A vital component of any publishing project is the ethical dimensions, which can refer to varied categories of practice: from conducting a proper peer review to using proper citation in research. With the implementation of technology in research and publishing, it is important for today's researchers to address the standards of scientific research and publishing practices to avoid unethical behavior. *Scholarly Ethics and Publishing: Breakthroughs in Research and Practice* is an essential reference source that discusses various aspects of ethical values in academic settings including methods and tools to prevent and detect plagiarism, strategies for the principled gathering of data, and best practices for conducting and citing research. It also assists researchers in navigating the field of scholarly publishing through a careful analysis of multidisciplinary research topics and recent trends in the industry. Highlighting a range of pertinent topics such as academic writing, publication process, and research methodologies, this publication is an ideal reference source for researchers, graduate students, academicians, librarians, scholars, and industry-leading experts around the globe.

Students are frequently asked to engage in peer review and response activities in writing classrooms across the curriculum. But how can, and why should, teachers make peer response a major part of their pedagogy that really works well for their students and themselves? *Peer Pressure, Peer Power* delivers original essays that engage tough pedagogical questions from authors who resist easy answers. This collection includes essays that examine the nature of peer response in theory and in practice from scholars representing composition-rhetoric, writing center, and WAC/WID across the country. The book provides new and experienced teaching assistants and instructors, WPAs, writing center personnel, WAC personnel, and service learning personnel with both a theoretical and practical resource for peer response in writing classrooms. But the authors in this collection go a pedagogical step or two further: they map several interconnections between classroom and writing center and other peer tutoring theories and practices, showing the ways that a deeper understanding of peer response can help teachers and tutors provide better feedback to students writing; they suggest the connections between peer response and designing effective writing assignments and rubrics, touching on how important student input really is in all phases of our pedagogy; they bring the value of teaching and learning with student texts to vivid life; and they illustrate specific ways that classrooms and one-to-one and small-group conferences can become highly interactive, synergistic sites for the teaching and learning of writing.

"This book exists, is here for you as a resource because we, the authors/editors of this text (Suzanne Blum Malley and Ames Hawkins), saw very similar, very exciting things happening in our classrooms using ethnographic research methods in our inquiry-based first-year writing classrooms. We have watched our students develop strong voices as writers, while also using critical analytical skills and addressing important ideas of ethics, identity, and representation. In our classrooms, we have seen a greater level of investment in ethnographic projects than we have seen in more traditional rhetorically based assignments. Ethnographic writing, by creating a very authentic role for the researcher and a connection to community, offers a means to address the alienation and/or boredom that many non-traditional writers and first-year college students feel when confronted with the traditional composition curriculum—any curriculum, actually. More importantly, ethnographic research allows students to access what can seem so terribly difficult when framed in other assignments: to pursue a line of inquiry rather than a topic, to research ethically, and to write with authority. Though we initially wrote this text with the first-year writing classroom in mind, we have come to understand that there are many

courses that also present students with ethnographic writing assignments. These courses may or may not be designed to spend much time on the question of how to get started with these projects. In addition, instructors might want to supplement the basic methodological approach with their own course content. We are also aware that textbook size and cost has exploded in recent years. We believe in preserving the internet as an open-source space and wish to reinforce our belief with practice. As a result of these realizations, we have reorganized the project in order to 1) Make it relevant and accessible to students in nearly any college classroom who might be assigned an ethnographic writing project; 2) Allow instructors to supplement the core methodology (presented here in Chapters 1–6), as they see fit, using any number of Supplemental Modules that offer additional materials, lenses, and multi-modal examples of and for issues and ideas discussed in the core text. 3) Make it accessible and available, via the internet and other technological platforms, to students and instructors everywhere. A disclaimer: we want to make clear that while we use and invoke methodological principles and practices associated with ethnography, we are not claiming *Engaging Communities* as a text that teaches ethnography as a research methodology. This book has been designed to help students (most likely undergraduates, perhaps high school, possibly graduates ) envision interesting, hands-on research projects that are eventually converted—translated—into written text. Throughout the text, we often use the word ethnographic in order to describe our methodological presentation and theoretical concerns as this term reflects the pedagogical (teaching) and rhetorical (arguing) concerns of ethnography, rather than the actual disciplinary understanding of the methodology. We choose to use to teach this way because ethnographic writing allows for specific discussion regarding how to involve and interest a reader, in evoking physical and emotional connection with writing, rather than simply becoming informed or persuaded by any specific piece of writing"--Back cover.
