Learn how to rebuild and modify the GM 4L80E transmission! As the successor to the venerable and popular Turbo Hydramatic 400 (TH400), the 4L80E was the next flag bearer in GM's line of automatic transmissions. While serving as the smaller, lighter cousin to the 4L85E, the abundance of 4L80E transmissions manufactured between 1991 and 2013 ensures that these highly capable 4-speed overdrive units will be in service for years to come. Automatic transmissions are often seen as mysterious and overly complicated, but much of the guesswork has been simplified to its basic elements in this easy-to-follow guide. This book covers the process of identifying the best versions, tearing down the 4L80E, rebuilding, reassembly, and troubleshooting. Upgrades that are available for the 4L80E, which is a popular topic among performance fans and transmission swappers, are also included. This detailed, step-by-step instructional manual is authored by racer and builder Eric McClellan. Meticulous step-by-step photos of the rebuild process are featured along with torque specs and unique identification of all major and most minor components.

In the beginning, cinema was an encounter between humans, images and machine technology, revealing a stream of staccato gestures, micrographic worlds, and landscapes seen from above and below. In this sense, cinema's potency was its ability to bring

other, non-human modes of being into view, to forge an encounter between multiple realities that nonetheless co-exist. Yet the story of cinema became (through its institutionalization) one in which the human swiftly assumed centrality through the literary crafting of story, character and the expression of interiority. Ex-centric Cinema takes an archaeological approach to the study of cinema through the writings of philosopher Giorgio Agamben, arguing that whilst we have a century-long tradition of cinema, the possibility of what cinema may have become is not lost, but co-exists in the present as an unexcavated potential. The term given to this history is ex-centric cinema, describing a centre-less moving image culture where animals, children, ghosts and machines are privileged vectors, where film is always an incomplete project, and where audiences are a coming community of ephemeral connections and links. Discussing such filmmakers as Harun Farocki, the Lumiere Brothers, Guy Debord and Wong Kar-wai, Janet Harbord draws connections with Agamben to propose a radically different way of thinking about cinema. Author Vizard covers blending the bowls, basic porting procedures, as well as pocket porting, porting the intake runners, and many advanced procedures. Advanced procedures include unshrouding valves and developing the ideal port area and angle.
