No work has ever been produced previously that shows how historically geography has been constructed as a subject for the senior years of secondary schooling in Western Australia from 1917 to 1997. In doing so, this book contributes to the existing corpus of international research on the history of curriculum and particularly the history of geography as a senior secondary school subject. Much of it is based on primary sources, including the textbooks and atlases used, along with syllabus manuals and geography examination papers. It also provides a framework for investigating the construction of senior secondary school geography curricula in other constituencies, and could act as a model for engaging in further research in curriculum history for other school subjects state-wide, nationally and internationally. The book also makes an important contribution to the fields of curriculum design, curriculum development and curriculum innovation. It will be of great interest to historians of education, comparative educationists, education leaders, policy makers and librarians.

The Shanghai school system has attracted worldwide attention since its impressive performance in the Programme for International Student Assessment (PISA) in 2009. The system ranks as a 'stunning success' according to standards of the Organisation for Economic Co-operation and Development (OECD). Shanghai also stands out for having the world's highest percentage of 'resilient students' – students from socio-economically disadvantaged backgrounds who emerge as top performers. Learning From Shanghai: Lessons on Educational Success offers a close-up view of the people and the policies that have achieved such world-class performance. Based on research and personal observation gathered during the author's recent field work with school principals, teachers and students, this book explores the factors that explain Shanghai's exceptional success in education. The approach combines high standards of scholarly research and analysis with the author's unique personal insights, as evidenced by chapters entitled Education is Filling a Bucket and Lighting a Fire and Tiger Mothers, Dragon Children. Drawing on her experience as an education professional and a teacher of teachers, Charlene Tan thoroughly examines and analyzes the people, the policies and the practices that distinguish Shanghai educators. The contents include comprehensive details on the Shanghai approach to quality education, from discussion of the balance between centralization and decentralization, to school autonomy and accountability, to testing policy and professional development for teachers. The book includes detailed tables on curriculum and school performance targets, sample appraisal forms for teachers and students, and dozens of photographs. The author is an Associate Professor at the National Institute of Education, Nanyang Technological University, Singapore.
