Thomas Burnett Swann was a brilliant fantasy writer who died in 1976. He wrote primarily about the ancient Greek and Roman world, blending myth with romance and adventure. A reviewer in the Village Voice sums his work up well: "Swann's neo-romantic fantasies of the past are unique. He uses the stuff of myth but with twists and inventions of his own." Swann's last published novel, *Queens Walk in the Dusk* is a retelling of the romance of Dido and Aeneas. It is a companion volume to *Green Phoenix*.

In an age of skepticism and disenchantment, people long for something that satisfies our mind's search for truth and our heart's desire for beauty and meaning. *Stand Firm: Apologetics and the Brilliance of the Gospel* argues that the gospel satisfies both of these needs. It is true and rational, but it is also inherently attractive and provides meaning and purpose. In short, the gospel is brilliant. It is brilliant, in one sense, because of the broad variety of evidences for its truth. But it is also brilliant given its beauty, goodness and the meaningful life it offers. The book provides up to date responses to questions about the existence of God, the reliability of the Bible, Jesus and the resurrection, and the problem of evil. It also treats unique topics such as understanding truth, knowledge and faith, the claims of alternate faiths, religious disagreement, etc. Each chapter attempts to connect these considerations with the gospel so that we may stand firm in our faith.

In the midst of Trump's attacks on the media, comes this look at the rigorous, independent reporting of the year's most underreported news stories. While the country's president displays a brazen disregard for the First Amendment and routinely demonizes the press as "the enemy of the people," *Censored 2020* looks beyond Donald Trump's dizzying contempt for the truth to clarify the corporate media's complicity in misinforming the American public--while also providing a clear vision of a better future, based on rigorous, trustworthy independent reporting that presents a fuller picture of truth. With a discerning eye, *Censored 2020* focuses the public's attention on the most important but underreported news stories of 2018-2019. These stories expose the corporate news media's systemic blind spots while highlighting the crucial role played by independent journalists in providing the kind of news necessary for informed, engaged citizens. The book also examines this year's lowlights in "junk food news" and "news abuse"--further revealing how corporate news often functions as propaganda--as well as highlights of exemplary organizations that champion "Media Democracy in Action." Additional chapters address the importance of constructive journalism, the untold story of Kashmir, news coverage of LGBTQ issues in the Trump era, "fake news" as a Trojan horse for censorship, and online memes as a form of political communication.

Louise Rushing has been delivered and set free from the bondage of sin. "Alcohol is no longer a crutch for me. I don't have to turn tricks with men in order to feel loved. I don't carry around bitterness and unforgiveness in my heart against those who used and abused me. I know how to love and forgive. It is all because of my Lord and Savior, Jesus Christ. He taught me how to overcome all of the demons that haunted me all my life. I am free, really free." This wonderful God saved me from a life of sin and death. I owe Him everything. He is my life. This book is all about what He did for me in my life. He has sent me out to let this dying world know that there is a God that forgives and can heal a broken heart. I am a living witness. If He did it for me, He can do it for you. Louise Rushing was ordained in October 29, 2011 by Pastor Larry Brooks, of Crossroads Kingdom Ministries, and strives to help her family and others to seek salvation, learn and grow in the Word of God through weekly Bible studies, and by sharing her testimony of God's grace all over the greater Seattle area in various churches, prisons, women's shelters, women's conferences, and prayer breakfasts.

Luke Stone was alone. And he liked it that way. An ex-bodyguard, sworn never to protect again after his last failure, Luke needed no one. Until he met Jessica Chan. A journalist with a dark past, Jessica had uncovered deadly information that made her a target. And only Luke stood between her and certain death. She was everything he didn't want: a woman who attracted trouble...and attracted him. But as assassins closed in and emotions ran high, Jessica might become everything he needed....

For more than three decades, the impact of aid on the global environment has been the subject of vigorous protest and debate. With billions spent on environmental aid each year, this groundbreaking text seeks to understand why aid is given, how effective it is, and whether aid is actually going to the places with the greatest environmental need.

