A devotional journal inviting women to embrace the spiritual journey that awaits as they prepare for the high and holy calling of motherhood. Expecting a baby is a time of unfolding wonders—from the jolt of first heartbeat, to the buds of tiny fingers, to the flutter of little kicks. During pregnancy, a mother's body nourishes this quiet miracle's development. But through the trials of morning sickness, the anticipation of labor, and the questions of whether she'll be a good mother, she'll need her own nourishment—both physical as well as spiritual. She'll want to nurture her own heart so that she may one day strengthen the spiritual life of this child entrusted to her. *Waiting in Wonder* guides readers through the weeks of pregnancy with devotions designed to encourage, strengthen, and inspire. Each devotion includes Scripture and journaling space for writing personal thoughts, prayers, dreams, even love letters to the growing baby. And when baby is born, a mother will hold a lifelong keepsake for rereading and reliving a truly wonder-filled time of physical change and spiritual growth.

We are all that. A summation of the could haves. A result of the choices not made, as much as of the choices made. The 80's. An era before India opened herself up to possibilities. An era of constraints and deprivation. Individualism, private spaces, essence and excesses were all largely unheard of. For the 80's kids, this also meant limited choices and austerity of dreams. Choices were mostly a lack of options, or those made for them by others: clothes, television channels, education, partner, career..., etc. Like every other child in his school album, he wore the same smile and the same unimaginative clothes rolled out by the neighbourhood tailor. He continued mimicking others' smiles and then their career choices too. Until one day when he realised how ill-fitting his garbs were. How his true smiles remained hesitant to be completed. How deep that void had grown in him. And then, the jigsaw of a perfect-looking life went into scramble mode. An unexpected divorce, an indefinite sabbatical, darkness, questions with no answers. An urge to go back to the comfort of the familiar versus that desire to experience the unknown. End of it, most questions were answered. The rest died or were killed. The void filled, and smiles completed. He then wrote poems, stories and a book about it. About how he made unforced choices, first time in four decades. About how he killed the golden goose, against all proverbial advice. Complex, compelling and shocking - PAUL ZACHARIA An intimate chronicle of the world we live in ... deceptively simple but searingly truthful - K.R. MEERA Endlessly playful, cleverly mischievous, enchantingly magical, scarily nightmarish - K. SATCHIDANANDAN When they were first published, Gracy's stories shocked readers with their sexual candour and frank celebration of female desire. She is now widely recognized as one of the most important contemporary writers in Malayalam. Her short stories, which vary from half a page to novella-length, draw the reader into the world of modern men and women caught in quagmires of desire, lust, jealousy and vengeance - emotions that they often carry even into the afterlife. In these pages we will find: the bitter defiance of a daughter going to her mother's funeral in her most alluring sari; a contemporary retelling of the story of Draupadi; the sinister coming-of-age tale of a young girl... Brilliantly rendered

by award-winning translator Fathima E.V., *Baby Doll* brings a comprehensive selection of Gracy's work to English readers for the very first time.

Learn the basics of modern robotics while building your own intelligent robot from scratch! You'll use inexpensive household materials to make the base for your robot, then add motors, power, wheels, and electronics. But wait, it gets better: your creation is actually five robots in one! -- build your bot in stages, and add the features you want. Vary the functions to create a robot that's uniquely yours. Mix and match features to make your own custom robot: Flexible Motorized Base -- a playpen for all kinds of programming experiments Obstacle Detector -- whiskers detect when your robot has bumped into things Object Avoider -- ultrasonic sound lets your robot see what's in front of it Infrared Remote Control -- command your robot from your easy chair Line Follower -- use optics to navigate your bot; have races with other robot builders! You will learn how switches, ultrasonics, infrared detectors, and optical sensors work. Install an Arduino microcontroller board and program your robot to avoid obstacles, provide feedback with lights and sound, and follow a tracking line. In this book you will combine multiple disciplines -- electronics, programming, and engineering -- to successfully build a multifunctional robot. You'll discover how to: construct a motorized base set up an Arduino to function as the brain use "whisker" switches to detect physical contact avoid obstacles with ultrasonic sensors teach your robot to judge distances use a universal remote to control your robot install and program a servo motor respond to input with LEDs, buzzers, and tones mount line-following sensors under your robot And more. Everything is explained with lots and lots of full-color line drawings. No prior experience is necessary. You'll have fun while you learn a ton!
