Anani Israel-Clark has written another powerful spiritual guide to teach people how to manage their financial resources. The 7 Spiritual Laws of Money brings into existence the biblical principles needed to break the financial bondage of people living from pay check to pay check. Like all the other spiritual laws of God, the 7 Spiritual Law of Money are unchanging and are based on obedience. If the laws of money are obeyed, positive things will happen to your finances and if the laws of money are ignored, negative things will happen to your finances. The author says, "If you obey God's purpose for money in accordance with His plans for your financial prosperity, you will learn how to build wealth for your life and secure the future inheritance of your children, their children and their children's children." In this insightful book you will learn how to: ?Recognize God as the owner of everything on the earth and in heaven ?Give God what is rightfully His in Tithes and Offerings ?Pay yourself first before paying everyone else ?Make your money work for you through investments ?Distinguish needs from wants and become discipline in your spending ?Give to the poor while teaching them the way out of poverty ?Leave a financial inheritance to future generations

The expiry of the 1992 deadline for the completion of the internal market programme, in which particular emphasis was laid on financial service legislation, the crisis in the European Monetary System in late 1992, and the entry into force of the Maastricht Treaty with its detailed timetable for economic and monetary union, make it a particularly appropriate time to examine the law of money in the EC. The greater part of the book is concerned with the application of both general and specific EC legislation to monetary movements and the provision of financial services, but it also aims to explain the legal framework behind the development of the ECU and the EMS, and to see how the Maastricht provisions (including derogations and opt-outs) may be related both to the development of the internal market and the previous institutional structure.

There are specific laws that many billionaires in the world, from the United States to China, including Europe and other continents, follow in order to obtain their fortune. Every day, even as the economy shows instability and experiences downturns, many new billionaires are made. And they have things in common, no matter how old or young they may seem. They share the same paradigm about how to make money, and their habits match money making laws. Bill Gates, Steve Jobs, Sir Richard Branson and many others, have secrets they've learned through hard work, accumulated failures and life experience. We admire the personality of successful individuals and what they do, not knowing that behind them there are spiritual laws that cross time and have been with us for millions of years. Gaining profit in any activity has always been submitted to the same codifications, God's codes. And, they're related to the laws of energy and karma. The theory of the law of attraction isn't anywhere near showing us these codes or explaining them. Besides, science and, more precisely, mathematics and physics are still closed inside numbers and molecules, not really allowing the common citizen to apply such principles in his daily life to change reality. In fact, there's no interest in providing society with the power to change reality with precise and scientifically proven formulas. On the other hand, why would millionaires, spending their life struggling to get this knowledge, give it to you for free, while making you a potential competitor of what they fought so hard to achieve? These are top secrets, greater than any others, because, money, whatever you may have heard about it, is power, at least in our physical world. Nonetheless, this thing that we call money, follows, as anything else in this planet, divine laws, because this world has specific rules with specific purposes as well. And, independently of how much a country may be misguided by its culture or government, these laws still apply. After years studying the law of attraction profoundly and with the help of the best teachers in this field, studying religious philosophies with some of the fastest growing religious societies, and learning some of the most well-hidden spiritual secrets about money, both in close door meetings for a few selected individuals and with some of the biggest world billionaires currently living in Asia, the final point that allowed me to combine this entire data under one single guideline was reached. Furthermore, I would probably never truly understand the application of many spiritual theories, if I hadn't seen how they apply in, for example, an Indian business owner that got rich after three bankruptcies, or billionaires in China and Singapore, that built their entire fortune out of nowhere, with no help, no education or even money in their pockets. Observing how fast these individuals can double, and even triple, their income, in just a few weeks or years, leaves no doubt regarding the power of these laws and their truth, despite what the majority may think about it. Besides, it's only normal that most people won't ever agree with these principles, and will even criticize and mock them, as

that's why they don't control the flow of wealth as some do. The ones we call the 1% aren't the 99% for a very important reason. The time has come to reveal these secrets and this book is very likely one of the most resumed and clearer about this issue that can be found. It has actually been advertised as the best book about money ever read, by experts in finance, managers of international banks and stockbrokers, promoting it online as an interesting and inspirational work.