Cliff Ragsdale is an innovator of the spreadsheet teaching revolution and is highly regarded in the field of management science. The sixth edition of *MANAGERIAL DECISION MODELING*, 6e, International Edition retains the elements and philosophy that has made its past editions so successful. This version of *MANAGERIAL DECISION MODELING*, 6e, International Edition has been updated for use with Microsoft® Office Excel® 2010. It provides succinct instruction in the most commonly used management science techniques and shows how these tools can be implemented using the most current version of Excel® for Windows. This text also focuses on developing both algebraic and spreadsheet modeling skills. Risk Solver Platform replaces Crystal Ball in the sixth edition. Risk Solver Platform includes all of the capabilities of Risk Solver for risk analysis and Monte Carlo simulation, all of the capabilities of Premium solver Platform for optimization, and new capabilities for finding robust optimal decisions using simulation, optimization, stochastic programming, and robust optimization methods.

In a breezy, easy-to-understand style, *Fundamentals of Physics* offers a solid understanding of fundamental physics concepts, and helps readers apply this conceptual understanding to quantitative problem solving. This text continues to outperform the competition year after year, and the new edition will be no exception. The Sixth edition of this extraordinary text is a major redesign of the best-selling Fifth edition, which still maintains many of the elements that led to its enormous success. The primary goal of this text is to provide readers with a solid understanding of fundamental physics concepts, and to help them apply this conceptual understanding to quantitative problem solving.

Just when you thought you had baking down to a tee, we made it even easier by eliminating the baking. These delicious recipes make preparing homemade treats easy, fast and oven free. *No Bake Cookies, Bars & Pies* features more than 120 recipes that are finished and ready to serve in just minutes. It's perfect for the busy mom or the beginner chef.

*Rethinking Insecurity, War and Violence: Beyond Savage Globalization?* is a collection of essays by scholars intent on rethinking the mainstream security paradigms. Overall, this collection is intended to provide a broad and systematic analysis of the long-term sources of political, military and cultural insecurity from the local to the global. The book provides a stronger basis for understanding the causes of

conflict and violence in the world today, one that adds a different dimension to the dominant focus on finding proximate causes and making quick responses Too often the arenas of violence have been represented as if they have been triggered by reassertions of traditional and tribal forms of identity, primordial and irrational assertions of politics. Such ideas about the sources of insecurity have become entrenched in a wide variety of media sources, and have framed both government policies and academic arguments. Rather than treating the sources of insecurity as a retreat from modernity, this book complicates the patterns of global insecurity to a degree that takes the debates simply beyond assumptions that we are witnessing a savage return to a bloody and tribalized world. It will be of particular interest to students and scholars of international relations, security studies, gender studies and globalization studies.

It is plausible that occasionally, a rogue electromagnetic wave might develop in interstellar and/or intergalactic space which would carry a large volumetric electromagnetic energy density and would travel at the speed of light in vacuu. Accordingly, a spacecraft of Christmas Tree Light-Sail style might harness the energy of the rogue wave regardless of whether the wave was generally incident from the stern or bow direction with respect to the spacecraft. It is also plausible that rogue waves comprised of microwaves, infrared light, visible light, ultraviolet light, x-rays, gamma rays, and the like may develop. For space craft on itineraries lasting at least a canonical ensemble of years in the ship frame or also in the background reference frame, such rogue waves are bound to occur. Moreover, even larger waves that are formed from rouge waves are possible and may have amplitudes, volumetric energy densities, and total energies which are much greater than that of the first hierarchy of rogue waves. Additionally, these second hierarchies of rogue waves may combine to form 3rd hierarchies of rogue waves which may in turn combine to form 4th hierarchies of rogue waves and so-on. Rogue waves as such may have magnetic wave and gravitational wave analogues. Electromagnetic and magnetic waves may plausibly include both Standard Model and Mirror Matter Model forms.

