Educators and school psychologists throughout the country are working with growing numbers of English language learners (ELLs), but often feel unprepared to help these students excel. This highly informative book presents evidence-based strategies for promoting proficiency in academic English and improving outcomes in a response-to-intervention (RTI) framework. Illustrated with a detailed case example, the book describes best practices for working with K-5 ELLs in all stages of RTI: universal screening, progress monitoring, data collection, decision making, and intensifying instruction. In a large-size format with lay-flat binding for easy photocopying, the book includes more than two dozen reproducible worksheets. Purchasers get access to a Web page where they can download and print the reproducible materials. This book is in The Guilford Practical Intervention in the Schools Series, edited by T. Chris Riley-Tillman.

Much has been written about the cognitive and academic language needs of those learning English as a new language (be it a second language in the United States or other English-speaking countries or as a foreign language in all other parts of the world). Many guidebooks and professional development materials have been produced on teacher collaboration and co-teaching for special education, inclusive classrooms. Similarly, much has been published about effective strategies teachers can use to offer more culturally and linguistically responsive instruction to their language learners. However, only a few resources are available to help general education teachers and ESL (English-as-a-second-language) specialists, or two English-as-aforeign-language (EFL) teachers (such as native and nonnative English speaking) teachers to collaborate effectively. With this volume, our goal is to offer an accessible resource, long-awaited by educators whose individual instructional practice and/or institutional paradigm shifted to a more collaborative approach to language education. Through this collection of chapters, we closely examine ESL/EFL co-teaching and other collaborative practices by (a) exploring the rationale for teacher collaboration to support ESL/EFL instruction, (b) presenting current, classroom-based, practitioner-oriented research studies and documentary accounts related to co-teaching, co-planning, co-assessing, curriculum alignment, teacher professional development, and additional collaborative practices, and (c) offering authentic teacher reflections and recommendations on collaboration and co-teaching. These three major themes are woven together throughout the entire volume, designed as a reference to both novice and experienced teachers in their endeavors to provide effective integrated, collaborative instruction for EFL or ESL learners. We also intend to help preservice and inservice ESL/EFL teachers, teacher educators, professional developers, ESL/EFL program directors, and administrators to find answers to critical questions.

As a result of the COVID-19 pandemic, most schools had to suddenly shift from traditional face-to-face courses to blended, synchronous, and asynchronous instructional environments. The impact upon the immediacy of remote learning was overwhelming to many faculty, instructional facilitators, teachers, and trainers. Many faculty and trainers have experience with the analysis, design, development, implementation, and evaluation of online and blended learning environments, while many faculty and trainers also do not have this knowledge nor experience. As such, the collegial workspace has developed into a collaborative work environment wherein the faculty are helping faculty, partially because the instructional designer staff and learning advisors are overwhelmed with the number of course projects that must be moved from traditional face-to-face course environments into an online environment within a short period of time. The faculty are helping each other make this move, offering course design and development support and also instructional tips and tricks that will support successful blended and online experiences that enhance learning outcomes. Shifting to Online Learning Through Faculty Collaborative Support focuses on supporting and enhancing blended and distance learning course design and development, successful tips for course design and teaching, techniques for online learning, and embracing collegial mentorship and facilitative support for course and faculty success. This book highlights the strength of collegial bonds while discussing tools, methods, procedural efforts, styles of engagement, learning theories, assessment efforts, and even social learning engagement implementations in online learning. It provides information and lessons and embraces a long-term approach towards understanding institutional impact and collegial support. This book is valuable for school administrators, teachers, course designers, instructional designers, school faculty, business and administrative leadership, practitioners, stakeholders, researchers, academicians, and students interested in how faculty collaborative support is playing a critical role in improving and developing successful online learning.

This volume identifies resources, models, and specific practices for improving teacher preparation for work with second language learners. It shows how faculty positioned themselves to learn from resources, experts, preservice teachers, their own practice, and each other. The teacher education professionals leverage their experience to offer theoretical and practical insights regarding how other faculty could develop their own knowledge, improve their courses, and understand their influence on the preservice teachers they serve. The book addresses challenges others are likely to experience while improving teacher preparation, including preservice teacher resistance, the challenge of adding to already-packed courses, the difficulty of recruiting and retaining busy

faculty members, and the question of how to best frame the larger issues. The authors also address options for integrating the work of improving teacher preparation for linguistic diversity into a variety of different teacher education program designs. Finally, the book demonstrates a data-driven approach that makes this work consistent with many institutions' mandate to produce research and to collect evidence supporting accreditation.

