

The Seeds Of Wither Chemical Garden 15 Lauren Destefano

Step into the Chemical Garden with an all-new eBook sampler! Discover the world author Lauren DeStefano created in Wither, a riveting dystopian thriller. In the not-so-distant future, fallout from genetic engineering causes all females to die at age twenty, and all males to die at twenty-five. Kidnapped from her home and torn from her twin brother Rowan, sixteen-year-old Rhine is forced into a polygamous marriage and taken to live in her husband’s mansion. She has everything she wants—except for freedom. But her plans to escape and return home are complicated by a devious father-in-law, as well as Rhine’s growing attraction to Gabriel, a servant who works on the estate. Read the first 100 pages of Wither and be captivated by Rhine’s journey. This eBook sampler includes an EXCLUSIVE, never-before-published short story by Lauren DeStefano! “The First Bride” reveals the events leading up to Wither, from the point of view of the bride that came before Rhine. Delve even deeper into Wither with a map of the wives’ floor, the Wither book trailer, and a video that takes you behind the scenes of the Fever cover shoot. You’ll also get a sneak peak of Fever, the second book in the Chemical Garden trilogy, before it goes on sale 2/21/12! Includes Red book price list section (title varies slightly), issued semiannually 1897-1906.

Chemical Ecology is a component of Encyclopedia of Chemical Sciences, Engineering and Technology Resources in the global Encyclopedia of Life Support Systems (EOLSS), which is an integrated compendium of twenty one Encyclopedias. The Theme on Chemical Ecology provides the essential aspects of the chemicals involved in the interactions of living organisms. It deals with studies involving defensive chemicals which are utilized to deter potential predators, which may attack a wide variety of species, animal interaction, aquatic ecosystems, chemical ecology and pest management, relation to medicine and pharmaceuticals. This volume is aimed at the following five major target audiences: University and College students Educators, Professional practitioners, Research personnel and Policy analysts, managers, and decision makers. Vols. for 1915-1956 include Proceedings of the Chemical Society, which resumed separate publication in 1957.

This book investigates the relationship between phytoconstituents and properties in specific plants, such as Hibiscus rosa sinesis, Cuscuta reflexa, Citrullus colocynthis, Nardostachys jatamansi and Ocimum gratissimum, that are used in hair care products including shampoos, conditioners, dyes, and oils. It explains the impact of these materials on the growth, structure, appearance, and health of hair. It also explores how the chemistry of certain plants from sustainable sources is exploited for use in hair products and nutraceuticals. Additionally, the authors include information on ingredients used for formulating 'green' hair products that treat common conditions such as canities, dandruff and alopecia.
