"*Dreams of Love: Playing the Romantic Pianist* explores the attractions of the concert pianist from an innovative interdisciplinary perspective, demonstrating how such meanings have evolved over two centuries through technology and the popular media, including literature and cinema. Author Ivan Raykoff uses romantic both as the label for a historical era and musical style, as well as the more colloquial adjective referring to love, desire, and sensual feeling. Through this two-fold interpretive approach, music history and cultural mythology are read alongside one another to reveal the interconnected processes of music's social mediation. The word playing also invites multiple readings: performance or practicing, as pastime or profession, as play-acting and other modes of representation, or reproduction like a player piano. The Romantic pianist signifies more than just music; through established rituals and familiar representations of practicing, performing, and listening, the pianist also plays within a larger system of cultural ideology linking music to aspects of gender, sexuality, personal identity and social relationships, and the politics of the body."

Motivating students to practice is one of the most important tasks a teacher must accomplish in order to help pupils achieve success in private piano lessons. Because of a lack of self-motivation, many students quit piano lessons, thereby failing to utilize and develop their talents. Self-motivation is more of a requirement in piano lessons than in other extra-curricular activities, because piano lessons require students to practice the same music repeatedly. Students who lack self-motivation tend to become easily bored and lose interest in the instrument. Therefore, inspiring students' self-motivation is a critical responsibility that the piano teacher must accept, in addition to the task of teaching the student how to play piano. Some students are naturally enthusiastic about learning to play the piano, but most students, especially young students, need the teacher's help to improve their motivation. Many articles and books exist that introduce methods or strategies to enhance a student's self-motivation. However, there is no single method that succeeds in motivating each and every student. Methods that are effective for some students may not be effective for other students. Also, methods that are ineffective for a student may actually have a negative impact on the student's motivation to practice piano. An individualized method of improving motivation

can be created for each student based upon the student's personality, gender, age, family background, interests, previous musical experiences, reasons for learning, and so on. Furthermore, in most cases, using a variety of methods for each student is better than using a single method. In this essay, I focus on finding the best ways to motivate piano students by studying their personal backgrounds. I conducted a survey focusing on the personal backgrounds of my private students and have observed the success of various motivational methods. Based on the information I have collected, I found correlations between motivating methods and students' personal backgrounds.

Aspects of beauty in the music of Mozart It is a common article of faith that Mozart composed the most beautiful music we can know. But few of us ask why. Why does the beautiful in Mozart stand apart, as though untouched by human hands? At the same time, why does it inspire intimacy rather

than distant admiration, love rather than awe? And how does Mozart's music create and sustain its buoyant and ever-renewable effects? In *Mozart's Grace*, Scott Burnham probes a treasury of passages from many different genres of Mozart's music, listening always for the qualities of Mozartean beauty: beauty held in suspension; beauty placed in motion; beauty as the uncanny threshold of another dimension, whether inwardly profound or outwardly transcendent; and beauty as a time-stopping, weightless suffusion that comes on like an act of grace. Throughout the book, Burnham engages musical issues such as sonority, texture, line, harmony, dissonance, and timing, and aspects of large-scale form such as thematic returns, retransitions, and endings. Vividly describing a range of musical effects, Burnham connects the ways and means of Mozart's music to other domains of human significance, including expression, intimation, interiority, innocence, melancholy, irony, and renewal. We follow Mozart from grace to grace, and discover what his music can teach us about beauty and its relation to the human spirit. The result is a newly inflected view of our perennial attraction to Mozart's music, presented in a way that will speak to musicians and music lovers alike.

the Jews in Hungary, who- from the economic point of view - were more influential than any other Jewish community in Europe. Following the German occupation in March 1944 the collaborating Hungarian government attempted to assert its claim concerning the complete confiscation of Jewish assets at all stages of the road leading to the extermination camps. The cooperation with the Germans proved to be the most problematic in this area. The story of the Jewish Gold Train is a relatively small but all the more emblematic chapter of the economic annihilation. The circumstances of the freight's assembling, the German-Hungarian conflicts concerning the train, the looting attempts, the fate of the assets seized by the Allies (double victimization of the survivors) provide the reader with an insight into the history of the repeated looting of the Hungarian Jewry. The book analyzes the role played by SS-Obersturmbannführer Kurt Becher, one of the most controversial and mysterious figures in the Hungarian and universal history of the Holocaust. Becher, delegated to Hungary by Himmler, administered and benefited from the confiscation of an enormous amount of Jewish assets."
