The already breathtaking pace of change experienced in the second decade of the 21st century is likely to continue and perhaps even accelerate in the years ahead. In his new book, Challenges and Opportunities in Exponential Times, Dr. Demirdjian confronts the issue of pervasive change head on. The author identifies important global, technological, social, and environmental dimensions of change and discusses them in a succinct but compelling manner. This book should be of value to today's students, executives and all those who have keen interest in science and technology. The future ideas and innovations presented here are cerebrally stimulating. These readers will receive the full force of change and yet will also have the greatest stake in the future.

This three-paper dissertation addresses gaps in the literature focused on distracted driving and the impact of regulations aimed at reducing its prevalence. With the widespread proliferation of mobile phone usage and more sophisticated in-vehicle entertainment and information systems, it is now commonplace for drivers to engage in non-driving activities (also referred to as "secondary tasks") while driving. It is widely believed that distracted driving is positively related to motor vehicle crashes and other undesirable driving outcomes. This dissertation specifically focuses on three topics: (1) the nature of the distracted driving literature given the numerous secondary tasks, driving performance outcomes, and study settings examined and used by researchers, (2) the impact of texting messaging regulations on motor vehicle crash-related fatalities, and (3) the impact of text messaging regulations on motor vehicle crash-related hospitalizations. The first study in this dissertation is a systematic review of studies that examined the relationship between selected distracted driving activities and various driving performance outcomes. It quantifies the proportion of existing studies that have focused on specific distracting activities (mobile phone use, cigarette smoking, listening to music, etc.) and specific driving performance outcomes, (e.g. crashes, injuries, fatalities, following distance). The first paper also identifies the types of studies that are more likely to find detrimental relationships between secondary tasks and driving performance outcomes. The second paper in this dissertation examines whether states that have prohibited text messaging while driving have seen decreases in motor vehicle crash-related fatality counts. Because text messaging restrictions are nuanced across states, this paper will additionally determine whether more stringent and comprehensive restrictions result in the greatest decreases in fatality counts. The third paper of this dissertation will determine whether states with primarily enforced text messaging restrictions have seen decreases in motor vehicle crash-related hospitalization counts.

Singapore's leading tech magazine gives its readers the power to decide with its informative articles and in-depth reviews.

FUSION: INTEGRATED READING AND WRITING, Book 2 is a developmental English book for reading and writing at the essay level. It connects the reading and writing processes so that they are fully reciprocal and reinforcing, using parallel strategies that guide students in analyzing reading to generate writing. FUSION teaches critical reading strategies in conjunction with the shared writing traits, such as main idea, details, and organization, and teaches the types of writing (including research) that students will encounter in their future courses. Grammar instruction is integrated in authentic writing, using high-interest professional and student models. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Are older drivers posing increasing risk to the public? If so, what public policies might mitigate that risk? Older drivers (those 65 and older) are slightly likelier than drivers aged 25 to 64 to cause an accident, but drivers aged 18 to 24 are nearly three times likelier than older drivers to do so. The authors of this paper conclude that stricter licensing policies targeting older drivers would likely not improve traffic safety substantially.

This book has been generated by the EC-funded Dedicated Road Infrastructure for Vehicle Safety in Europe DRIVE collaborative research programme. it brings together work on driver behaviour, traffic safety, and human- machine interfacing to review the state of the art in Europe in terms of systems specification, design, evaluation, and implementation for near- future vehicles.; Changes in vehicle functionality will be fundamental through the 1990's, and this book demonstrates that a purely technology driven approach is a recipe for disaster; integrated and co-ordinated multidisciplinary initiatives in complex system design are preferable and are more likely to deliver system efficiency, acceptability, and safety.; It is aimed at transport ergonomists, vehicle designers, HCI researchers, applied psychologists and cognitive ergonomists.

"Clearing the Last Hurdle: Mapping Success on the California Bar Exam guides students through the process of bar preparation with clear and organized instruction, innovating strategies (like mind maps-an innovative tool for improving memory and associating concepts), and practice questions in all formats for the California Bar Exam's essay exams, Multistate Bar Exam, and performance test"--

This book is the collection of the Abstract / Short Papers submitted by the authors of the International Conference of The CLAssification and Data Analysis Group (CLADAG) of the Italian Statistical Society (SIS), held in Milan (Italy) on September 13-15, 2017.

Attention, Web writers! This book will show you how to craft prose that grabs your guests' attention, changes their attitudes, and convinces them to act. You'll learn how to make your style fast, tight, and scannable. You'll cook up links that people love to click, menus that mean something, and pages of text that search engines rank high. You'll learn how to write great Web help, FAQs, responses to customers, marketing copy, press releases, news articles, e-mail newsletters, Webzine raves, or your own Web resume. Case studies show real-life examples you can follow. No matter what you write on the Web, you'll see how to personalize, build communities, and burst out of the conventional with your own honest style.

The only endorsed resources for the Cambridge International AS Level English General Paper syllabus. Through exploration of a wide array of topics, from celebrity culture to poetry in the modern world, this book focuses on strengthening communication, evaluation, analysis, application and understanding skills. Helping students improve their written responses, use of English and comprehension, this coursebook looks at discussion points relevant to the globally-minded classroom. With frequent practice questions and sample answers, students have plenty of opportunities to build their confidence answering questions. Answers to coursebook questions are in the teacher's resource.

This book presents selected papers of 12 Workshops held in conjunction with the 28th International Joint Conference on Artificial Intelligence, IJCAI 2019, in Macao, China, in August 2019. The workshops included in this volume are: AI4KM 2019: 7th International Workshop on Artificial Intelligence for Knowledge Management and Innovation. FinNLP 2019: First International Workshop on Financial Technology and Natural Language Processing. OR 2019: 32nd International Workshop on Qualitative Reasoning. SURL 2019: Second International Workshop on Scaling-Up Reinforcement Learning. First International Workshop on Bringing Semantic Knowledge into Vision and Text Understanding. EASyHAT 2019: First International Workshop on Evaluation of Adaptive Systems for Human-Autonomy Teaming. ACAN 2019: 12th International Workshop on Agent-based Complex Automated Negotiations. First International Workshop on Deep Learning for Human Activity Recognition. HAI 2019: Second International Workshop on Humanizing AI. International Workshop on Language Sense on Computer. AISafety 2019: International Workshop on Artificial Intelligence Safety. DeLBP 2019: 4th International Workshop on Declarative Learning Based Programming.

Consists of reprints of articles from various journals.

This book constitutes late breaking papers from the 22nd International Conference on Human-Computer Interaction, HCII 2020, which was held in July 2020. The conference was planned to take place in Copenhagen, Denmark, but had to change to a virtual conference mode due to the COVID-19 pandemic. From a total of 6326 submissions, a total of 1439 papers and 238 posters have been accepted for publication in the HCII 2020 proceedings before the conference took place. In addition, a total of 333 papers and 144 posters are included in the volumes of the proceedings published after the conference as "Late Breaking Work" (papers and posters). These contributions address the latest research and development efforts in the field and highlight the human aspects of design and use of computing systems. The 59 late breaking papers presented in this volume address the latest research and development efforts in the field and highlight the human aspects of design and use of computing systems.
