This book attempts to draw lessons from the experiences of developed as well as developing countries in carrying out telecommunications reform. Contributors come from academia, as well as from stakeholders in telecommunications policy in a dozen countries, mostly in the Asia-Pacific region. Globally, the telecommunications industry is undergoing major changes: technological advances in the form of a vast number of new digitised services, ownership shifts as state-owned carriers in many countries become fully or partly privatized, and a general transition from monopolistic to more competitive market environments. The economic and regulatory experiences derived from these changes are explored and analyzed using the USA, the UK, Australia and Singapore to represent developed and newly industrialized countries, and China, India, Indonesia, Malaysia, the Philippines, Sri Lanka, Thailand and Vietnam as examples of developing countries. The conclusions outlined in this timely volume hold important lessons for these as well as for other countries.

A global look at the reasons behind the recent economic collapse, and the responses to it The speculative bubble in the housing market began to burst in the United States in 2007, and has been followed by ruptures in virtually

every asset market in almost every country in the world. Each country proposed a range of policy initiatives to deal with its crisis. Policies that focused upon stabilizing the housing market formed the cornerstone of many of these proposals. This internationally focused book evaluates the genesis of the housing market bubble, the global viral contagion of the crisis, and the policy initiatives undertaken in some of the major economies of the world to counteract its disastrous effects. Unlike other books on the global crisis, this guide deals with the housing sector in addition to the financial sector of individual economies. Countries in many parts of the world were players in either the financial bubble or the housing bubble, or both, but the degree of impact, outcome, and responses varied widely. This is an appropriate time to pull together the lessons from these various experiences. Reveals the housing crisis in the United States as the core of the meltdown Describes the evolution of housing markets and policies in the run-up to the crisis, their impacts, and the responses in European and Asian countries Compares experiences and linkages across countries and points to policy implications and research lessons drawn from these experiences Filled with the insights of well-known contributors with strong contacts in practice and academia, this timely guide discusses the history and evolution of the recent crisis as local to each contributor's part of the world, and examines its distinctive and common features with that of the U.S., the trajectory of its evolution, and the similarities and differences in policy response.
