

Crhis Pueyo

This book provides an up-to-date compilation of the latest research on the petrography, facies, paleoenvironmental significance and economic aspects of continental carbonates. The overall organization of the book first emphasizes the descriptive aspects and processes operating on carbonate deposits in greatly varied settings, and then considers applications for basin analysis, as well as economic and historical aspects. This volume will be a valuable tool for graduate and postgraduate students as well as for experienced researchers. The second part (volume 62 in this series) will deal with the geochemistry, diagenesis and applications of carbonates in continental settings. Covering the greatly varied aspects of carbonate deposits from continental settings deposits Clear and easy to follow organization Up to date information, so readers can find references from the classic literature to the most recent research

With the world's prison population continuing to grow and the number of secure inpatient beds in psychiatric hospitals on the rise, establishing valid and reliable methods of identifying individuals who will commit violent acts is an important global health and public safety issue. One approach to identifying future offenders is through the use of risk assessment--unstructured and structured methods of predicting the likelihood of antisocial behavior. Although much has been written on the performance of risk assessment in research settings, little is known about current standards of practice and relevant public policy across the globe. International Perspectives on Violence Risk Assessment includes chapters by leading risk assessment scholars in more than 15 countries and explores the topic from a truly international outlook. Using findings from the seminal International Risk Survey (IRiS), the

largest qualitative study in the history of the field, current assessment, management, and monitoring practices on six continents are explored. Authors identify and describe the most commonly used risk assessment tools, examine risk communication preferences, and provide recommendations for mental health practitioners, criminal justice professionals, and legal professionals. Finally, authors review the seminal research studies, current practice guidelines, and relevant legal statutes of their jurisdictions. This volume serves as an invaluable resource for researchers, practitioners, and policymakers interested in this rapidly evolving field.

The search for life is one of the most active fields in space science and involves a wide variety of scientific disciplines, including planetary science, astronomy and astrophysics, chemistry, biology, chemistry, and geoscience. In December 2016, the Space Studies Board hosted a workshop to explore the possibility of habitable environments in the solar system and in exoplanets, techniques for detecting life, and the instrumentation used. This publication summarizes the presentations and discussions from the workshop.

Chris Pueyo se ha convertido en un hombre en este libro, aunque pocos saben que siempre lo fue. Solo un adulto es capaz de convertir la oscuridad en una cueva en la que refugiarse y hacer de una infancia complicada un cuento con el que dormirse cada noche. El autor, igual de versátil que sus poemas, crece en Hombres a los que besé al mismo ritmo que lo hacen sus versos, trabajados y buscados con ahínco, comprimidos en una precisión que solo dan la voluntad, el esfuerzo y el talento. Chris es un escritor con todas las letras, las mismas que conjuga para inventarse verbos que solo él conoce pero que no guarda, sino que comparte con todo aquel que tiene la valentía suficiente como para reconocerse en la mirada de otro. Como si este libro fuera un espejo, Pueyo defiende la infancia desde la empatía, desmenuza

cada detalle de su herida para perdonarla, asume el perdón sin esfuerzo como paso obligatorio en el crecimiento, se aventura en estructuras ya nunca más desconocidas. Uno se ve a sí mismo al leer Hombres a los que besé. Chris Pueyo cuenta con una ventaja fundamental para defender su lectura: sus poemas tienen voz propia. Y esa voz, que es de color azul y brilla por encima de todos los hombres, le va a llevar a cientos de lugares maravillosos que nosotros, como lectores, vamos a disfrutar muchísimo, empezando por este poemario. Elvira Sastre

The two-volume set LNCS 8218 and 8219 constitutes the refereed proceedings of the 12th International Semantic Web Conference, ISWC 2013, held in Sydney, Australia, in October 2013. The International Semantic Web Conference is the premier forum for Semantic Web research, where cutting edge scientific results and technological innovations are presented, where problems and solutions are discussed, and where the future of this vision is being developed. It brings together specialists in fields such as artificial intelligence, databases, social networks, distributed computing, Web engineering, information systems, human-computer interaction, natural language processing, and the social sciences. Part 1 (LNCS 8218) contains a total of 45 papers which were presented in the research track. They were carefully reviewed and selected from 210 submissions. Part 2 (LNCS 8219) contains 16 papers from the in-use track which were accepted from 90 submissions. In addition, it presents 10 contributions to the evaluations and experiments track and 5 papers of the doctoral consortium.

