This book is not quite like other books about the Titanic. As the title suggests, it is an attempt to explore the more transcendental aspects of the Titanic story - those suggesting a non-mechanistic universe. The subjects include premonitions, apparitions, out-of-body experiences, telepathic communication among the living, and after-death

communication, many related to the Titanic passengers, others offered in support of the Titanic phenomena. Many of them have to do with other ocean tragedies. Chief among the Titanic passengers in this book is William T. Stead, a British journalist, who did not survive the disaster but apparently survived in another dimension, from which he communicated in the weeks following his death. . The Titanic story offers us the opportunity to examine death in a safe haven with the added bonus that, unlike most stories involving death, the parties actually have time to contemplate their death, some to escape, some to succumb. More than any other modern story, the Titanic might be viewed as a microcosm of life, a "community" isolated in the vast reaches of the ocean, one offering wealth and poverty, the opulence of first class and the ordinariness of steerage class, with a middle or second class in between. Every type of emotion, mindset, virtue and vice is represented - love and fear, hope and despair, bravery and cowardice, arrogance and humbleness, pomp and shame, selfishness and brotherhood. To accent it all, the iceberg impacted by the leviathan was reported as being a rare black berg looming high over the vessel, as if a giant evil predator. More than anything though, the Titanic story represents the struggle between man's inner and outer self, a struggle which many people are interested in but prefer to avoid except in books or movies.

In April 1912, six notable people were among those privileged to experience the height of luxury—first class passage on “the ship of dreams,” the RMS Titanic: Lucy Leslie, Countess of Rothes; son of the British Empire Tommy Andrews; American captain of industry John Thayer and his son Jack; Jewish-American immigrant Ida Straus; and American model and movie star Dorothy Gibson. Within a week of setting sail, they were all caught up in the horrifying disaster of the Titanic’s sinking, one of the biggest news stories of the century. Today, we can see their stories and the Titanic’s voyage as the beginning of the end of the established hierarchy of the Edwardian era. Writing in his signature elegant prose and using previously unpublished sources, deck plans, journal entries, and surviving artifacts, Gareth Russell peers through the portholes of these first-class travelers to immerse us in a time of unprecedented change in British and American history. Through their intertwining lives, he examines social, technological, political, and economic forces such as the nuances of the British class system, the explosion of competition in the shipping trade, the birth of the movie industry, the Irish Home Rule

Crisis, and the Jewish-American immigrant experience while also recounting their intimate stories of bravery, tragedy, and selflessness. Lavishly illustrated with color and black and white photographs, this is “a beautiful requiem” (The Wall Street Journal) in which “readers get the story of this particular floating Tower of Babel in riveting detail, and with all the wider context they could want” (Christian Science Monitor).

Titanic scholars contend that the demise of “the unsinkable ship” left more behind than a memory of April 15, 1912, as an important point in history. Through books, films, stories, and songs, the archetypal shipwreck has endured as a metaphor for the perils of mankind’s hubris and the fallibility of technology. In 1985, the discovery of the long-missing wreckage two miles below the surface of the Atlantic revitalized interest in the Titanic and spawned a new generation of books, films, and, for the first time, websites, and computer games. James Cameron’s blockbuster Titanic became the biggest movie of all time and engendered still greater popular interest in the tragic event.