The Autotech Congress brings together manufacturers, researchers, designers, users, industry groups, and academics to create a forum for the exchange of information and innovation. The papers included here examine the major advances and technological breakthroughs of today, which will become standard practice for tomorrow. A wide range of interests are catered for within the automotive field. These include themes covering: Automotive Manufacturing, Engines and Powertrains, Electronics, Environmental Impact and Safety, Materials Technology, Vehicle Technologies, and Bus and Truck Technology. Bus and Truck Technology looks at some of the most interesting developments in passenger service vehicles and heavy goods transportation. The papers presented in this volume consider aspects such as: \* Exhaust emissions \* Diagnostic equipment \* Solar powered refrigerated trailers \* Tractor to trailer communications \* Satellite communications \* Truck telematics \* Better wiring systems In giving comprehensive update of automotive industry developments, this volume contains information which is vital to maximize the impact of future transportation systems.

This volume, published in the year of the one hundredth anniversary of Bonhoeffer's birth, documents Bonhoeffer's life under the increasing restraints and fateful events of World War II Germany. In hundreds of letters, including ten never-before-published letters to his fiancée, Maria von Wedemeyer, as well as official documents, short original pieces, and a few final sermons, the volume sheds light on Bonhoeffer's active resistance to and increasing involvement in the conspiracy against the Hitler regime, his arrest, and his long imprisonment. Finally, Bonhoeffer's many exchanges with his family, fiancée, and closest friends, demonstrate the affection and solidarity that accompanied Bonhoeffer to his prison cell, concentration camp, and eventual death.

Pathogens for War explores how Canada and its allies have attempted to deal with the threat of germ warfare, one of the most fearful weapons of mass destruction, since the Second World War. In addressing this subject, distinguished historian Donald Avery investigates the relationship between bioweapons, poison gas, and nuclear devices, as well as the connection between bioattacks and natural disease pandemics. Avery emphasizes the crucially important activities of Canadian biodefence scientists – beginning with Nobel Laureate Frederick Banting – at both the national level and through cooperative projects within the framework of an elaborate alliance system. Delving into history through a rich collection of declassified documents, Pathogens for War also devotes several chapters to the contemporary challenges of bioterrorism and disease pandemics from both national and international perspectives. As such, readers will not only learn about Canada's secret involvement with biological warfare, but will also gain new insights into current debates about the peril of bioweapons – one of today's greatest threats to world peace.

An introductory engineering textbook by an award-winning MIT professor that covers the history of dynamics and the dynamical analyses of mechanical, electrical, and electromechanical systems. This introductory textbook offers a distinctive blend of the modern and the historical, seeking to encourage an appreciation for the history of dynamics while also presenting a framework for future learning. The text presents engineering mechanics as a unified field, emphasizing dynamics but integrating topics from other disciplines, including design and the humanities. The book begins with a history of mechanics, suitable for an undergraduate overview. Subsequent chapters cover such topics as three-dimensional kinematics; the direct approach, also known as vectorial mechanics or the momentum approach; the indirect approach, also called lagrangian dynamics or variational dynamics; an expansion of the momentum and lagrangian formulations to extended bodies; lumped-parameter electrical and electromagnetic devices; and equations of motion for one-dimensional continuum models. The book is noteworthy in covering both lagrangian dynamics and vibration analysis. The principles covered are relatively few and easy to articulate; the examples are rich and broad. Summary tables, often in the form of flowcharts, appear throughout. End-of-chapter problems begin at an elementary level and become increasingly difficult. Appendixes provide theoretical and mathematical support for the main text.

Presents the tale of how the children of a perfect little town embraced their wild side and, in the process, found their joy and courage while saving the last wild witch and the last magic forest from disappearing.

This five-volume handbook provides a comprehensive overview of all important aspects of modern drying technology, including only advanced results. In this first volume diverse model types for the drying of products and the design of drying processes (short-cut methods, homogenized, pore network, and continuous thermo-mechanical approaches) are treated, along with computational fluid dynamics, population balances, and process systems simulation tools. Emphasis is put on scale transitions.

