The exceptional quality of previous editions has been built upon to make the tenth edition of Atkins' Physical Chemistry even more closely suited to the needs of both students and lecturers. The text has been enhanced with additional learning features and

maths support, and has been radically restructured into short focussed topics. An innovative use of pedagogy is combined with rigorous but accessible coverage of the subject to ensure Atkins' Physical Chemistry tenth edition remains the textbook of choice for studying physical chemistry. New to this edition : significant reorganization of the material within each chapter into discrete 'topics' makes the text more readable for students and more flexible for instructors ; expanded maths support includes new 'Chemist's toolkits' which provide students with succinct reminders of mathematical concepts and techniques ; three questions at the beginning of each topic engage and focus the attention of the reader : 'Why do you need to know this material ?', 'What is the key idea ?', and 'What do you need to know already ?' ; New checklists of key concepts at the end of each topic reinforce the main take-home messages in each section.

New in this edition is a 20 page section on the use of ICT resources in teaching and learning about statistics. The book also includes over 300 worked examples and advice on how to break down calculations into easy stages.

O objetivo deste estudo consiste no desenvolvimento de um instrumento electrónico

fiável para avaliar os comportamentos verbais, ao nível da consciência fonológica e das competências linguísticas específicas de aprendentes de Língua Segunda. Por um lado, o instrumento avalia capacidades no domínio da descodificação fonética e fonológica, examinando as diferenças entre os locutores estrangeiros (aprendentes de Português como Língua Segunda); por outro lado, o objetivo é observar a performance cognitiva em diferentes contextos, com vários alunos, nas escolas portuguesas. Após a revisão teórica de conceitos e a perspetiva proposta para os processos de descodificação fonética, serão apresentados os resultados decorrentes da aplicação da bateria de testes especificamente no que respeita ao desempenho de aprendentes de Língua Segunda (amostra do estudo) nas provas de segmentação e de pares mínimos. Os alunos mais velhos exibem uma competência maior do que os mais novos, revelando maior estrutura e menor interferência no nível fonológico. A “homopheneity” sugere-se como o constrangimento para a descodificação fonética e perceção. A bateria de testes apresenta-se como um instrumento importante de diagnóstico a adequar ao contexto educativo vigente na sociedade multicultural.

Research on chemical communication in animals is in a very active and exciting phase; more species are studied, data are accumulating, concepts are changing, and practical application seems feasible. While most of the work on chemical ecology and chemical signals deals with insects, vertebrate communication provides a formidable challenge and progress has been slow. Joint efforts and frequent direct contacts of ecologists, behaviorists, psychologists, physiologists, histologists and chemists are required. Such an interdisciplinary exchange of information took place on the occasion of the Symposium on Chemical Signals in Vertebrates and Aquatic Animals in Syracuse, New York, from May 31 to June 2, 1979. More than one hundred investigators from seven countries participated, and the papers presented comprise this volume. Since the first Symposium on Vertebrate Chemical Signals at Saratoga Springs in 1976, considerable progress has been made with field studies, the physiology of the vomeronasal organ, and its role in reproductive behavior. The behavioral functions and chemical nature of priming pheromones are better understood. Efforts to isolate and identify mammalian pheromones are gaining

ground, and the bioassays are becoming more sophisticated. In addition to formal presentations, one evening of the Symposium was devoted to round-table discussions of particular topics. The selected themes indicate the "growing points" of chemical communication research: priming pheromones, vomeronasal organ, bioassay, and practical applications.
