In the 1930s an amateur archaeologist discovered the 'largest number of model[ed] human heads from a single Maya building', which were recovered with little regard for stratigraphy. This volume reports on excavations in 2000 and 2002 at the rapidly-disappearing site of Louisville which aimed to reunite this important discovery with its archaeological context, an aim in which it succeeded. The book includes an illustrated catalogue of the stucco heads, reconstructing the many lost examples from drawings made at the time of their original discovery, and examines associated finds, structures and deposits. Finally, Runggaldier touches upon the function of these heads which, she argues, are clearly a form of portraiture, with each head depicting individual men and women. Colour photographs of the surviving heads completes the book.

Modernizing China: Investing in Soft Infrastructure

Why do so many international development projects fail? Is it because poor regions are inherently corrupt, or is it because developers and donors do not properly take into account how local survival mechanisms work? In a lively and provocative analysis of community development, Michael Rosberg challenges the received wisdom of international development agencies, suggesting that in order for development to be successful it must speak directly to the self-interest of individuals in emerging nations. In an accessible and personal work, *The Power of Greed* deftly navigates the thickets of morality, theory, and ideology to arrive at pragmatic strategies that demonstrate that when an individual's self-interest is creatively and appropriately engaged in cooperative enterprise, the greater good of the community can be well served.

Excellent color plates with drawings of over 850 species make this the most fully illustrated guide to the region. Published by the author in 1972 and 1989, this convenient take-along guide is now totally revised, updated, and re-designed to provide handy assistance and enjoyment to professional ornithologists and amateur birders alike.

law enforcement awareness and training. Individual chapters written by experts in law enforcement explore a host of topics, including: Border issues between Mexico and the U.S., including the trafficking of people, drugs, and firearms The role of the Internet in human trafficking Child victim recruitment into sex trafficking How sexually oriented businesses such as escort services, hostess bars, and massage parlors can be fronts for sex trafficking The prevalence of human trafficking among street gangs Forced labor aspects, especially with respect to illegal immigrants How victims are chosen Theoretical, practical, and ethical considerations in providing effective services to victims An ideal resource for police investigators, police training, and community outreach organizations, the book is also suitable as a college text for criminal justice courses. It is hoped that the awareness created through this text will provide the knowledge and tools needed to help to end this form of modern-day slavery.

Stone temples rising above the rainforest canopy and elaborate hieroglyphs carved onto stone monuments give silent testimony to the high culture of the Maya ancestors of the indigenous peoples of Central America. They have inspired generations of archaeologists, professional and avocational, to take to the field in search of the past. One such archaeologist is Heather McKillop, who in 1979 first visited the coast of Belize in search of a little-known aspect of ancient Maya life: the sea trade that helped move salt, obsidian, coral, and other goods around the interior of the empire. In 1982, she began bringing volunteers and students to the islands off the coast of Port Honduras, Belize. Since then she has returned many times to excavate sites that reveal the scope and diversity of the trade that passed by water throughout the Maya world. In this book, McKillop tells the story of the search for the Maya sea traders, as well as the story of the traders themselves as it emerges from the excavations. In Search of Maya Sea

Traders describes the trading port of Wild Cane Cay, where exotic obsidian, jade, gold, and other goods—including highly crafted pots—were traded from distant lands. McKillop also tells us about the more coastal-inland trade of salt, seafood, and other marine resources. Through the story of her own work and that of her students and volunteers, McKillop models both the research design and the field work that are required to interpret the civilizations of the past. She includes the adventure of discovery, the challenges of working in wild environments (from snakes and rising sea levels to falling coconuts) and the tedium of daily measured digs in a near-tropical setting. Through her experiences, the reader also gets to know some of the local residents of Port Honduras and Wild Cane Cay, descendants of the ancient Maya. *In Search of Maya Sea Traders* will appeal to that part of each of us that longs to explore distant places and cultures, in quest of a seldom-glimpsed past.

During the American Civil War and the years immediately following, thousands of Confederate sympathizers and former soldiers left the southern United States to seek exile in other lands. Evidence suggests that more Confederate soldiers

went to British Honduras, presently known as Belize, than any other single site. This work is an in-depth look at the settlements established by former Confederates--what lured the Confederates there, what the trip from New Orleans was like, what life was like for immigrants in Belize City, the settlements at Toledo, New Richmond, northern British Honduras, Manatee and other settlements, and what Belize City was like at the height of the immigrant influx. Also included are lists of arrivals at the hotels and passenger lists from the ships; both were important in identifying prominent Confederates who sought refuge in British Honduras.
