Whether investigating a solution to global warming or explaining why the price of oral sex has  
fallen so drastically, Levitt and Dubner mix smart thinking and great storytelling to show how  
people respond to incentives.

A history of the rise and fall of the twentieth century's leading information empires traces how Hollywood, the broadcast networks, and AT&T introduced new mediums that were eventually centralized in ways that shaped America's communications practices.

receptors that can recognize a single neurotransmitter a bit like a lock would recognize a key. They do this by activating or inhibiting a class of specialized signaling proteins and second messengers. Typically, signaling proteins are themselves organized in networks or pathways in which they activate or inhibit each other in order to integrate the mass of information received by a single cell and to regulate the biological functions of this cell. As we can see, rather than simply being a network of neurons, the brain can be seen as a sort of “Russian doll” in which each neuron is at the same time a part of networks with other neurons and the receptacle of many networks composed of signaling proteins. Two individual genes encode two paralogous signaling proteins: Glycogen Synthase Kinase -3 alpha and beta (GSK-3a, GSK-3b), named for its ability to phosphorylate a key metabolic enzyme of glycogen synthesis, glycogen synthase. This unique “glamour and gloom” protein kinase, has been intriguing many researches for over 30 years by its unusual features, still unknown mechanisms of its activation, its regulation by multiple “key” intracellular pathways, and its capacity to influence the functions of many substrates. Since GSK-3 was discovered, there has been significant progress in elucidating its regulatory roles in the neuron and the structure and functions of the brain. Lithium has been used as a gold standard in the treatment of bipolar disorder for 60 years; and “GSK-3’s renaissance” in psychiatry began with the discovery of GSK-3 as lithium's intracellular target. Since then, GSK3 has been implicated in the pathogenesis of mood disorders, schizophrenia, Alzheimer’s disease,

ADHD, multiple sclerosis, Fragile X syndrome and Huntington disease. Connections to these and other diseases has led over the last 10 years to the generation of multiple types of GSK-3 inhibitors as promising therapeutic treatments for the aforementioned pathological conditions. During last couple years new genetic models have been generated, including conventional and conditional mouse models, allowing the discovery of new roles of GSK-3 in the mechanism of neurotransmitter action, neurodevelopment, learning and memory formation, GSK-3's gene - effect on mouse behavior, and other functions. Thus, GSK-3 has been well-established as an intracellular second messenger for several neurotransmitter systems, and as an important therapeutic target of mood stabilizers, antipsychotics and psychomimetic drugs. The proposed Specific Topic for Frontiers in Neuroscience will be focused on the latest advances from leading laboratories in this area, subdivided into 5 topics: (1) GSK-3 history, mechanism of regulation, substrate specificity and comparison between the brain function of two GSK-3 genes through new animal models and cell biology approaches; (2) role of GSK-3 in neurodevelopment and neuronal structure; (3) involvement of GSK-3 in synaptic functions, learning and memory, and in serotonin and dopamine pathways; (4) role of GSK-3 in neuroinflammation, and application to the pathogenesis of multiple sclerosis, AD, schizophrenia, Fragile X, brain tumors, stroke and bipolar disorder; (5) development of GSK-3 inhibitors and their application in psychiatry, including special discussion about the mechanism of lithium action.

Traditional Chinese edition of Battle Hymn of the Tiger Mother by Amy Chua, a professor at Yale Law School. The headline "Why Chinese Mothers Are Superior" in the January 8, 2011 Wall Street Journal about the book, an instant bestseller (ranked #4 on Amazon as of 1/2011), has raised the debate on the merits of parenting Chinese or Western style to an unprecedented level, in America as well as in Chinese reading communities. Other bestselling titles on the subject of parenting mentioned in a related Wall Street Journal article: "In China, Turning Away From Tough Love," also published January 8, 2011, are available on [www.BooksWindow.com](http://www.BooksWindow.com) as well: A Good Mom is Better Than a Good Teacher by Yin Jianli (Simplified Chinese edition 9787506345040); My Kid is a Medium-Ranking Student by Fang Gang (Simplified Chinese edition 9787807335344); Catching Childrens Sensitive Periods by Sun Ruixue (Simplified Chinese edition 9787802038257); Children are from Heaven by John Gray (traditional Chinese edition 9789861772158); and How to Talk So Kids Will Listen by Adele Faber and Elaine Mazlish (simplified Chinese edition 9787802115279, Vietnamese edition 8932000115120). Simplified Chinese edition (9787508626116) is also available. In Chinese. Distributed by Tsai Fong Books, Inc.

Traditional Chinese edition of The Greatest Generation

The must-read summary of Tim Wu's book: "The Master Switch: The Rise and Fall of Information Empires". This complete summary of "The Master Switch" by Tim Wu, a renowned professor of law, presents his argument that information technology started