This book focuses on three authors coming of age at an important moment in Spanish literary history and in world history at large. These authors incorporated into their novels the new ideas

that they found in the writing of many foreign authors that were essential to their development. This volume of essays is intended as a tribute to the distinguished medieval historian Christopher Brooke. It addresses new questions in areas of medieval history which Professor Brooke has made his own: urban life and religious life. The fourteen essays explore the coexistence of religious ideas and ecclesiastical institutions with urban practices and townspeople. They span five hundred years of the history of western Christendom, ranging from Magdeburg to Majorca, and from Cambridge to Cluny. The essays break new ground in a number of areas in medieval history: in economic history, the history of ideas, and the history of religious institutions. The contributors have been attuned throughout to the complex interactions of groups and ideas within urban space. The book also contains a bibliography of Christopher Brooke's writings and an appreciation of his work.

La incorporación de la llamada generación millenial al ámbito de la literatura en general y de la poesía en particular, ha provocado un cambio en los modos de producción y recepción del poema. Los jóvenes utilizan ahora las herramientas digitales como algo inherente a su cotidianidad, como la fórmula para intercomunicarse con el mundo (la amistad en ese entorno virtual se mide ahora en número de seguidores o de likes), especialmente en contextos no formales que al final son los que sustancian el día a día. Y con esos parámetros miran también la literatura. Las estructuras de difusión de la poesía han sufrido una evolución tan rápida y tan ágil hacia este camino de lo digital que ha pillado desprevenidos tanto al lector tradicional como a los autores que responden a parámetros canónicos.

The two-volume proceedings LNCS 9056 + 9057 constitutes the proceedings of the 34th Annual International Conference on the Theory and Applications of Cryptographic Techniques,

EUROCRYPT 2015, held in Sofia, Bulgaria, in April 2015. The 57 full papers included in these volumes were carefully reviewed and selected from 194 submissions. The papers are organized in topical sections named: honorable mentions, random number generators, number field sieve, algorithmic cryptanalysis, symmetric cryptanalysis, hash functions, evaluation implementation, masking, fully homomorphic encryption, related-key attacks, fully monomorphic encryption, efficient two-party protocols, symmetric cryptanalysis, lattices, signatures, zero-knowledge proofs, leakage-resilient cryptography, garbled circuits, crypto currencies, secret sharing, outsourcing computations, obfuscation and e-voting, multi-party computations, encryption, resistant protocols, key exchange, quantum cryptography, and discrete logarithms.

Calila: The Later Novels of Carmen Martín Gaité explores the last six novels by Spain's most honored contemporary woman writer. Its scholarship is enriched by the voice of Calila herself—as Brown called Martín Gaité, who was a dear friend—as they conversed and exchanged letters during the composition of the novels. The book opens with an introduction to Martín Gaité's life and literature and ends with a consideration of her legacy. Each central chapter analyzes a later novel in its historical, biographical, and critical contexts. From the young adult fantasy *Caperucita en Manhattan* (Red Riding Hood in Manhattan) to the post-Transition epistolary masterpiece *Nubosidad variable* (Variable Cloud), the Transition-era saga *La Reina de las Nieves* (The Farewell Angel), the Proustian reminiscence *Lo raro es vivir* (Living's the Strange Thing), the narrative tapestry *Irse de casa* (Leaving Home), and the memoir of family secrets *Los parentescos* (Family Relations), these fascinating novels evoke themes that resonate today.

