This book presents selected articles from the workshop on "Challenges in Petrophysical Evaluation and Rock Physics Modeling of Carbonate Reservoirs" held at IIT Bombay in November 2017. The articles included explore the challenges associated with using well-log data, core data analysis, and their integration in the qualitative and quantitative assessment of petrophysical and elastic properties in carbonate reservoirs. The book also discusses the recent trends and advances in the area of research and development of carbonate reservoir characterization, both in industry and academia. Further, it addresses the challenging concept of porosity partitioning, which has huge implications for exploration and development success in these complex reservoirs, enabling readers to understand the varying orders of deposition and diagenesis and also to model the flow and elastic properties.

This book demonstrates the usefulness of tools from statistical mechanics for biology. It includes the new tendencies in topics like membranes, vesicles, microtubules, molecular motors, DNA, protein folding, phase transitions in biological systems, evolution, population dynamics, neural systems and biological oscillators, with special emphasis on the importance of statistical mechanics in their development. The book addresses researchers and graduate students.

UPES Management Entrance Test (UPES MET) is a national level aptitude test conducted by University of Petroleum & Energy Studies (UPES) for candidates offering admission to the MBA programmes at UPES, Dehradun. The UPES MET exam is conducted multiple times in a year. Candidates can appear in any cycle according to the availability. Candidates who have MAT, CMAT, XAT, CAT, NMAT and GMAT scores of either the same or previous year, are exempted from taking UPES MET 2020.
