Traditional Chinese edition of The Seat of the Soul

The space-time continuum of physics ignores the realm of the mind. But consciousness is unconfined by space or time and represents a higher organizing principle, a fifth dimension, that transcends the speed of light. Marc Seifer examines relativity, ether theory, precognition, telepathy, and synchronicity, all from the perspective of the conscious universe.

To truly heal is to "make whole" on all levels, in contrast to "treating" which is limited and short-sighted, as Hawkins has emphasized in his best-selling series of books on human consciousness. These holistic lectures were first presented to a variety of recovery organizations and clinicians from diverse backgrounds. The emphasis is on recovery in its fullest sense - mental, physical, psychological and spiritual. Hawkins draws from a diverse clinical background of over 50 years as a leader in the field.--

It is primarily an instruction manual for the serious spiritual devotee and reveals information only known by those who have transcended the ego to reach Divine Realization. This is the inner route from the self to the Self, and the descriptions of the progressive states are devoted to the reader's own illumination. In the four decades ending in the year 2000, the number of priests will decline by 40% while the number of Catholics will grow by 65%. Schoenherr sees the priest shortage as the major force for change within the Catholic Church, and his book explores the reasons for the decline as well as its broad implications for the nature and control of the church. Schoenherr argues that mandatory celibacy is the primary cause of the shortage. He predicts that the shortage, along with the feminist movement among nuns and laywomen, doctrinal changes, and the growing pluralism in the church will lead to the end of mandatory celibacy, albeit after bitter clashes with conservative forces.

An accessible exploration of best-selling author's most famous work, *The Map of Consciousness*, that helps readers experience healing and transcendence. We are all born with a level of consciousness, an energetic frequency within the vast field of consciousness. And with *The Map of Consciousness*, we can truly understand the total spectrum of human consciousness. Using a unique muscle-testing method, Dr. David R. Hawkins conducted more than 250,000 calibrations during 20 years of research to define a range of values, attitudes, and emotions that correspond to levels of consciousness. This range of values-along with a logarithmic scale of 1 to 1,000-became the *Map of Consciousness*, which Dr. Hawkins first wrote about in his best-selling book, *Power vs. Force*. With the *Map*, Dr. David R. Hawkins laid out the entire spectrum of consciousness, from the lower levels of Shame, Guilt, Apathy, Fear,

Imagine—what if you had access to a simple yes-or-no answer to any question you wished to ask? A demonstrably true answer. Any question . . . think about it.— from the Foreword We think we live by forces we control, but in fact we are governed by power from unrevealed sources, power over which we have no control.— from the author's Preface The universe holds its breath as we choose, instant by instant, which pathway to follow; for the universe, the very essence of life itself, is highly conscious. Every act, thought, and choice adds to a permanent mosaic; our decisions ripple through the universe of consciousness to affect the lives of all.— from *Power vs. Force* "[A] beautiful gift of writing . . . described in this book. Dr Hawkins's previous books focused on advanced states of awareness and Enlightenment. Over the years, thousands of students had asked for a practical technique by which to remove the inner blocks to happiness, love, joy, success, health and, ultimately, Enlightenment. This book provides a mechanism for letting go of those blocks. The mechanism of surrender that Dr Hawkins describes can be done in the midst of everyday life. The book is equally useful for all dimensions of human life: physical health, creativity, financial success, emotional healing, vocational fulfillment, relationships, sexuality and spiritual growth. It is an invaluable resource for all professionals who work in the areas of mental health, psychology, medicine, self-help, addiction recovery and spiritual development.

This volume examines the dynamics of self-transcendence for both individuals and humanity as a whole. In doing so, it illuminates the definitive relationship between self-transcendence and global democracy. Drawing upon a vast literature of philosophy, psychology, and religion, ancient and modern, East and West, this book reveals the power of human futurity in actualizing our higher potential. It represents a real breakthrough in understanding our emerging new era in the evolution of humanity. It describes our transition from personal consciousness to global consciousness. The book includes chapters on the

fundamental ideas that animate our self-understanding and define our common humanity. Through careful scholarship, it examines the dynamics of human dignity, freedom, love, community, intrinsic rights, and global ethics. It explores each of these concepts as a dimension of our human temporality as we envision and move into an ever-transcending future, a future that includes a World Parliament and planetary democracy. In our time of apparent hopelessness and despair, this volume reveals the grounds for a powerful hope that we can establish one world civilization of peace, justice, freedom, and sustainability. It makes a truly unique contribution, not found elsewhere in today's literature, revealing the astonishing dignity and potential of being human. It is essential reading for all those concerned for the future of humanity and our precious planet Earth.

"The problem of Transcendence is the problem of our time. " I Needless to say, Transcendence was a particularly lively issue when Karl Heim wrote these words in the mid-1930's. Within the province of philosophical theology and philosophy of religion, however, it is always the problem, as Gordon Kaufman has recently reminded us. For the question concerning the nature and the reality of Transcendence has not only to do with self-transcendence, but with the being of Transcendence-Itself, that is to say, with the nature and the reality of God as

experienced and understood at any given time or place. Now there are those today who would claim that any further discussion of the latter half of this proposition, namely, Transcendence-Itself or God, is worthless and quite beside the point. Such persons would claim that the particular logia represented by the theological sciences has collapsed by virtue of its object having disappeared. Indeed, when one surveys the contemporary scene in philosophy and theology, there is a good deal of evidence that this is the case: "theology of late having become something of a "spectacle," to use Pritz Buri's term. One of the reasons for this, we here contend, is that the richness and the diversity of the meaning of Transcendence has been lost. And even though we do not here intend to resolve the issue, neither do we assume that such an enquiry is either impossible or irrelevant.
