Regional economic integration has become a key force in international commercial policy in the 2000s. Europe has traditionally embraced regionalism; the United States became actively involved in preferential trading arrangements only in the 1980s. While Asia has been late in accepting formal regional economic integration accords, all Asian countries are now in the process of creating various free-trade areas and other forms of economic integration programs, and some are already in place. This volume analyzes the regionalism trend from an Asian perspective. It considers the lessons from, and the economic implications of, various economic integration programs in the OECD (mostly the EU but also NAFTA), as well as the proposals for closer economic integration in the region itself. Chapters deal with both real and financial integration issues. Sample Chapter(s). Chapter 1: East Asian Economic Regionalism: Progress and Challenges (1,660 KB). Contents: Introduction (M G Plummer & E Jones); East Asian Economic Regionalism: Progress and Challenges (M Kawai); Sequencing Regional Integration in Asia (R Pomfret); ASEAN+3: Is an Economic Community in Their Future? This book investigates the interplay of internal and external constraints, challenges and possibilities regarding foreign policy in India. It is the first attempt to systematically analyse and focus on the different actors and institutions in the domestic and international contexts who impose and push for various directions in India's foreign policy. Rather than focusing on any one particular theme, the book explores the myriad aspects of foreign policymaking and the close interface between the domestic and external aspects in Indian policymaking. In turn, this relates to the structural issues shaping and reshaping the Asian regional dynamics and India's connectivity within a globalized world. This book will be of great interest to postgraduate students; scholars of Asian Studies, development, and political science and international relations; and all those involved in policy – especially foreign policy – within India and South Asia. It will also be useful for people working in professional branches of consultancy and the private sector dealing with India and with South Asia in general.

This volume is designed to place in context the passionate controversies and emotional attachments of the two billion people who live, study, work, love, and die in the Middle East and South Asia. Understanding these regions means more than annually-updated details of the governments, politics, cultures, and economies of the twenty-four nations and assorted territories. Special chapters address significant issues of continuing international importance, including access to water, the role of oil, and the 2011 Arab spring. Both regions, after all, contain types of people misunderstood and often intensely disliked by others. Where religion intrudes on politics—the Afghan Taliban oppose educating girls, Hindu fanatics rampage in India, Iranian militiamen shoot demonstrators, Islamic extremists impose sharia, and Jewish Ultra-Orthodox send women to the back of the bus—readers bombarded with superficial news bites and slanted reporting might never sense the other accomplishments of these same societies. Islamic charities and societies bring relief to the impoverished, Israel's scholars win Nobel prizes, and most Indians cherish long-standing religious toleration. The author of this volume attempts to let the reader draw conclusions from the evidence.

Child soldiers are generally perceived as faultless, passive victims. This ignores that the roles of child soldiers vary, from innocent abductee to wilful perpetrator. This book argues that child soldiers should be judged on their actions and that treating them like a homogenous group prevents them from taking responsibility for their acts.

of the complex issue of child soldiering. The Handbook brings together scholars from six continents, diverse experiences, and a broad range of disciplines. Along the way, it unpacks the life-cycle of youth and militarization: from recruitment to demobilization to return to civilian life. The overarching aim of the Handbook is to render the invisible visible – the contributions map the unmapped and chart new directions. Challenging prevailing assumptions and conceptions, the Research Handbook on Child Soldiers focuses on adversity but also capacity: emphasising the resilience, humanity, and potentiality of children affected (rather than ‘afflicted’) by armed conflict.

This is a key study into whether 'climate change refugees' are protected by international law. This book brings together a collection of essays about the untenable political status quo in Bangladesh under Sheikh Hasina. Since democratization in the 1990s, Bangladeshi political life has been characterized by fierce battles over the role of religion in society,

corruption, and the obstacles to constructing a society with freedom of expression and rule of law, independent from the influence of powerful neighboring countries. Academic freedom and other human rights issues have hindered the study of Bangladesh heretofore, and corruption, police abuses, and election rigging are common as well as widely documented. In this passionate, sometimes personal exploration of the issues of social justice, rule of law, and the democratic process in Bangladesh, the book offers a valuable case study of how an Asian developmental state is otherwise regressing backwards morally, socially, and politically. The Bangladeshi struggle for sovereignty, prosperity and democracy documented in this book will be of interest to political scientists, scholars of South Asia, and those of Islam.

globalization has given rise to a number of financial issues in international law in areas as diverse as development financing, investment protection, compensation of human rights victims, and sovereign debt crises. The claims resulting from the proliferation of financial activity are not limited to those primarily involving financial obligation (e.g. loans and grants) but include secondary obligation resulting from the law on international responsibility. Among the many instances of financial obligation covered in this study, the reader will find inter-State financial transactions, inter-State sale of goods, transnational services such as telecommunications and post, the financial operations of multilateral institutions, loans, grants and guarantees provided by the various international financial institutions, certain financial relations between non-State actors (including natural persons) and States, intergovernmental organizations or other international legal actors, and government loans to international organizations. Rich in historical detail and systematic in its coverage of contemporary law, this book will be valued by all practitioners and scholars with an interest in the nature of international financial obligation.

science and technology innovations which are regarded as the important components of the '4th Industrial Revolution'. The volume has been developed from Bangladesh's 'Vision 2041' agenda which includes development actions needed to catch up with more developed nations. Most importantly, the goals of the 'Vision 2041' have been taken from the dreams of the architect of independent Bangladesh, Bangabandhu (Friends of Bengal) Sheikh Mujibur Rahman. His dream was to make Bangladesh the Switzerland of Asia. The Father of Bangladesh Nation was killed by assassins' bullets along with his most of the family members in August 1975. After his death, the nation moved backwards while recovering from nine months of liberation post war in 1971. Between 1975 and 1990 Bangladesh was ruled by military and quasi military governments. Bangladesh established a true democratic regime in 1996 with Sheikh Mujib's daughter, Sheikh Hasina, who formed the government after 21 years with a mandate to realise the dreams of her father. Sheikh Hasina, had her own 20 year vision for Bangladesh, called, 'Vision 2021', with plans to make the nation poverty free by 2021. After a pause between 2001 and 2008, Sheikh Hasina returned to power in 2009. Under her consecutive three terms she brought Bangladesh back on track and Bangladesh is one of the nations which reduced poverty half under MDGs by 2015. During her third consecutive term

This volume aims to identify and mitigate the challenges of '4th Industrial Revolution' investigating the areas of science and technology innovations for Bangladesh and for other parts of the world keeping in mind establishing a sustainable economy under UN agendas to 2030 (SDGs). The primary audience for this book are UN development agencies, academic institutions, government policymakers and business leaders of the more developed and developing nations alike.

This anthology addresses challenges associated with such delayed justice: the location, treatment, and assessment of old evidence. Part I considers the topic from the perspective of different actors involved in the prosecution of core international crimes at the domestic and international levels. Part II comprises chapters focusing on the efforts of the Bangladeshi authorities to investigate and prosecute international crimes perpetrated during the 1971 war. This book brings together experienced judges, prosecutors, lawyers, scientists, and commentators who have dealt with questions of old evidence in their work. Among the contributors are Shafique Ahmed, Andrew Cayley, David Cohen, Seena Fazel, Siri S. Frigaard, M. Amir-Ul Islam, Md. Shahinur Islam, Agnieszka Klonowiecka-Milart, Alphons M.M. Orie, Stephen J. Rapp, Patrick J. Treanor, Otto Triffterer and Martin Witteveen. The chapters describe the challenges encountered in practice and suggest concrete solutions that can be tailored to fit the circumstances of the case or country. By
