

The Great Depression Begins Guided Reading

Library Journal: This book provides historical perspective on two of today's important public issues: farm income and hunger. It analyzes the origins of a national food assistance policy during the Thirties, when an attempt to solve the seeming paradox of simultaneous hunger and food surplus drove much of the public debate. Poppendieck demonstrates that food programs came to be seen by an organized farm lobby as a way of alleviating huge farm commodity surpluses. Unraveling the interrelated and complex agricultural and assistance policies, particularly for those unfamiliar with the terminology and bureaucracy, requires a good deal of skill. Poppendieck largely succeeds. The story she tells of good intentions gone bad, however, does not offer much hope for policy solutions to current farm and hunger problems.

"On October 29, 1929, life in the United States took a turn for the worst. The stock market the system that controls money in America plunged to a record low. But this event was only the beginning of many bad years to come. By the early 1930s, one out of three people was not working. People lost their jobs, their houses, or both and ended up in shantytowns called Hoovervilles named for the president at the time of the crash. By 1933, many banks had gone under. In the Geographic Center of Montana sits Lewistown, whose rich history is still reflected in today's streets. A testament to the homesteading boom at the turn of the century, Lewistown grew with the surrounding communities. A service center, rail stop, and county seat, its population tripled between 1900 and 1910, then doubled again by 1920. It was not to last. Drought and agricultural depression drove thousands of homesteaders from the land in the 1920s and 1930s; Lewistown's boom had ended. But preserved from that heady period of expansion are the exceptionally crafted business blocks, homes, churches, often built of 'Lewistown red' brick or local sandstone. This architectural heritage awaits your discovery, on the streets of Lewistown and through this lively guide.

Professor Wicker reconstructs a close historical narrative of each of the disturbances, investigating their origins, magnitude and effects, and he reappraises the role of Federal Reserve officials in the panics. His findings challenge many of the commonly-held assumptions about the events of 1930 and 1931, and will be of wide interest to students of the Great Depression, monetary and financial historians, financial and macroeconomists.

The Great Depression was a global phenomenon: every economy linked to international financial and commodity markets suffered. The aim of this book is not merely to show that China could not escape the consequences of drastic declines in financial flows and trade but also to offer a new perspective for understanding modern Chinese history. The Great Depression was a watershed in modern China. China was the only country on the silver standard in an international monetary system dominated by the gold standard. Fluctuations in international silver prices undermined China's monetary system and destabilized its economy. In response to severe deflation, the state shifted its position toward the market from laissez faire to committed intervention. Establishing a new monetary system, with a different foreign-exchange standard, required deliberate government management; ultimately the process of economic recovery and monetary change politicized the entire Chinese economy. By analyzing the impact of the slump and the process of recovery, this book examines the transformation of state-market relations in light of the linkages between the Chinese and the world economy.
