrying conductor and magnetic field, high voltage transmission, Lenz's law, magnetic effects and steady current, magnetic effects of steady current, magnetic field versus voltage, mutual induction, radio waves transmission, transformer, and turning effect on a current carrying coil in magnetic field. The chapter "Electrostatics MCQs" covers topics of electrostatic induction, electrostatic potential, capacitors and capacitance, capacitors, capacitors interview questions, circuit components, Coulomb's law, different types of capacitors, electric charge, electric field and electric field intensity, electric potential, electric shocks, electronic devices, electroscopes, electrostatics applications.

Network and system administration usually refers to the skill of keeping computers and networks running properly. But in truth, the skill needed is that of managing complexity. This book describes the science behind these complex systems, independent of the actual operating system they work on. It provides a theoretical approach to systems administration that: saves time in performing common system administration tasks. allows safe utilization of untrained and trained help in maintaining mission-critical systems. allows efficient and safe centralized network administration. Managing Human-Computer Networks: Will show how to make informed analyses and decisions about systems, how to diagnose faults and weaknesses Gives advice/guidance as to how to determine optimal policies for system management Includes exercises that illustrate the key points of the book The book provides a unique approach to an old problem and will become a classic for researchers and graduate students in Networking and Computer Science, as well as practicing system managers and system administrators.

The authors bring to life the theory of mediated learning. Through numerous examples and scenarios from classrooms and museums, they show how mediated learning helps children to become more effective learners. --from publisher description.

Perfect Sample Papers is a series prepared as per the guidelines, syllabus and marking scheme issued by CBSE for Class X Summative Assessment II .
