This book is a comprehensive guide to lower urinary tract dysfunction that draws extensively on actual urodynamic traces and patient cases to ensure that the imparted knowledge will be readily transferable to clinical practice. The impressive collection of clinical cases is used to illustrate basic concepts of lower urinary tract function and to document urodynamic findings and typical patterns in a wide range of commonly encountered conditions. In addition, attention is drawn to frequent pitfalls and artifacts. Readers will be able to assess their skill in reaching the correct diagnostic conclusion in each case, as in addition to the urodynamic trace a full set of information is provided on aspects such as patient history, physical examination, voiding diary, laboratory examination, imaging studies, and cystourethroscopy, thereby directly simulating real-life clinical practice. The presented cases are drawn from the large clinical database that Professor Seung-June Oh has prospectively accumulated during the past 16 years of clinical practice. The book will be invaluable for residents and other practitioners and will also be of interest for medical students.

Is emergency management education undoing an age-old tradition in the American Fire Service? Has the time arrived to educate emergency managers in college classrooms rather than in twenty years of tactical operations experience? Over one hundred forty-three (143) institutions of higher education are now offering certificate or degree programs in emergency management with no tactical operations experience required for admission. Resistance by veteran law enforcement officers and fire fighters may have to be overcome if we are to prepare emergency managers with required skill sets. Dr. Tom Phelan explores the skills being taught to emergency management students and addresses the concerns of experienced first responders in accepting their leadership. \*Discusses the value of emergency management education in the post-9/11 world \*Makes clear the need for educating emergency managers to prepare them for emergency manager leadership \*Helps bridge the gap between emergency management and first responders \*Should be required reading in every college

FEMA's Community Emergency Response Team (CERT) Basic Training Instructor Guide is a critical program in the effort to engage everyone in America in making their communities safer, more prepared, and more resilient when incidents occur. Community-based preparedness planning allows you and others interested from your community to prepare for and respond to anticipated disruptions and potential hazards following a disaster. As individuals, we can prepare our homes and families to cope during that critical period. Through pre-event planning, neighborhoods and worksites can also work together to help reduce injuries, loss of lives, and property damage. Neighborhood preparedness will enhance the ability of individuals and neighborhoods to reduce their emergency needs and to manage their existing resources until professional assistance becomes available. The purpose of the CERT Basic Training is to

provide you and others in your community who complete this course with the basic skills that they will need to respond to their community's immediate needs in the aftermath of a disaster, when emergency services are not immediately available. This course will be beneficial to individuals who desire the skills and knowledge required to prepare for and respond to a disaster. Instructors for these community courses usually range from skilled fire and rescue instructors that have completed the CERT Train-the Trainer course and are knowledgeable about the CERT model, different types of hazards that present greatest risks for communities, local building structures that may present greatest hazard in disaster events, community's emergency operation plans, and licensed Paramedics or Emergency Medical Technicians and nurses for providing hands-on knowledge relating to disaster medical operations Related items: FEMA's companion product-- CERT Basic Training Participant Manual can be found here: <https://bookstore.gpo.gov/products/sku/027-002-00627-5> Emergency Management & First Responders publications can be found here:

Audience: As each CERT is organized and trained in accordance with standard operating procedures developed by the sponsoring agency, its members select an Incident Commander/Team Leader (IC/TL) and an alternate and identify a meeting location, or staging area, to be used in the event of a disaster. This publication is ideal for the chosen IC/TL, and members of the CERT may want to consult this manual to understand the responsibilities of the IC/TL.

Read a fascinating interview with editor Tener Goodwin Veenema! Tener Veenema Interview Disaster planning and emergency preparedness have never been more critical to the nurses who serve as our front-line response. Today's pandemic threats of global terrorism, disease, and natural disasters make this comprehensive handbook of best practices a necessity--meeting the need for a nursing workforce that is adequately prepared to respond to any disaster or public health emergency. In addition to a thorough update based on the most recent recommendations, this second edition contains six new chapters: Emergency Health Services (EMS and other first responders) Burn Assessment and Management Explosive & Traumatic Terrorism Caring for High-Risk, High-Vulnerability Patients Emerging Infectious Disease (avian and other flu pandemics) Chemical Decontamination All content reflects the guidelines provided in the Federal Disaster Response Plan and the National Incident Management System (NIMS) and therapeutic recommendations from the national Centers for Disease Control and Prevention. Disaster Nursing will prepare any nurse or EMS team to provide health care under a variety of disaster conditions. Averting a School Crisis explains to its readers how to begin the school preparedness planning process for all the incidents your school can face.

General concepts; Document data bases for computer search; Question logic and format; Data structures for storage and retrieval; Structure of search programs; Vocabulary characteristics of document data bases; Information theory considerations; Coding and compression of data bases; Example of design of a document retrieval system; Document indexing and term associations; Automatic question modification; Automatic document classification; Concluding remarks. This is the first book exploring the unique dynamics created by a multidisciplinary trauma team and how crisis management strategies can improve teamwork and communication and, potentially, improve patient resuscitation outcomes. Crisis resource management (CRM) is integral to the way that we manage ourselves, team members, and patients during emergency situations. It is essentially the ability to translate knowledge of what needs to be done into effective actions during a crisis situation. Building on the revolutionary American College of Surgeons Advanced Trauma Life Support (ATLS®) course, Trauma Team Dynamics illustrates the integration of the principles of CRM to team dynamics throughout the resuscitation –from the scene, through pre-hospital care and transport, to the trauma bay, and finally to definitive care and beyond. The editors and contributors are international experts in trauma, critical care, emergency medicine, nursing, respiratory therapy, and pre-hospital care and include NASA- and United States military-affiliated experts. Trauma Team Dynamics is intended for use as both a day-to-day clinical resource and a reference text, and includes self-assessment questions as well as guidance on CRM curriculum design and implementation.
