This edited volume is about the Australian difference and how Australia's economic and social policy has diverged from the approach of other countries. Australia seems to be following a 'special path' of its own that it laid down more than a century ago. Australia's distinctive bent is manifested in a tightly regulated labour market; a heavy reliance on means testing and income taxation; a geographical centralization of political power combined with its dispersal amongst autonomous authorities, and electoral singularities such as compulsory and preferential voting. In seeking to explain this Australian Exceptionalism, the book covers a diverse range of issues: the strength and weakness of religion, democratic and undemocratic tendencies, the poverty of public debate, the role of elites, the exploitation of Australian sports stars, the politics of railways, the backwardness of agriculture, deviation from the Westminster system, the original encounter between European and Aboriginal cultures, and the heavy taxation of tobacco. Bringing together contributions from economists, economic historians, and political scientists, the volume seeks to understand why Australia is different. It offers a range of explanations from the 'historical legacy', to material factors, historical chance, and personalities.

The mission of the International Journal of Educational Reform (IJER) is to keep readers up-to-date with worldwide developments in education reform by providing scholarly information and practical analysis from recognized international authorities. As the only peer-reviewed scholarly publication that combines authors' voices without regard for the political affiliations perspectives, or research methodologies, IJER provides readers with a balanced view of all sides of the political and educational mainstream. To this end, IJER includes, but is not limited to, inquiry based and opinion pieces on developments in such areas as policy, administration, curriculum, instruction, law, and research. IJER should thus be of interest to professional educators with decision-making roles and policymakers at all levels turn since it provides a broad-based conversation between and among policymakers, practitioners, and academicians about reform goals, objectives, and methods for success throughout the world. Readers can call on IJER to learn from an international group of reform implementers by discovering what they can do that has actually worked. IJER can also help readers to understand the pitfalls of current reforms in order to avoid making similar mistakes. Finally, it is the mission of IJER to help readers to learn about key issues in school reform from movers and shakers who help to study and shape the power base directing educational reform in the U.S. and the world.

In early 20th-century Yemen, a sizable Jewish population was subject to sumptuary laws and social restrictions. Jews regularly came into contact with Islamic courts and Muslim jurists, by choice and by necessity, became embroiled in the most intimate details of their Jewish neighbors' lives. Mark S. Wagner draws on autobiographical writings to study the careers of three Jewish intermediaries who used their knowledge of Islamic law to manipulate the shari'a for their own benefit and for the good of their community. The result is a fresh perspective on the place of religious minorities in Muslim societies.

This textbook provides a clear and readable introduction to the subject. It deals with organizational design, its contribution to performance, and the problems and issues involved in organizational change. This text assumes little academic knowledge, and some familiarity with work in organizations. It is of real use to decision makers, and to those in management education, both teachers and students.

This book discusses an emerging field of decision science that focuses on business processes and systems used to extract knowledge from large volumes of data to provide significant insights for crucial decisions in critical situations. It presents studies employing computing techniques like machine learning, which explore decision-making for cross-platforms that contain heterogeneous data associated with complex assets, leadership, and team coordination. It also reveals the advantages of using decision sciences with management-oriented problems. The book includes a selection of the best papers presented at the 2nd International Conference on Decision Science and Management (ICDSM 2019), held at Hunan International Economics University, China, on 20–21 September 2019.