standard works of reference. This volume commemorates the eclectic research of Douglas James Shearman into evaporites, which was initiated by his studies of the prograding UAE coastal sabkhas or salt flats that incorporate evaporite minerals which displace and replace earlier carbonate sediments. His subsequent proselytization of the study of ancient evaporites in sedimentary sections all over the world led to fundamental advances in our understanding of arid zone carbonate sedimentology. The papers presented here are based on presentations made in Abu Dhabi, UAE 12-14th October 2004 and 7th –8th November 2006. They provide a retrospective from the 1960's and 70's of Holocene evaporites and carbonates, recapturing Shearman's contribution by revisiting the Holocene coastal evaporite and carbonate sediments of the Arabian/Persian Gulf from Abu Dhabi, Qatar, and Oman. The first set of papers considers these sediments from the perspective of their coastal geomorphology, sedimentary character and their geochemistry. Later papers examine the significance of these settings in the ancient geological section world-wide, including examples from the Mesozoic-Cenozoic of the Moroccan Atlantic margin and the Upper Jurassic Arab Formation of the Arabian Gulf.

Mi familia es una mierda. Excepto mi abuela. Me crio, me educó y me soltó; ninguna de las tres tarea fácil. Así que mi abuela es mi madre. Todo comenzó

de lo racional. Una poesía pura, llena de pasadizos por donde buscar la identidad.

Henri Lefebvre and the Spanish Urban Experience is the first book to thoroughly apply the French urban philosopher's thought on cities to the culture and literature of Spain. Fraser shows how Lefebvre's complex view of the city as a mobile phenomenon is relevant to understanding a variety of Spanish cultural products—from urban plans and short writing on the urban experience during the nineteenth century to urban theories, cultural practices and literary fiction of the twentieth century, pushing on to interrogate even the appearance of Mediterranean space and Barcelona in recent video games.

La violencia contra la pareja sentimental se ha convertido, en los últimos años, en un problema social de primera magnitud. La importante prevalencia e incidencia de la misma, la frecuente repetición de estos episodios y la gravedad que adquieren, así como sus importantes secuelas físicas, psicológicas y sociales en los miembros de la pareja y en el resto de la familia, la sitúan entre las primeras preocupaciones de los profesionales de la justicia, la psicología, la medicina y la sociología. Para colaborar en la prevención de la violencia contra la pareja se ha desarrollado la S.A.R.A. La S.A.R.A consiste en una guía o protocolo de predicción del riesgo de violencia específico para su uso en conflictos de pareja. Hasta ahora esta guía ha demostrado su eficacia en

países como Canadá (donde se diseñó inicialmente), E.E.U.U., Reino Unido, Alemania, Holanda y los países nórdicos y aquí presentamos su adaptación a nuestra realidad española. Esta guía contiene el conjunto de factores de riesgo más relevantes que anticipan la violencia contra la pareja. Está construida de un modo que su uso en la predicción futura de violencia es sencillo y simplemente requiere un entrenamiento específico en su aplicación. Está adaptada para que puedan emplearla cotidianamente tanto psicólogos como psiquiatras, trabajadores sociales, policías y todos aquellos técnicos que se ocupan de la gestión del riesgo de la violencia contra la pareja y otros tipos de violencia familiar

While taking into account the non-existent rights and interests of the so-called geographically disadvantaged states and of states with broad continental shelves, the 1982 Convention on the Law of the Sea practically ignored existing rights and interests of habitual fishing states. This book explores these events in the historical development of the international regulations of fisheries and concludes with a look into recent developments in the area.

This collection challenges the tendency among scholars of ancient Greece to see magical and religious ritual as mutually exclusive and to ignore "magical" practices in Greek religion. The contributors survey specific bodies of archaeological, epigraphical, and papyrological evidence for magical practices in the Greek world, and, in each case, determine whether the traditional dichotomy between magic and religion helps in any

considerably more efficient and less controversial. The integration of computational and experimental strategies has led to the identification and development of promising compounds. *Computer Applications in Drug Discovery and Development* is a pivotal reference source that provides innovative research on the application of computers for discovering and designing new drugs in modern molecular biology and medicinal chemistry. While highlighting topics such as chemical structure databases and dataset utilization, this publication delves into the current panorama of drug discovery, where high drug failure rates are a major concern and properly designed virtual screening strategies can be a time-saving, cost-effective, and productive alternative. This book is ideally designed for chemical engineers, pharmacists, molecular biologists, students, researchers, and academicians seeking current research on the unexplored avenues and future perspectives of drug design.