The second edition of the Neurological Physiotherapy Pocketbook is the only book for physiotherapists that provides essential evidence-based information in a unique and easy-to-use format, applicable to clinical settings. Written by new international editors and contributors, this pocketbook provides quick and easy access to essential clinical information. Pocketbook size for when out on clinical placement or working in clinical practice Revised and brand new chapters on neurological rehabilitation and essential components Concentrates on the six most common conditions: including stroke, traumatic brain, and spinal cord injury Key messages highlighted for assessment, treatment, and measurement of the most common neurological conditions

The main outcomes of RILEM TC-226-CNM are summarized in this book. Key input was provided by researchers from countries that are main contributors in the R&D, design, construction, operation, and regulation of waste nuclear reinforced concrete facilities. Nuclear power plants and many of the facilities and structures used for the management of radioactive waste materials generated by the fuel cycle use concrete in their construction. RILEM TC 226 CNM covered several areas including functional and performance requirements for concrete structures; degradation processes; phenomenological modelling, field experiences, tests approaches, instrumentation and monitoring methods dedicated to performance assessments; service-life models; aging Management of Nuclear Power Plants, repair techniques;

codes and standards specific to radioactive waste facilities.

Peterson's® Master the(tm) SSAT® is the guide for preparing students and their parents for the SSAT® exam. Complete with the most up-to-date information on the upper-level exam, this guide is vitally important to anyone preparing for private secondary school admissions testing. Students have access to test-taking strategies for each of the question types, along with specific advice for exam day. Four practice tests, plus a diagnostic test, provide students with a realistic idea of what to expect when the test date arrives. In addition, students and parents both benefit from expert tips on all aspects of the private secondary school search process: how to identify schools that are a good fit, how to apply for financial aid, and all of the other challenges of finding the right private secondary school. 4 full-length practice tests with detailed answer explanations Diagnostic test to determine strengths and weaknesses Complete review of all exam subjects: Verbal Ability, Quantitative Ability, Reading Comprehension, and Writing Expert advice on SSAT® exam question formats, scoring, and what to expect on test day

A fun, interactive activity book based around the popular theme of magic to engage and motivate young learners. This book helps children to practise their grammar skills, reinforcing what has been taught at school. A definitive treatise on the code of the samurai--revised and with a new introduction Upholding the samurai code both on and off the battlefield is one of the essential tenets of bushid?, the Way of the Warrior—and Bud?shoshinshu is a definitive treatise on living in accordance with the samurai code. When it comes to books on samurai philosophy, the Edo-period classic Hagakure is iconic to contemporary readers, but Bud?shoshinshu, which was written during same period, was equally influential at the time. Many scholars consider Hagakure, which was influenced by Zen, to be the most radical and romantic of samurai texts, while Bud?shoshinshu is more measured and practical, owing to its heavy Confucian influence. Taken in tandem, they provide a range of insights on the role of the individual within the samurai order—both addressing the warrior's role in times of peace and emphasizing the importance of living selflessly. Written by Daidoji Y?zan, a Confucian scholar who descended from a long line of prominent warriors, Bud?shoshinshu comprises 56 pithy instructive essays for young samurai on how to live morally, with professional integrity and a higher purpose, and to carry on the true chivalrous tradition of bushid?. Bud?shoshinshu is imbued with classic Confucian philosophy, centered on living one's life with sincerity and loyalty.

Designed as a textbook for undergraduate students in various engineering disciplines—Mechanical, Civil, Industrial Engineering, Electronics Engineer-ing and Computer Science—and for postgraduate students in Industrial Engineering and Water Resource Management, this comprehensive and well-organized book, now in its Second Edition, shows how complex economic decisions can be made from a number of given alternatives. It provides the managers not only a sound basis but also a clear-cut approach to making decisions. These decisions will ultimately result in minimizing costs and/or maximizing benefits. What is more, the book adequately illustrates the concepts with numerical problems and Indian cases. While retaining all the chapters of the previous edition, the book adds a number of topics to make it more comprehensive and more student friendly. What's New to This Edition • Discusses different types of costs such as average cost, recurring cost, and life cycle cost. • Deals with different types of cost estimating models, index numbers and capital allowance. • Covers the basics of nondeterministic decision making. • Describes the meaning of cash flows with probability distributions and decision making, and selection of alternatives using simulation. • Discusses the basic concepts of Accounting. This book, which is profusely illustrated with worked-out examples and a number of diagrams and tables, should prove extremely useful not only as a text but also as a reference for those offering courses in such areas as Project Management, Production Management, and Financial Management.

