Increasingly, physicians are leveraging their medical training and expertise to pursue careers in non-traditional arenas. Their goals are diverse: · Explore consulting as a way to improve patient care · Lay the foundation for a career in academic medicine · Provide leadership in healthcare · Strengthen ties between a clinic and the community · Broaden one's experience as a medical student · As a journalist or writer, open a window onto medicine for non-experts

Some physicians will pursue another degree, while others may not, in anticipation of moving into public service, business, education, law, or organized medicine. Their common ground is the desire to enhance their professional fulfillment. Drs. Urman and Ehrenfeld's book features individual chapters on the wide array of non-traditional careers for physicians, each one written by an outstanding leader in medicine who him- or herself has successfully forged a unique career path. A final chapter brings together fascinating brief profiles – “case studies” – of physicians who have distinguished themselves professionally outside of traditional settings. Suitable for readers at any point in their medical career – practitioners, fellows, residents, and medical students – who want to explore possibilities beyond traditional medical practice, the book also sets out common-sense advice on topics such as work-life balance, mentorship, and the relationship between personality and job satisfaction.

The 'Vault Guide to Private Equity and Hedge Fund Interviews' is a new title covering all levels in the private equity and hedge fund recruiting interview space, including the junior, pre-MBA interviews which share the same checklists for the interviewing process. Getting a position in hedge funds and private equity boils down to one question: Will you make money for the firm? The entire interview is devoted to determining that answer. Not only that, candidates need to make it past the headhunters who pre-judge them, answer technical finance and accounting questions about a field that they may have zero experience with, and even be tested on the spot by being asked to create an Excel model from scratch or presenting a case study.

Americans are taught to believe that upward mobility is possible for anyone who is willing to work hard, regardless of their social status, yet it is often those from affluent backgrounds who land the best jobs. Pedigree takes readers behind the closed doors of top-tier investment banks, consulting firms, and law firms to reveal the truth about who really gets hired for the nation's highest-paying entry-level jobs, who doesn't, and why. Drawing on scores of in-depth interviews as well as firsthand observation of hiring practices at some of America's most prestigious firms, Lauren Rivera shows how, at every step of the hiring process, the ways that employers define and evaluate merit are strongly skewed to favor job applicants from economically privileged backgrounds. She reveals how decision makers draw from ideas about talent—what it is, what best signals it, and who does (and does not) have it—that are deeply rooted in social class.

Displaying the "right stuff" that elite employers are looking for entails considerable amounts of economic, social, and cultural resources on the part of the applicants and their parents. Challenging our most cherished beliefs about college as a great equalizer and the job market as a level playing field, Pedigree exposes the class biases built into American notions about the best and the brightest, and shows how social status plays a significant role in determining who reaches the top of the economic ladder.
