How did "liberal" become a dirty word in American politics? How did "compassionate conservative" become a viable campaign theme? When did the "independent voter" become the most sought-after prize in modern campaigns? And why haven't "third-party candidates" enjoyed similar acclaim? The Talk of the Party listens to how the language of partisanship-including words like Democrat, Republican, party, liberal, conservative, and independent-has been used over the past fifty years and how it has created or limited political opportunities. Listening to the talk of the party can teach valuable lessons about campaigns, opportunities for public life, and the future of these American institutions.

A Twenty-First Century Guide to Aldersonian Marketing Thought introduces readers to the life, the writings and the intellectual legacy of Wroe Alderson, the preeminent marketing thinker of the mid-twentieth century. Both Alderson's seminal contributions to marketing theory and his "best practices" articles in the areas of marketing management and ethics have been reproduced. Contributions by others about Wroe Alderson include a biography and a number of previously published articles that build on Alderson's theoretical contributions. Six original articles further explore Wroe Alderson's life, his work, his character and his intellectual impact. This book also contains two bibliographies: one of material written by Alderson over a forty year period and the other of publications that discuss his work. This single volume provides readers with an "in depth" understanding of the nature, the scope, and the magnitude of Alderson's highly original and lasting contributions to marketing theory and thought.

The Educator's Guide to Substance Abuse Prevention is for educators and other school personnel who are concerned about student drug use and school violence. It will help them to appreciate and use their humanity, professional skills, educational ideals, and the school curriculum as tools for substance abuse prevention. Teachers' concerns are

addressed in several ways. First, the text provides a guide through which they may resolve personal and professional concerns about the commitments, limits, and boundaries of their working relationships with students. Second, it describes tasks that teachers can perform and mental health issues they can address in creating classroom policies, procedures, and rules to promote healthful learning activity in the classroom. Third, the author summarizes and interprets research and theory about substance abuse as they apply specifically to educational prevention and to professional teaching practice--arguing that classroom management strategies, learning activities, and social interaction are a teacher's primary tools of prevention, and showing how teachers may use these tools in any curricular area and without direct reference to drugs. A highlight of this text is its emphasis on helping teachers to explore drug-related issues from within the context of their own curricular specialties and to integrate substance abuse prevention with the curriculum in many school subjects--including the arts, literature, social studies, history, government, science, and culture. Action-oriented prevention strategies based on these content areas are suggested. The Educator's Guide to Substance Abuse Prevention: *focuses primarily on teaching, learning, and prevention rather than on information about drugs; *helps teachers to better use what they already do, know, and are in order to respond competently, responsibly, and with sensitivity to the needs of their students; *attends to the needs of teachers who do prevention work and the needs of children who are the target of prevention efforts; *describes student disappointment and disillusionment with family, school, and community as sources of risk and the legitimate domain in which teachers may serve a curative role; *provides extensive coverage of historical, social, and cultural issues related to substance abuse and school violence; and *alerts teachers to the risk to children posed by extremist adult groups, prominent negative role models, popular culture, and peer pressure.