Hotel Gwales is the eagerly anticipated new collection from award winning poet Nigel Jenkins. It is as diverse as it is rousing, featuring some eighty poems varying in length from a three-line Haiku to an extended meditation of nearly 400 lines. Welsh themes and references, ancient and modern, are interspersed with works of an undeniably international flavour to bring together this exceptional collection. From a poem commemorating the execution of a man known as the Welsh 'Braveheart' to an elegy for a Welsh bus driver, Hotel Gwales truly has something for everyone. Hotel Gwales offers Nigel Jenkins's distinctive voice at its best in his first collection of poetry in almost four years. Nigel is well known both in Wales and internationally and is a frequent performer of his work. He has previously undertaken reading tours of countries including the USA and Switzerland. His trademark experimentation with form and ability to engage with his subject is at its finest.

After the incredible success of Animal, K'wan is back with the second, bloody installment in the new Animal saga. Secrets are revealed, sides are chosen and bodies are dropped...it's on! The man ordered to take Animal from the world turns out to be the man who brought him into it. Animal finds himself torn between his hatred for the father who had abandoned him and the man who had taken everything from him. An uneasy truce is formed between father and son to take down a common enemy and finally grant Animal his freedom from the blood debt he's carried for so many years. But when the ghosts of Animal's past catch up with him he learns that nothing is what it seems, and everything is subject to corruption, even his love for Gucci.

This title presents Orage's commentaries on 'Beelzebub's Tales to his Grandson', which are an essential part of the Fourth Way literature. They demonstrate a way of approaching and understanding a work that Orage considered to be literature of the highest kind.

This valuable handbook provides a detailed step-by-step solution or lengthy discussion for every problem in the text. The handbook also features additional study aids, including extra study problems, chapter outlines, vocabulary exercises, and an overview of how to study genetics.

The Instructor's Manual contains worked out solutions to 230 of the 256 problems in Ogunnaike and Ray, Process Dynamics, Modeling, and Control (published November 1994). It is to be distributed gratis to adopters of the text and to qualified professors who are seriously considering adopting the text and have requested it.

The mysterious powers of gems, crystals, and minerals are finally explained in this practical guide to creating talismans. Casting a modern light on the age-old practice of talismans, gemologist Henry M. Mason correlates the mystical properties of these wondrous objects with the science of gemology. Connecting with the universal life force, the proper talisman can focus and magnify your own qualities—helping you fulfill dreams and desires. Mason's seven secrets explore how crystal structure, color, and chemistry contribute to a talisman's natural energies for aiding in attraction, protection, self-improvement, creativity, tranquility, spiritual awakening, and more. From selecting and preparing the proper mineral to empowering your talisman, this guide takes you through every step of creating and using talismans and amulets for optimum effect.

We often strive for our peak of accomplishment: peak health, peak wealth, peak performance. The idea for this anthology came from a further question that is both simple but provocative: "What if we could exceed the upper limits of our performance?" What would happen if, rather than focusing on being physically well, we imagined ourselves physically vibrant? What would happen if rather than seeking 100% of the good that might come to us, we pushed past our boundaries, and pictured what 112% might look like? What would happen if we took our upper limits

of vision as a baseline, rather than a ceiling? Could we be happier, more abundant, and healthier than our wildest dreams? That's what Peak Vitality is all about. It calls us to examine the thresholds of our thinking, feeling and experiencing then go beyond what we believe we're capable of. Includes chapters from bestselling authors such as Wayne Dyer, Christiane Northrup, Candace Pert, Deepak Chopra, Julia Cameron, Riane Eisler, Dean Ornish, and many more!