El HCR-20 es una guía-protocolo para valorar el riesgo de cualquier tipo de violencia. Diseñado inicialmente en Canadá, actualmente se ha convertido en un instrumento imprescindible para predecir el riesgo de comportamientos violentos en poblaciones penitenciarias y psiquiátricas. La adaptación que presentamos, correspondiente a la 2a edición original, es la misma que se utiliza en Canadá, Estados Unidos, Reino Unido, Suecia, Alemania, Holanda y otros países europeos. Los usuarios de esta guía, tanto psiquiatras y psicólogos como

ciminólogos, juristas y otros técnicos penitenciarios han destacado la sencillez de su utilización y la buena eficacia predictiva. En esta adaptación se han incluido comentarios y ayudas que adecuan a nuestro marco legal aquellos aspectos relevantes para su uso forense y criminológico.

The aim of this edited book is to provide a comprehensive overview of the opportunities and challenges related to innovation for sustainability. Combining work from both emerging and established scholars in different academic fields, this book provides an integrated understanding of the topic from four perspectives. First, the big picture: frameworks, types, and drivers; second, strategy and leadership; third, measurement and assessment and fourth, tools, methods and technologies. Chapter 11 of this book is available open access under a CC BY 4.0 license at link.springer.com. The editors donate their remuneration for this book to conservation organisation the WWF.

Érase un niño que jamás vivió más de dos años seguidos en una misma casa, por lo que decidió pintar las paredes de todas sus habitaciones con estrellas. Su rechazo al colegio y una familia inusual le empujarán a emprender un viaje donde no todo serán constelaciones y pedirle deseos a la luna. Es hora de bajar al barro, equivocarse con una princesa y terminar encontrando un príncipe... ¿o no? Sus ansias de libertad, tres antídotos de supervivencia y unas botas

plateadas le acompañarán por un mundo muerto donde los sueños llegan descalzos y despeinados a Ninguna Parte.

Following five successful workshops in the previous five years, the Rendering Workshop is now well established as a major international forum and one of the most reputable events in the field of realistic image synthesis. Including the best 31 papers which were carefully evaluated out of 68 submissions the book gives an overview on hierarchical radiosity, Monte Carlo radiosity, wavelet radiosity, nondiffuse radiosity, and radiosity performance improvements. Some papers deal with ray tracing, reconstruction techniques, volume rendering, illumination, user interface aspects, and importance sampling. Also included are two invited papers by James Arvo and Alain Fournier. As is the style of the Rendering Workshop, the contributions are mainly of algorithmic nature, often demonstrated by prototype implementations. From these implementations result numerous color images which are included as appendix. The Rendering Workshop proceedings are certainly an obligatory piece of literature for all scientists working in the rendering field, but they are also very valuable for the practitioner involved in the implementation of state of the art rendering system certainly influencing the scientific progress in this field.

"Todos los días vivimos y escuchamos historias de discriminación hacia el

indefenso, la que destaca o, simplemente, los diferentes. HA LLEGADO EL MOMENTO DE TOMAR LA PALABRA: Hagamos del mundo, entre todos, un lugar mejor. #NOTECALLES Queremos creer que se trata de algo lejano, pero en realidad está más cerca de lo que creemos. Lo vemos en la calle, en la escuela. A veces, tristemente, en nuestros hogares. Todos los días escuchamos historias de odio y discriminación, historias que nos hacen pensar hacia dónde va el mundo. Es momento de cambiar. No podemos voltear la mirada e ignorar el problema. No debemos callar más. Seis de los más destacados influencers nos prestan su voz para motivarnos a no callar la nuestra." --