This Capstone examined effective strategies of instruction in order create a curriculum unit on American symbols and holidays for third grade English Language Learners (ELLs). Many areas of instruction were examined in order to create the curriculum. The cognitive levels of students in grade three, differentiation in terms of Howard Gardner's Multiple Intelligences, and effective instruction for ELLs were all key research areas. The research uncovered the Sheltered Instruction Observational Protocol (SIOP) model as a mode for ELL instruction. The SIOP model was used as the lesson plan template for the curriculum. Research and planning led to a comprehensive unit on American Traditions: Symbols and Holiday which focus on the key symbols of the: Liberty Bell, Bald Eagle, American Flag, and White House. Fourth of July and Martin Luther King Jr. Day were the important holidays addressed in this unit.

ESL Readers and Writers in Higher Education describes the challenges ESL students in U.S. postsecondary institutions face when studying in a second language, and offers suggestions for how teachers, advisors, tutors, and institutions might provide support that meets the reading and writing needs of this very important student population. Because the ESL profession as a whole, including what professionals are doing in the classroom, sits under the umbrella of an institutional response to a language-related challenge, some solutions aimed at helping students achieve optimal proficiency lie outside of the classroom. As such, this book is

based on the assertion that language development support is not the sole responsibility of language teachers. Everyone on campuses that hosts ESL students bears some responsibility for these students' language development. Chapters are therefore, intentionally adapted to appeal to a wide variety of readers from classroom teachers, and teachers in training, to admissions officers, academic advisors, and international student advisors.

Standardized tests have been selected as a key assessment factor in expanding the academic achievement of the national student population. However, these tests position immigrant students at the risk of academic failure, leading education experts to search for new strategies and teaching models. The Handbook of Research on Assessment Practices and Pedagogical Models for Immigrant Students is a critical research publication that focuses on research-based pedagogical practices for teaching immigrant students. Edited by a prominent IGI Global editor, this book examines the latest professional development models and assessment practices of English learners (ELs). Covering essential topics such as second language acquisition (SLA), classroom management, teacher education, refugee resettlement programs, and more, this publication is a valuable resource for academicians, professionals, researchers, administrators, faculty, and classroom teachers as the social and academic needs of English language learners continue to present a challenge for many schools and teachers.

The book, Teaching ELLs Across Content Areas: Issues and Strategies, is a unique, useful text written for K–12 teachers. This book is the culmination of the professional knowledge, expertise, and experience from the distinguished authors who represent the entire range of the content areas, including: language arts, science, mathematics, technology, arts, psychology, and Hispanic studies. The ELL school population has reached 5.3 million with the increase rate of 51 percent from School Year 1998-1999 to 2008-2009 (NCELA, 2012). By 2025, one out of four K-12 students will be ELLs (NEA Policy Brief, 2013). The NEA data states

that the ELLs are the fastest-growing student population group in our schools and providing them with high-quality services and programs is an important investment in America's future (NEA Policy Brief, 2013). With the fast growth of the ELLs in schools, basic information and strategies are needed by all K-12 teachers. This book provides useful information and strategies for all K-12 teachers in content classrooms. This book has three significances. First, the book provides the most needed information for K-12 teachers with issues and strategies that are important in content areas to help ELLs' success. With the fast growth of the ELLs in schools, K-12 teachers need this information in content classrooms. Second, the book fills the gap related to teaching ELLs in content areas. There are some existing books with titles on teaching ELLs across content areas; yet, these books provide general information with fewer books that really address specific content topics. This book is unique because it has the dedicated chapters for specific content areas, e.g., Language Arts, Science, Math, Social Studies with issues and strategies in these respective contents as well as general information, e.g., L2 theories for teachers to know and work with ELLs. Third, the book is reader-friendly with carefully crafted chapters. Each chapter begins with a scenario to catch the reader's attention, is followed by issues and strategies, and ends with a summary. A scenario begins with each chapter for teachers to get to know the ELLs with the content that focuses on the related information and teaching strategies. With the continued increase in the ELL school population, this book is intended helping all K-12 teachers in content areas have knowledge and strategies to better serve their ELLs.
