The IEEE Conference on Dependable and Secure Computing solicits papers, posters, practices, and experiences for presenting innovative research results, problem solutions, and new challenges in the field of dependable and secure computing. The whole spectrum of IT systems and application areas, including hardware design and software systems, with stringent relevance to dependability and security concerns are of interest to DSC. Authors are invited to submit original works on research and practice of creating, validating, deploying, and maintaining dependable and secure systems.

There's never been a better time to access God than in critical moments like this. This is the season when God is most active, will show you Who He is, and has answers for you. This is when you get to understand the difference between man's solutions and God's solutions. While we try to grapple with the situation at hand, I'd love to share a bit on something I think is very important for each person to consider, and that is Keeping the Yeast Out of the House. On the last day of Passover, I thought deeply about a few things; and this year's Passover was like none other. The current plague has shed light on our tradition and caused us to experience Christ in a new way. A lot of things have changed for me, and I was able to bring them to the modern-day context. The application of scientific principles to the study of sport and exercise demands of its investigators an understanding of the research process, and in particular the inter-related issues of research design and statistics. The topic of the book are: Introduction to Research, Survey of Related Literature, Basics of Statistical Analysis, Statistical Models in Physical Education and Sports. Meet Duck. Duck has a yen for travel and adventure. Duck also has some very wet, cold feet and a gift for loyalty and compromise. Meet Kangaroo. Kangaroo has been around the world and back, and is looking for a little bit of luck. Or a duck. When Duck and Kangaroo meet, it's a match made in . . . heaven. Ah, love—ain't it grand? And who so happy,—O who, As the Duck and the Kangaroo?

Dietary habits of people have changed over the last few decades. Growing consciousness for protein rich food has given an impetus to both the dairy industry and poultry farming. Today, the dairy industry is a large organized sector with both private and government participation whereas poultry farming has indicated a rapid growth of 20% in the past few decades as well. Poultry is one of the fastest growing segments of the agricultural sector in India today. The production of agricultural crops has been rising at a rate of 1.5 to 2 % per annum that of eggs and broilers has been rising at a rate of 8 to 10 % per annum. From a backyard hobby it has culminated into an industry. The venture has largely been entrepreneurial and poultry farmers prefer to target their efforts to breeding & broiler farming for sale of ready broilers or layer farming for eggs. Poultry is the second most widely eaten meat in the world, accounting for about 30% of meat production worldwide. Dairy plants process the raw milk they receive from farmers so as to extend its marketable life. India has only a few specialized dairy farms. It is the production that characterizes the dairy industry. India is the worlds highest milk producer and all set to become the worlds largest food factory. Dairying is an important source of subsidiary income to small/marginal farmers and agricultural labourers. The manure from animals provides a good source of organic matter for improving soil fertility and crop yields. Since agriculture is mostly seasonal, there is a possibility of finding employment throughout the year for many persons through dairy farming. Thus, dairy also provides employment throughout the year. The main beneficiaries of dairy programmes are small/marginal farmers and landless labourers. Developments in the dairy and poultry industries during the last decade have been important enough to bring out a considerable amount of materials on dairy and poultry farming; processing of milk and poultry related products. The major contents of the book are dairy farming, poultry production, breeding, fertility, forage grass and concentrates, cow behaviour and health, manufacture of butter and cheese, process measurements and controls, components of poultry diets etc. This book also describes about the feed manufacturing process, butter and cheese manufacturing processes with diagrams, housing system and management of broilers and more. The first book of its kind which covers complete details of dairy and poultry farming, processing how to feed cows, birds in dairy and poultry, kind of diseases and their cure and other information related farming. This book will be an invaluable resource to dairy and poultry technology, institutions and for those who want to venture in this field.

"The Value of Philosophy" is one of the most important chapters of Bertrand's Russell's magnum Opus, The Problems of Philosophy. As a whole, Russell focuses on problems he believes will provoke positive and constructive discussion, Russell concentrates on knowledge rather than metaphysics: If it is uncertain that external objects exist, how can we then have knowledge of them but by probability. There is no reason to doubt the existence of external objects simply because of sense data.
